his or her condition. Under current law, a child under 18 years of age who wants to be added to the medical marijuana registry for a disabling medical condition must be diagnosed as having a disabling medical condition by 2 physicians, one of whom must be a board-certified pediatrician, a board-certified family physician, or a board-certified child and adolescent psychiatrist who attests that he or she is part of the patient's primary care provider team. The bill removes the additional requirements on specific physicians to align with the constitutional provisions for a debilitating medical condition.

The bill encourages the state board of health when awarding marijuana study grants to prioritize grants to gather objective scientific research regarding the efficacy and the safety of administering medical marijuana for pediatric conditions, including but not limited to autism spectrum disorder.
