MEDICAID RE1 SEE FISC NOTE See Note Page 1 of 1

Provides relative to credentialing and claims payment functions of managed care organizations participating in the La. Medicaid coordinated care network program

Proposed law requires that each MCO shall compensate at a minimum the Medicaid fee for service rate in effect on the dates of service for all primary care services rendered to a newborn Medicaid beneficiary by a non participating Medicaid provider within the first thirty days of the beneficiary's birth.

Proposed law provides that DHH shall be prohibited from amending or otherwise altering any existing per member per month contracted rate of a managed care organization that is in effect on the effective date of this Act for any purpose which is related to the implementation of the provisions of this Act, provided the monthly PMPM continue to be actuarially sound.

EXPENDITURE EXPLANATION

This measure requires managed care organizations (MCO's) to compensate at least the Medicaid fee for service rate for all primary care services provided to a newborn within the first 30 days of birth, whether or not the provider is contracted with the MCO. MCO's currently are responsible for covering all newborn care provided by contracted network providers (within the first 30 days of birth), whether rendered by the designated primary care physician or other network provider. Information provided by DHH's rate actuary indicates the current contracted per member per month (PMPM) rate is based on utilization and unit cost using an MCO's preferred provider network, and do not contemplate non contracted providers. Plan medical cost are anticipated to increase by some level to account for reimbursing non network providers 100% of the fee for service rate. Information provided by DHH further indicates that for non emergent services, the plan is not required to reimburse more than 90% of the published Medicaid fee for service rate in effect on the date of service to out of network providers (to whom the plan has made three attempts to include the provider in the network). In addition, the department anticipates some attrition in plan participation based on out of network status entitles a provider to the full Medicaid rate without being subject to plan management or prior authorization.

The fiscal note assumes that these additional plan costs will not be passed on to DHH in the form of increased per member per month (PMPM) payments. This assessment is based on the provision that does not allow the department to reimburse plans for any additional cost incurred as a result of this measure provided the monthly capitation rates offered to the MCO's continue to be actuarially sound.

Note: The Centers for Medicare and Medicaid Services (CMS) requires DHH to pay Bayou Health prepaid plans an actuarially sound rate reflective of health plan expenses (including administration costs). DHH contracted actuaries provide DHH with a certified rate range, from which DHH chooses where within the range to set plan rates. Any changes in the plan costs are anticipated to increase (or bump) the rate range. Bayou Health actuaries must consider the impact of program changes on the capitation rates. To the extent the rate (PMPM) paid remains within the certified range, the department would not incur any additional costs in the form of increased PMPM payments. It is unknown the current rate paid to plans will remain actuarially sound if any additional plan cost are incurred as a result of this measure.

REVENUE EXPLANATION

The revenue table above reflects an increase in federal financial participation associated with increased PMPM payments for prepaid plans and increased administrative fee for the shared plans at a match rate of 62.96%.
