BILL: SB 1268

INTRODUCER: Senator Rouson

SUBJECT: Urban Agriculture Pilot Projects

DATE: March 10, 2023

REVISED: \_\_\_\_\_

	ANALYST	STAFF DIRECTOR	REFERENCE	ACTION
1.	Becker	Becker	AG	<b>Favorable</b>
2.			CA	
3.			RC	

---

**I. Summary:**

SB 1268 revises the term “urban agriculture” to include new commercial uses on certain lands.

The bill takes effect July 1, 2023.

**II. Present Situation:**

**Urban Agriculture**

Over the past decade, food policy in the United States has responded to ongoing shifts in consumer preferences and producer trends that favor local and regional food systems while also supporting traditional farm enterprises.<sup>1</sup> This support for local and regional farming has helped to increase agricultural production in urban areas within and surrounding major U.S. cities.

Urban farming operations represent a diverse range of systems and practices. They encompass large-scale innovative systems and capital-intensive operations, vertical and rooftop farms, hydroponic greenhouses (e.g., soilless systems), and aquaponics facilities (e.g., growing fish and plants together in an integrated system).<sup>2</sup> Urban farming also includes a variety of operations such as vacant city lots, city parks, churchyards, schoolyards, backyards, and community gardens. Urban farming and gardening is often presented as a potential solution for improving health outcomes, increasing self-reliance, strengthening community, and achieving social goals.

In 2021 the Legislature authorized the Florida Department of Agriculture and Consumer Services (department) to approve five urban agricultural pilot project programs in municipalities throughout

the state. There are requirements by which the department may approve such projects, eligibility and application requirements, and approved project length periods. Municipalities must submit a report to the department outlining outcome and impact of their pilot projects by a specified date. The department is then required to submit a report on the outcomes and impacts of the pilot projects to the President of the Senate and the Speaker of the House of Representatives.<sup>3</sup>

### **Types of Urban Agriculture**

The many forms of urban agriculture can be categorized as either commercial or community-based.<sup>4</sup> Commercial urban farms typically frame their business model on creating economically viable businesses that provide employment, food, and education opportunities to serve local needs.<sup>5</sup>

The primary objective of community-based urban gardens is to create spaces for local residents to engage in individual and neighborhood development and empowerment while growing, sharing, or selling fresh fruits and vegetables with each other.<sup>6</sup> Profitability is not necessarily the goal of community-based urban agriculture;<sup>7</sup> instead, these efforts seek dedicated outside funding to realize urban agriculture's promises of increased healthy food access, food justice, education, job training, ecological literacy, and community empowerment and development.<sup>8</sup>

### **“Right to Farm” Laws; Generally**

In the 1970s, states began to identify the potential conflicts between farmers and developers as urban sprawl crept into rural, agricultural areas. One of the initial concerns was that the relocation of city dwellers into agricultural areas would result in a rash of very expensive nuisance lawsuits once the new neighbors were confronted with the sensory nature of farm life, complete with an inescapable array of odors, loud noises, dust, and other side-effects.<sup>9</sup>

In an effort to protect farms and agricultural operations from the encroaching sprawl, states passed anti-nuisance laws that are referred to as “Right to Farm” laws. These laws, enacted in all 50 states, protect agricultural production against some nuisance lawsuits. The laws do not grant absolute immunity but generally provide protections for defendants based upon a “coming to the nuisance” defense theory. These laws provide a liability shield for pre-existing agricultural operations when

changes are made to the use of nearby parcels, such that the plaintiffs are described as “coming to the nuisance.”<sup>10</sup> The Florida Right to Farm Act was enacted in 1979.<sup>11</sup>

## **Nuisance**

A nuisance is described as an activity, condition, or situation created by someone that significantly interferes with another person’s use or enjoyment of their property. A private nuisance affects a person’s private right that is not common to the public while a public nuisance is an interference that affects the general public, for example, a condition that is dangerous to health or community standards.<sup>12</sup>

## **The Florida Right to Farm Act**

The Florida Right to Farm Act protects farm operations from nuisance lawsuits if the operations comply with generally accepted agricultural and management practices.<sup>13</sup>

The Florida Right to Farm Act states that a farm operation cannot be classified as a public or private nuisance if the farm:

- Has been in operation for 1 year or more since its established date of operation;
- Was not a nuisance when it was established; and
- Conforms to generally accepted agricultural and management practices.<sup>14</sup>

However, the following four unsanitary conditions constitute evidence of a nuisance:

- The presence of untreated or improperly treated human waste, garbage, offal, dead animals, dangerous waste materials, or gases which are harmful to human or animal life;
- The presence of improperly built or improperly maintained septic tanks, water closets, or privies;
- The keeping of diseased animals which are dangerous to human health, unless the animals are kept in accordance with a current state or federal disease control program; or
- The presence of unsanitary places where animals are slaughtered, which may give rise to diseases which are harmful to human or animal life.<sup>15</sup>

Additionally, a farm operation cannot be classified as a public or private nuisance due to a change:

- In ownership;
- In the type of farm product that is produced;
- In conditions in or around the locality of the farm; or

- Made in compliance with Best Management Practices adopted by local, state, or federal agencies.<sup>16</sup>

The Florida Right to Farm Act, however, may not be construed to permit an existing farm operation to increase to a more excessive farm operation with regard to noise, odor, dust, or fumes where the existing operation is adjacent to an established homestead or business.<sup>17,18</sup>

### **The Florida Building Code**

Part IV of ch. 553, F.S., is known as the “Florida Building Codes Act” (Act). The purpose and intent of the Act is to provide a mechanism for the uniform adoption, updating, interpretation, and enforcement of a single, unified state building code. The Building Code must be applied, administered, and enforced uniformly and consistently from jurisdiction to jurisdiction.<sup>19</sup>

The Florida Building Commission (Commission), housed within the Department of Business and Professional Regulation, implements the Building Code. The Commission reviews several International Codes published by the International Code Council, the National Electric Code, and other nationally adopted model codes to determine if the Building Code needs to be updated and adopts an updated Building Code every 3 years.

### **III. Effect of Proposed Changes:**

SB 1268 amends s. 604.73(3)(b), F.S., to revise the term “urban agriculture” to include new commercial uses on certain lands.

The bill also reenacts s. 604.40(2), F.S., and s. 604.50(2)(e), F.S., to conform to changes made by the bill.

The bill provides that this act shall take effect July 1, 2023.

### **IV. Constitutional Issues:**

#### **A. Municipality/County Mandates Restrictions:**

None.

#### **B. Public Records/Open Meetings Issues:**

None.

---

<sup>16</sup> Section 823.14(4)(b), F.S.

<sup>17</sup> Section 823.14(5), F.S.

<sup>18</sup> In an effort to eliminate duplication of regulatory authority over farm operations, local governments may not adopt an ordinance or similar policy to prohibit or limit an activity of a bona fide farm operation on land that is classified as agricultural land in accordance with statute, where the activity is regulated through implemented best management practices or certain interim measures. The full text of this prohibition is contained in s. 823.14(6), F.S.

<sup>19</sup> See s. 553.72(1), F.S.

C. Trust Funds Restrictions:

None.

D. State Tax or Fee Increases:

None.

E. Other Constitutional Issues:

None.

**V. Fiscal Impact Statement:**

A. Tax/Fee Issues:

None.

B. Private Sector Impact:

None.

C. Government Sector Impact:

None.

**VI. Technical Deficiencies:**

None.

**VII. Related Issues:**

None.

**VIII. Statutes Affected:**

This bill reenacts sections 604.40 and 604.50 of the Florida Statutes.

This bill substantially amends section 604.73 of the Florida Statutes.

**IX. Additional Information:**

A. Committee Substitute – Statement of Changes:

(Summarizing differences between the Committee Substitute and the prior version of the bill.)

None.

B. Amendments:

None.
