for controlled maintenance funding. The guidelines shall address the timing of such eligibility with respect to the acquisition of, construction of, addition to, renovation of, or corrective repair of a state-owned, general-funded building or other physical facility.

The bill requires the guidelines developed by the state architect to provide for a waiver of eligibility requirements that a state agency or state institution of higher education may request in writing. If the state architect determines that special consideration is appropriate, he or she shall seek approval from the capital development committee.

The bill also requires the guidelines to be posted on the web site of the office of the state architect.

The bill allows the state architect to use moneys in a newly created emergency controlled maintenance account for emergency controlled maintenance funding when the need for such funding is communicated in writing to the state architect by a state agency or state institution of higher education. The state architect must annually provide a status report to the capital development committee that shows spending for emergency controlled maintenance projects from that account.

1 *Be it enacted by the General Assembly of the State of Colorado:*
