Section 1 of the bill directs the governor's energy office or its designee to create an inventory and map of lands under the control of the department of natural resources or other state agencies that have potential to support the development of renewable resource generation projects to meet the electrical energy needs of the division of parks and outdoor recreation. **Sections 2 and 3** authorize the executive director of the department of natural resources and the state land board, respectively, to include such lands among those suitable for acquisition or leasing for the purpose of allowing renewable energy generation projects to proceed.

Section 1 also creates the re-energize Colorado program, under which the division of parks and outdoor recreation is encouraged to undertake renewable energy generation projects on state land to supply or offset all of its electrical energy needs by the year 2020. Finally, Section 1 authorizes a qualifying retail utility to waive some of the existing statutory limits placed on net metering and customer-sited generation projects for purposes of meeting this goal.

Section 4 directs the public utilities commission to give the fullest possible consideration to projects under the re-energize Colorado program, especially where such projects offer good prospects for job creation and local economic growth, when considering the issuance of certificates of public convenience and necessity to utilities.

1 *Be it enacted by the General Assembly of the State of Colorado:*
