and effect as a physician's order with respect to medical treatment of the adult who is the subject of the MOST form. An adult with decisional capacity or an authorized decision-maker for an adult who lacks decisional capacity may execute a MOST form.

The bill requires emergency medical service personnel, a health care provider, or a health care facility to comply with a MOST form that is apparent and immediately available. Emergency medical service personnel, a health care provider, or a health care facility that complies with a MOST form is exempt from civil or criminal liability or regulatory sanction. A verbal order from an adult's physician, advanced practice nurse, or, if under the supervision or authority of the physician, physician's assistant shall have the same force and effect as an executed MOST form so long as the verbal order is acknowledged in writing and signed by the adult's physician, advanced practice nurse, or, if under the supervision or authority of the physician, physician's assistant. A health care facility or a health care provider may delay compliance with an adult's executed MOST form for the purpose of consulting with the adult, the adult's authorized surrogate decision-maker, or the physician, advanced practice nurse, or physician's assistant who signed the form concerning the provisions of the form and their applicability in the present treatment environment.

The bill requires a health care facility that transfers an adult who is known to have properly executed and signed a MOST form to communicate the existence of the form to the receiving health care facility before the transfer and ensure that the form accompanies the adult upon admission to or discharge from a health care facility.

A health care provider or health care facility that provides care to an adult whom the health care provider or health care facility knows to have executed a MOST form must provide notice to the adult or, if appropriate, to the adult's authorized surrogate decision-maker, of any policies based on moral convictions or religious beliefs of the health care provider or health care facility relative to the withholding or withdrawal of medical treatment. A health care provider or health care facility must promptly transfer an adult who has executed a MOST form to another health care provider or health care facility if the original health care provider or health care facility will not comply with the provisions of the form on the basis of policies based on moral convictions or religious beliefs.

An adult with decisional capacity may revoke all or part of his or her executed MOST form at any time. An authorized surrogate decision-maker may revoke an adult's MOST form if it was originally executed by an authorized surrogate decision-maker. Emergency medical service personnel, a health care provider, or an authorized surrogate decision-maker who becomes aware of the revocation of a MOST form must promptly communicate the fact of the revocation to a physician,

advanced practice nurse, or physician's assistant who is providing health care to the adult who is the subject of the form.

A health care facility may not require an adult to complete a MOST form as a condition of being admitted to, or receiving treatment from, the health care facility. Neither the existence nor absence of a MOST form shall be the basis for any delay in issuing or refusing to issue an annuity or policy of life or health insurance or any increase of a premium therefor. The bill clarifies the effect of a MOST form on conflicting provisions of another form of advance medical directive.
