The original instrument and the following digest, which constitutes no part of the legislative instrument, were prepared by Alan Miller.

DIGEST

Mills (SB 195)

<u>Proposed law</u> requires that, notwithstanding any provision of law or any rule, regulation, or policy to the contrary, the governing authority of each public elementary and secondary school adopt a policy authorizing a school nurse to carry and administer inhalers, as defined in <u>present law</u>, to a student who the school nurse, in good faith, professionally believes is having a symptom of wheezing, whether or not such student has a prescription for an inhaler. The school nurse may administer the inhaler to respond to a student's symptom of wheezing, under standing protocol from a physician licensed to practice medicine in the state.

Effective August 1, 2014.
