HOUSE
Amended 2nd Reading
April 14, 2010

- ! 15% for the years 2015 through 2019; and
- ! 20% for the years 2020 and thereafter.

The renewable energy portfolio standard also requires each cooperative electric association and municipally owned utility that is a qualifying retail utility to generate electricity from eligible energy resources in the following minimum amounts:

- ! 3% of retail electricity sales in Colorado for the years 2011 through 2014;
- ! 6% for the years 2015 through 2019; and
- ! 10% for the years 2020 and thereafter.

Section 1 of the bill specifies that, if any of these percentages is increased after February 1, 2010, then methane produced biogenically in geologic strata that was created as a result of human intervention is included as a type of biomass within the definition of renewable energy resources with regard to the affected entities. **Section 2** includes methane produced biogenically in geologic strata that was created as a result of human intervention and that does not involve additional land disturbance within the definition of "clean energy" for purposes of the Colorado clean energy development authority.
