19	JULY 1, 2014]: Sec. 22. (a) As used in subsection (b)(1) with respect
20	to a stream, "total length" means the length of the stream, expressed in
21	miles, from the confluence of the stream with the receiving stream to
22	the upstream or headward extremity of the stream, as indicated by the
23	solid or dashed, blue or purple line depicting the stream on the most
24	current edition of the seven and one-half $(7 \ 1/2)$ minute topographic
25	quadrangle map published by the United States Geological Survey,
26	measured along the meanders of the stream as depicted on the map.
27	(b) This section does not apply to the following:
28	(1) A reconstruction or maintenance project (as defined in
29	IC 36-9-27) on a stream or an open regulated drain if the total
30	length of the stream or open drain is not more than ten (10) miles.

32	highway bridge in a rural area that crosses a stream having an
33	upstream drainage area of not more than fifty (50) square miles
34	and the relocation of utility lines associated with the construction
35	or reconstruction project if confined to an area not more than one
36	hundred (100) feet from the limits of the highway construction
37	right-of-way.
38	(3) The performance of an activity described in subsection $(c)(1)$
39	or $(c)(2)$ by a surface coal mining operation that is operated under

42	according to rules adopted under IC 4-22-2, to pose not more than

1	a minimal threat to floodway areas.
2	(5) An activity in a boundary river floodway to which section 26.5
3	of this chapter applies.
4	(6) The removal of a logiam or mass of wood debris that has
5	accumulated in a river or stream, subject to the following
6	conditions:
7	(A) Work must not be within a salmonid stream designated
8	under 327 IAC 2-1.5-5 without the prior written approval of
9	the department's division of fish and wildlife.
10	(B) Work must not be within a natural, scenic, or recreational
11	river or stream designated under 312 IAC 7-2.
12	(C) Except as otherwise provided in Indiana law, free logs or
13	affixed logs that are crossways in the channel must be cut,
14	relocated, and removed from the floodplain. Logs may be
15	maintained in the floodplain if properly anchored or otherwise
16	secured so as to resist flotation or dislodging by the flow of
17	water and placement in an area that is not a wetland. Logs
18	must be removed and secured with a minimum of damage to
19	vegetation.
20	(D) Isolated or single logs that are embedded, lodged, or

25	obstructions.
26	(ii) Posing a hazard to navigation.
27	(E) A leaning or severely damaged tree that is in immediate
28	danger of falling into the waterway may be cut and removed if

36	exclusively from one (1) side of a waterway. Crossing the bed
37	of a waterway is prohibited.
38	(H) To prevent the flow of sediment laden water back into the

14	deposit, or excavation.
15	(e) An applicant must receive a permit from the director for the

25	or botanical resources.
26	(f) In deciding whether to issue a permit under this section, the
27	director shall consider the cumulative effects of the structure,
28	obstruction, deposit, or excavation. The director may incorporate in and
29	make a part of an order of authorization conditions and restrictions that
30	the director considers necessary for the purposes of this chapter.
31	(g) A permit issued under this section:

1 (12) Creating, preparing, or modifying electronic or computerized 2 data relative to the performance of the activities described in this 3 subsection. 4 (c) Activities included within the practice of surveying that must be 5 accomplished under the responsible charge of a professional surveyor, 6 unless specifically exempted under subsection (d), include the 7 following: 8 (1) The creation of maps and geo-referenced data bases 9 representing authoritative locations for boundaries, fixed works, or topography, either by terrestrial surveying methods or by 10 photogrammetric or GNSS locations. This includes maps and 11 12 geo-referenced data bases prepared by any person, firm, or government agency if that data is provided to the public as a 13 survey product. 14 15 (2) Original data acquisition, or the resolution of conflicts between multiple data sources, when used for the authoritative 16 location of features within the following data themes: 17 18 (A) Geodetic control. 19 (B) Orthoimagery. 20 (C) Elevation and bathymetry. 21 (D) Fixed works. 22 (E) Government boundaries. 23 (F) Cadastral information. 24 (3) Certification of positional accuracy of maps or measured 25 survey data. 26 (4) Measurement, adjustment, and authoritative interpretation of 27 raw survey data. 28 (5) GIS-based parcel or cadastral mapping used for authoritative 29 boundary definition purposes wherein land title or development 30 rights for individual parcels are, or may be, affected. 31 (6) Interpretation of maps, deeds, or other land title documents to 32 resolve conflicting data elements within cadastral documents of 33 record. 34 (7) Acquisition of field data required to authoritatively position 35 fixed works or cadastral data to geodetic control. (8) Adjustment or transformation of cadastral data to improve the 36 37 positional accuracy of the parcel layer or layers with respect to the 38 geodetic control layer within a GIS for purposes of affirming 39 positional accuracy. 40 (d) A distinction is made in this subsection, in the use of electronic systems, between making or documenting original measurements in the 41 42 creation of survey products and the copying, interpretation, or

1 representation of those measurements in systems. Further, a distinction 2 is made according to the intent, use, or purpose of measurement 3 products in electronic systems, between the determination of 4 authoritative locations and the use of those products as a locational 5 reference for planning, infrastructure management, and general 6 information. The following items are not included as activities within 7 the definition of the practice of surveying: 8 (1) The creation of general maps: (A) prepared by private firms or government agencies for use 9 as guides to motorists, boaters, aviators, or pedestrians; 10 (B) prepared for publication in a gazetteer or atlas as an 11 12 educational tool or reference publication; 13 (C) prepared for or by educational institutions for use in the 14 curriculum of any course of study; 15 (D) produced by any electronic or print media firm as an illustrative guide to the geographic location of any event; or 16 (E) prepared by lay persons for conversational or illustrative 17 18 purposes, including advertising material and users' guides. 19 (2) The transcription of previously geo-referenced data into a 20 geographic information system by manual or electronic means, 21 and the maintenance thereof, if the data are clearly not intended 22 to indicate the authoritative location of property boundaries, the 23 precise definition of the shape or contour of the earth, and the 24 precise location of fixed works of humans. 25 (3) The transcription of public record data, without modification 26 except for graphical purposes, into geographic information 27 systems-based cadastres, including tax maps, zoning maps, and 28 associated records by manual or electronic means, and the 29 maintenance of that cadastre, if the data are clearly not intended 30 to authoritatively represent property boundaries. 31 (4) The preparation of any document by any agency of the federal 32 government that does not define real property boundaries, 33 including civilian and military versions of quadrangle topographic 34 maps, military maps, satellite imagery, and other similar 35 documents. 36 (5) The incorporation or use of documents or data bases prepared 37 by any federal agency into a geographic information system, 38 including federal census and demographic data, quadrangle 39 topographic maps, and military maps. 40 (6) Inventory maps and data bases created by any organization, in 41 either hard copy or electronic form, of physical features, facilities, 42 or infrastructure that are wholly contained within properties to

1 which the organization has rights or for which the organization 2 has management responsibility. The distribution of these maps 3 and data bases outside the organization must contain appropriate 4 metadata describing, at a minimum, the accuracy, method of 5 compilation, data source or sources, and date or dates, and 6 disclaimers of use clearly indicating that the data are not intended 7 to be used as a survey product.

8 (7) Maps, cross-sections, graphics, and data bases depicting the 9 distribution of natural resources or phenomena prepared by foresters, geologists, soil scientists, geophysicists, biologists, 10 archeologists, historians, or other persons qualified to document 11 and interpret the data in the context of their respective practices. 12 13 (8) Maps and geo-referenced data bases depicting physical 14 features and events prepared by any government agency if the 15 access to that data is restricted by statute, including geo-referenced data generated by law enforcement agencies 16 involving crime statistics and criminal activities. 17

18 (9) Classified parcels developed in accordance with 19 IC 6-1.1-6-9(c).

20 (e) The use of photogrammetric methods or similar remote sensing 21 technology to perform any part of the practice of surveying as defined 22 in this section may be performed only under the direct control and supervision of a professional surveyor or professional 23 24 photogrammetrists who maintain a current title of "Certified 25 Photogrammetrist" from a national scientific organization having a 26 process for certifying photogrammetrists.

27 (f) The practice of surveying encompasses a number of disciplines, including geodetic surveying, hydrographic surveying, cadastral 28 29 surveying, construction staking, route surveying, photogrammetric 30 surveying, and topographic surveying. A professional surveyor may 31 practice only within the surveyor's area of expertise.
