### *Analysis by the Legislative Reference Bureau*

This bill requires a defined network plan or preferred provider plan to make available a current directory of health care providers in the plan's network of providers to anyone considering enrollment in the plan and to the plan's enrollees at least annually. Defined network plans and preferred provider plans are types of managed care organizations that provide health care benefits to their enrollees. The bill requires the plan to maintain a current provider directory on its website, to ensure that the directory on the site is updated at least quarterly, and to ensure that the public may view the provider directory on the site without creating or accessing an account or entering a policy or contract number. A plan is also required by the bill to provide information in each electronic and print directory on providers for each of the plan's covered services, to prominently indicate in each electronic and print directory which providers are accepting new patients at the time the directory is updated, and to accommodate with each electronic and print directory the communication needs of persons with disabilities and persons with limited English proficiency.
