and creates others in order to clarify what the lands are to which the article refers.

**Section 2** of the bill ensures that any lease payments and rental payments for land, including by definition any lease payments from commercial real property, would be distributed in the same way that all revenues generated from state trust lands are currently distributed.

**Section 3** of the bill grants the state board of land commissioners the authority to instruct the state treasurer to enter into lease-purchase agreements on behalf of the state school lands for the acquisition, construction, renovation, and improvement of commercial real property that the board will then lease as office space for state agencies or other tenants. The bill specifies that it is the general assembly's intent that annual lease payments be paid from commercial real property revenues, but sets up secondary and tertiary options in the event of a shortfall. Prior to instructing the state treasurer to enter into such lease-purchase agreements, the bill requires the state board of land commissioners to present a financial plan related to such a lease-purchase agreement to the department of personnel and the office of state planning and budgeting. No later than 60 days after presentation of the financial plan, the capital development committee is required to review the financial plan and may make recommendations. The bill also:

- ! Limits the total amount of annual lease payments payable by the state in any fiscal year;
- ! Specifies additional procedural and legal requirements relating to the lease-purchase agreements; and
- ! Creates the state board of land commissioners lease-purchase fund.

**Section 4** of the bill makes clear that any interest earned on damage deposits that the state board of land commissioners receives from a lessee related to leases on state lands for nonagricultural purposes may be retained by the state board of land commissioners.

**Section 6** of the bill creates the commercial real property operating fund to properly establish how to account for lease revenues generated from all commercial real property investments held by the state board of land commissioners on behalf of any of the state trust funds.

**Sections 7, 8, and 9** of the bill make conforming amendments to statutory sections related to contracting for services and procurement for the commercial real property operating fund that are consistent with a similar state board of land commissioners cash fund.
