For a member's income verification, the bill authorizes the state department to use the information on file or the information that was originally collected during the application process to determine whether the member is eligible for reenrollment. The state department shall require additional income verification if information about a member's income is not verified through a federally approved electronic data source for 2 or more consecutive years or as specified through federal authorization.

For a member's asset verification, the state department may complete the member's eligibility reenrollment process without any additional asset verification if there has been no change in the member's assets since the initial verification during the application process or as specified through federal authorization.

The bill authorizes the state department to seek federal authorization to delay a member's procedural termination during the reenrollment process to allow the member to continue receiving necessary services during the reenrollment process. The bill authorizes the state department to apply this delay in procedural termination to a specific population or as specified through federal authorization.

The bill authorizes the state department to seek federal authorization to allow an applicant's or member's eligibility for reenrollment to be based on financial findings from the supplemental nutrition assistance program, the temporary assistance for needy families program, and other means-tested benefit programs administered through the Colorado benefits management system. The state department may apply financial eligibility for medicaid to individuals whose gross income program and assets for applicable means-tested benefit programs are below applicable medicaid limits, regardless of differences in household composition and income-counting rules between programs or as specified through federal authorization.
