28 In applying these tables to any given separate attendance unit, no  
 29 school district shall receive less total money than it would receive if it  
 30 had a lesser average daily attendance in such separate attendance unit.  
 31 In applying the kindergarten table to a kindergarten program of less days  
 32 than a full school year, the support unit allowance shall be in ratio to  
 33 the number of days of a full school year. The tables for exceptional edu-  
 34 cation and alternative school secondary support units shall be applicable  
 35 only for programs approved by the state department of education following  
 36 rules established by the state board of education. Moneys generated from  
 37 computation of support units for alternative schools shall be utilized for  
 38 alternative school programs. School district administrative and facility  
 39 costs may be included as part of the alternative school expenditures.

1 (5) State Distribution Factor per Support Unit. Divide educational  
2 support program distribution funds, after subtracting the amounts necessary  
3 to pay the obligations specified in subsection (2) of this section, by the  
4 total state support units to secure the state distribution factor per sup-  
5 port unit.

6 (6) District Support Units. The number of support units for each school  
7 district in the state shall be determined as follows:

8 (a) (i) Divide the actual average daily attendance, excluding stu-  
9 dents approved for inclusion in the exceptional child educational  
10 program, for the administrative schools and each of the separate  
11 schools and attendance units by the appropriate divisor from the  
12 tables of support units in this section, then add the quotients  
13 to obtain the district's support units allowance for regular stu-  
14 dents, kindergarten through grade 12 including alternative school  
15 secondary students. Calculations in application of this subsec-  
16 tion shall be carried out to the nearest tenth.

17 (ii) Divide the combined totals of the average daily attendance  
18 of all preschool, kindergarten, elementary, secondary, juvenile  
19 detention center students and students with disabilities approved  
20 for inclusion in the exceptional child program of the district by  
21 the appropriate divisor from the table for computation of excep-  
22 tional education support units to obtain the number of support  
23 units allowed for the district's approved exceptional child pro-  
24 gram. Calculations for this subsection shall be carried out to the  
25 nearest tenth when more than one (1) unit is allowed.

26 (iii) The total number of support units of the district shall be  
27 the sum of the total support units for regular students, subsec-  
28 tion (6) (a) (i) of this section, and the support units allowance  
29 for the approved exceptional child program, subsection (6) (a) (ii)  
30 of this section.

31 (b) Total District Allowance Educational Program. Multiply the dis-  
32 trict's total number of support units, carried out to the nearest tenth,  
33 by the state distribution factor per support unit and to this product  
34 add the approved amount of programs of the district provided in subsec-  
35 tion (2) of this section to secure the district's total allowance for  
36 the educational support program.

37 (c) District Share. The district's share of state apportionment is the  
38 amount of the total district allowance, subsection (6) (b) of this sec-  
39 tion.

40 (d) Adjustment of District Share. The contract salary of every noncer-  
41 tificated teacher shall be subtracted from the district's share as cal-  
42 culated from the provisions of subsection (6) (c) of this section.

43 (7) Property Tax Computation Ratio. In order to receive state funds  
44 pursuant to this section a charter district shall utilize a school mainte-  
45 nance and operation property tax computation ratio for the purpose of cal-  
46 culating its maintenance and operation levy, that is no greater than that  
47 which it utilized in tax year 1994, less four-tenths of one percent (.4%). As  
48 used herein, the term "property tax computation ratio" shall mean a ratio de-  
49 termined by dividing the district's certified property tax maintenance and  
50 operation budget by the actual or adjusted market value for assessment pur-

1 poses as such values existed on December 31, 1993. Such maintenance and op-  
2 eration levy shall be based on the property tax computation ratio multiplied  
3 by the actual or adjusted market value for assessment purposes as such values  
4 existed on December 31 of the prior calendar year.

5 (8) Notwithstanding any other provision of title 33, Idaho Code, sup-  
6 port units computed pursuant to the provisions of this section shall be al-  
7 located to districts in such manner as to fully implement and comply with the  
8 provisions of section 33-1022D, Idaho Code.
