CONCERNING THE ROLE AND MISSION OF COMMUNITY COLLEGES.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly hereby finds and declares that:

(a) It is a priority in Colorado to afford the citizens in rural and urban areas of the state greater access to higher education;

(b) Four-year bachelor of applied science degrees are of increasing importance in enabling individuals to qualify for and obtain jobs;

(c) Offering bachelor of applied science degrees in high-demand

fields in the regions of the state is important to meeting the local economic development needs and is critical to reducing the educational attainment gap between urban and rural areas;

(d) Offering bachelor of applied science degrees at community colleges will:

(I) Provide an opportunity for underserved and first generation students to continue their educational pathway in a familiar community college setting, thus making it more likely these students will persist and complete their degrees;

(II) Further the goal of closing the educational attainment gap between the majority and minority populations, as more than half of all minority students attend community colleges;

(III) Further the Colorado commission on higher education's master plan goal to increase the attainment of high-quality post-secondary credentials across all academic disciplines and throughout Colorado by at least 1,000 new certificates and degrees each year in order to meet the anticipated workforce demands and to enhance access to, and through, post-secondary education to ensure that the system reflects the changing demographics of the state; and

(IV) Provide affordable access to a four-year degree at a time when the general assembly is concerned about tuition increases and student debt levels.

(2) It is therefore in the best interests of the state of Colorado, with certain limitations, to allow community colleges within the state system to offer four-year bachelor of applied science degrees.
