**Legislative  
Resolve No.**  
18

Opposing the United States Food and Drug Administration's approval of AquaBounty AquAdvantage genetically engineered salmon; and urging the United States Congress to enact legislation that requires prominently labeling genetically engineered salmon and salmon products with the words "Genetically Modified" on the product's packaging.

---

**BE IT RESOLVED BY THE LEGISLATURE OF THE STATE OF ALASKA:**

**WHEREAS**, on November 19, 2015, the United States Food and Drug Administration approved AquaBounty AquAdvantage genetically engineered salmon as safe for human consumption; and

**WHEREAS** the approval is the first time in history that the United States Food and Drug Administration has approved a genetically engineered animal for human consumption; and

**WHEREAS** a large majority of state residents oppose the approval of genetically engineered salmon by the United States Food and Drug Administration; and

**WHEREAS** more than 2,000,000 Americans opposed the United States Food and Drug Administration's approval of genetically engineered salmon in the largest number of comments the United States Food and Drug Administration has ever received on an action;

and

**WHEREAS** more than 65 retailers, including Costco, Safeway, and Target, have announced that they have no plans to sell genetically modified salmon; and

**WHEREAS** more than 40 members of the United States Congress have expressed opposition to the approval of AquaBounty AquAdvantage genetically engineered salmon; and

**WHEREAS** the state has bountiful fisheries that provide wild, natural, and sustainable seafood; and

**WHEREAS** the accidental release of transgenic fish into the wild could devastate native fish populations and ecosystems; and

**WHEREAS** a May 2013 McGill University research report detailed findings demonstrating interbreeding between genetically modified salmon and brown trout could occur, suggesting that the potential for similar hybridization between other closely related species could pose risks for wild populations, including wild salmon; and

**WHEREAS** the research demonstrated that transgenic hybrid salmon can outcompete with both wild salmon and genetically modified salmon, making hybridization relevant to risk assessments; and

**WHEREAS**, each year, thousands of salmon escape from open water net pens into the Pacific and Atlantic Oceans, demonstrating that escapement is a serious threat to wild fish populations; and

**WHEREAS** the AquaBounty facility on Prince Edward Island is producing genetically engineered fish eggs and sits adjacent to a water body that is directly connected to the Saint Lawrence Seaway and the Atlantic Ocean; and

**WHEREAS** the proximity of the AquaBounty facility to the Saint Lawrence Seaway and the Atlantic Ocean puts wild Atlantic salmon, which are listed under the Endangered Species Act, at risk; and

**WHEREAS** the long-term human health effects of consuming genetically engineered salmon are unknown;

**BE IT RESOLVED** that the Alaska State Legislature opposes the United States Food and Drug Administration's approval of AquaBounty AquAdvantage genetically engineered salmon; and be it

**FURTHER RESOLVED** that the Alaska State Legislature urges the United States

Congress to enact legislation that requires prominently labeling genetically engineered salmon or salmon products, including AquaBounty AquAdvantage genetically engineered salmon, with the words "Genetically Modified" on the product's packaging, as required by state law.

**COPIES** of this resolution shall be sent to the Honorable Donald J. Trump, President of the United States; the Honorable Michael R. Pence, Vice President of the United States and President of the U.S. Senate; the Honorable Sonny Perdue, United States Secretary of Agriculture; the Honorable Scott Gottlieb, M.D., United States Commissioner of Food and Drugs; and the Honorable Lisa Murkowski and the Honorable Dan Sullivan, U.S. Senators, and the Honorable Don Young, U.S. Representative, members of the Alaska delegation in Congress.
