CONCERNING MEASURES FOR THE CONSERVATION OF WATER IN THE STATE,
AND, IN CONNECTION THEREWITH, IMPLEMENTING THE PROPOSALS OF
THE COLORADO RIVER DROUGHT TASK FORCE.

Be it enacted by the General Assembly of the State of Colorado:

SECTION 1. Legislative declaration. (1) The general assembly finds and declares that:

(a) Since 2000, the Colorado river basin, including the Colorado

river and its tributaries in Colorado, has experienced unprecedented drought conditions that have contributed to decreased water supplies;

(b) Climate change, drier conditions, and depleted snowpack may further reduce the water available in Colorado's surface streams for beneficial uses and threaten Colorado's significant interests in the Colorado river and its tributaries; and

(c) Dry hydrology continues to reduce water supplies across the western slope of Colorado and the Colorado river basin and threatens the security of available water resources.

(2) The general assembly further finds and declares that:

(a) Senate Bill 23-295, enacted in 2023, created the Colorado river drought task force and a sub-task force related to tribal matters and tasked those entities with proposing ideas and making recommendations to address drought in the Colorado river basin;

(b) From July 2023 to December 2023, the task force and the sub-task force met frequently across Colorado and, on December 15, 2023, published a report of the task force's and sub-task force's work, topics of discussion, and recommendations;

(c) In the report, the task force and the sub-task force made several recommendations and produced several narrative suggestions;

(d) Some of the recommendations and narrative suggestions do not require statutory changes, as they relate to funding or federal policy;

(e) In addition, some of the recommendations and narrative suggestions are being addressed in other legislation or efforts, such as the annual water projects bill required pursuant to section 37-60-122 (1)(b), Colorado Revised Statutes, and the long bill for the 2024-25 state fiscal year; and

(f) The protections provided to electric utility water rights in sections 4, 5, and 6 of this act are for the benefit of the entire Yampa river basin water resources, in particular during low-flow conditions that have resulted in the administration of a call on the Yampa river in recent years.

The nondiversion or nonuse will provide a benefit to all water use sectors, balancing multiple beneficial uses of water on the Yampa river system.

(3) The general assembly therefore determines that it is in the best interest of Colorado to adopt some of the recommendations and narrative suggestions of the Colorado river drought task force and sub-task force related to tribal matters in order to protect, promote, and bolster Colorado's stake in the Colorado river and its tributaries.
