matters. Requires biennial reports from the utilities of each study area and from the IFA on the cooperative activities of the utilities. Provides that a utility applying to the IFA for a loan, a grant, or other financial assistance must demonstrate that its officers and employees have participated in study area activities. Requires every water utility, at least once in each calendar year, to perform an audit of its water distribution system to determine the causes of the water utility's "non-revenue water" (the difference between the amount of water entering the utility's distribution system and the amount of water received by the water utility's customers). In even-numbered years, requires the results of the annual audit to be verified by an independent evaluator and reported to the IFA and requires the IFA to issue a report concerning the audit results. Provides that, under certain circumstances, a permit may be issued for the operation of a public water system or for the discharge from a wastewater treatment plant without a certification that a life cycle cost-benefit analysis, a capital asset management plan, and a cybersecurity plan have been prepared. Provides that an applicant for or holder of a permit for the operation of a water or wastewater treatment plant may withhold information in a life cycle cost-benefit analysis or capital asset management plan from public disclosure if the information could be exempted from inspection and copying at the discretion of a public agency under the public records law. Amends the definition of "customer lead service line improvement".
