developed for its monthly billing of customers. An investor-owned electric utility shall file the comprehensive billing format at the time of filing a rate schedule with the commission. The comprehensive billing format must include the following:

- ! A line-item representation of all monthly charges and credits applied to the customer;
- ! For months in which tiered rates are applied, a breakdown of the tiered rates and the amount of usage to which each rate was applied for the month;
- ! The rate and usage for the current month and each of the previous 12 months, as shown in a bar graph or other visual format; and
- ! For customers to which demand rates apply, a listing of the demand charge, aggregated data about the range and average of kilowatts used during the various demand periods of the billing period, and, if the customer is a residential customer, a calculation of the amount that the customer would have been billed had standard residential rates applied.

The bill sets forth procedures for the commission's review of a filed comprehensive billing format and provides that once a comprehensive billing format has been approved by the commission, the investor-owned utility need not refile it unless changes have been made to it.
