"§20-2-23.

"(a) The Legislature finds the following:

"(1) New synthetic substances are being created which are not controlled under the provisions of existing state law but which have a potential for abuse similar to or greater than that for substances controlled under existing state law. These new synthetic substances are called "controlled substance analogs," "synthetic controlled substances or synthetic controlled substance analogues" and can be designed to produce a desired pharmacological effect and to evade the controlling statutory provisions. Controlled Synthetic controlled substance analogs substances or synthetic controlled substance analogues are being manufactured, distributed, possessed, and used as substitutes for controlled substances.

"(2) The hazards attributable to the traffic in and use of a synthetic controlled substance analogs or synthetic controlled substance analogues are increased because their
unregulated manufacture produces variations in purity and concentration.

"(3) Many new synthetic substances are untested, and it cannot be immediately determined whether they have useful medical or chemical purposes.

"(4) The uncontrolled importation, manufacture, distribution, possession, or use of controlled substance analogs has a substantial and detrimental impact on the health and safety of the people of this state.

"(5) Controlled substance analogs Synthetic controlled substances or synthetic controlled substance analogs can be created more rapidly than they can be identified and controlled by action of the Legislature. There is a need for a speedy determination of their proper classification under existing law. It is therefore necessary to identify and classify new substances that have a potential for abuse, so that they can be controlled in the same manner as other substances controlled under existing state law.
