state forest service to make the specified upgrades and improvements to the seedling tree nursery.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) A large, diverse, and healthy tree population within Colorado's
5 naturally forested and community landscapes is vital in the fight against
6 climate change because trees are essential for increasing carbon
7 sequestration and achieving Colorado's climate mitigation targets;

8 (b) Colorado has recently suffered devastating impacts to its tree
9 population from uncharacteristic wildfires, insect outbreaks, drought, and
10 deforestation;

11 (c) In 2020 and 2021, Colorado experienced two record-breaking
12 wildfire years that resulted in four of the largest and most costly wildfires
13 in the state's history:

14 (I) The Marshall Fire, which burned over 6,000 acres and 1,000
15 structures in a highly urbanized area and caused more than \$500 million
16 in damages;

17 (II) The Cameron Peak Fire, which burned around 208,913 acres;

18 (III) The East Troublesome Fire, which burned around 193,812
19 acres; and

20 (IV) The Pine Gulch Fire, which burned around 139,007 acres;
21 and

22 (d) Reforestation in the aftermath of wildfires plays an important
23 role in:

24 (I) Preserving water quality;

25 (II) Restoring tree cover;

1 (III) Providing stream and riverbank support and decreasing flood
2 damage;

3 (IV) Increasing carbon sequestration;

4 (V) Enhancing outdoor recreation areas; and

5 (VI) Protecting biodiversity.

6 (2) The general assembly also finds that:

7 (a) Located on the foothills campus of Colorado state university
8 in Fort Collins, the Colorado state forest service seedling tree nursery
9 (forest service nursery) plays a critical role in providing seedling trees for
10 landowners and land managers in Colorado for conservation and
11 reforestation purposes;

12 (b) A large-scale, diverse, and reliable stock of seedling trees is
13 critical to mitigating the risk of future wildfires, protecting existing water
14 infrastructure, and adapting to continued climate change in Colorado;

15 (c) Due to its outdated infrastructure, limited staffing capabilities,
16 and limited growing space, the forest service nursery has been unable to
17 leverage its capacity and resources to meet the increasing demand for
18 seedling trees for nonfederal lands in Colorado; and

19 (d) The lack of funding to improve and modernize the forest
20 service nursery has put the forest service nursery in a position of being
21 unsustainable in the future and has significantly limited its ability to:

22 (I) Produce sufficient stock of a diversity of high-quality,
23 environmentally adapted seedling trees to be used for ecosystem
24 restoration;

25 (II) Provide guidance and expertise regarding reforestation that is
26 necessary to increase the survival rate of seedling trees; and

27 (III) Support post-wildfire recovery efforts at the scale now

1 required.

2 (3) The general assembly therefore declares that an investment by
3 the state to upgrade and expand the forest service nursery will increase
4 the forest service nursery's annual production dramatically, improve
5 professional expertise, and help support the growing need for seedling
6 trees and guidance regarding the implementation of reforestation projects
7 in response to wildfire.

8 **SECTION 2.** In Colorado Revised Statutes, **add** 23-31-318 as
