(e) If a property owner, within the time allowed under subsection (d)(3), notifies the municipality in writing that the property owner is claiming the exemption provided by this section, the municipality shall suspend the requirement that the property owner discontinue use of the property owner's sewage disposal system and connect to the municipality's sewer system until the property owner's eligibility for the exemption under this section is determined.

Each additional exemption under this subdivision begins on the date the previous exemption would otherwise expire.

The total period during which a property owner may be exempt from the requirement to connect to a municipality's sewer system under this subsection may not exceed twenty (20) years.

(i) A property owner qualifies for an exemption renewal as described in subsection (h)(2) if all of the following conditions are met:

If the local health department or its designee fails to provide a written determination under subdivision (3)(A) or (3)(B) within sixty (60) days after receiving a property owner's request, the property owner, at the property owner's expense, may obtain a written determination from a qualified inspector under subdivision (3)(C). If the local health department or the department's designee determines that a septic tank soil absorption system or constructed wetland septic system is failing, the property owner may appeal the determination to the board of the local health department under subdivision (3)(D), but the decision of the board as to whether the septic tank soil absorption system or constructed wetland septic system is failing is final and binding for purposes of this section.

(j) If a property qualifies for the exemption provided by this section and ownership of the property is transferred during a valid exemption period, including an exemption renewal period described in subsection (h)(2):

- (1) the exemption continues to apply to the property for the remainder of the exemption period during which the transfer occurs; and**
- (2) the transferee may apply for any exemption renewals under subsection (h)(2) that the previous property owner would have been entitled to apply for under this section.**

(k) If a property owner whose property qualifies for an exemption under this section, including a transferee described in subsection (j), discontinues use of the property owner's septic tank soil absorption system or constructed wetland septic system and consents to the connection of the property to the municipality's sewer system, the property owner may not be required to pay more than the following to connect to the municipality's sewer system:

- (1) The connection fee the property owner would have paid if the property owner had connected to the municipality's sewer system on the first date on which the property owner could have connected to the sewer system.**
