Bill Header: RETIREMENT/STATE EMPS: Provides relative to the selection of certain optional survivor benefits for members of the Louisiana State Employees' Retirement System.

Cost Summary:

The estimated net actuarial and fiscal impact of this proposed legislation on the retirement systems and their plan sponsors is summarized below. Net actuarial costs pertain to estimated changes in the *net actuarial present value of future benefit payments and administrative expenses incurred by the retirement system*. Net fiscal costs or savings pertain to changes to all cash flows over the next five year period including retirement system cash flows, OPEB cash flows, or cash flows related to local and state government entities.

An increase in actuarial costs is denoted throughout the actuarial note by "Increase" or a positive number. Actuarial savings are denoted by "Decrease" or a negative number. An increase in expenditures or revenues (fiscal impact) is denoted by "Increase" or a positive number. A decrease in expenditures or revenues is denoted by "Decrease" or a negative number.

Estimated Actuarial Impact:

The top part of the following chart shows the estimated change in the *net actuarial present value of future benefit payments and expenses*, if any, attributable to the proposed legislation. The bottom part shows the effect on cash flows (i.e., contributions, benefit payments, and administrative expenses).

Net Actuarial Costs (Liabilities) Pertaining to:		<u>Net Actuarial Cost</u>

Bill Information

Current Law

Current law provides members of the Louisiana State Employees' Retirement System (LASERS) with various options to receive the actuarial equivalent of their retirement allowance in a reduced retirement allowance payable throughout the life of a surviving beneficiary. A member may select an option only upon application for retirement, and that selection is irrevocable.

One of the options, Option 2-B, provides that a member's reduced retirement benefit continues throughout the life of the person he nominated by written designation and, upon the death of that designated person, the reduced benefit continues throughout the life of his mentally handicapped child or children.

Proposed Law

HB 16 authorizes a member of LASERS to select Option 2-B at any time during his membership and allows such a member to change that selection if his mentally handicapped child predeceases him.

Implications of the Proposed Changes

HB 16 will allow a member to select Option 2-B at any time during his employment instead of only at the time of his application for retirement. The member will also be allowed to change that selection if his mentally handicapped child predeceases him.

**2020 REGULAR SESSION
ACTUARIAL NOTE HB 16**

I. ACTUARIAL IMPACT ON RETIREMENT SYSTEMS AND OPEB [Completed by LLA]

**A. Analysis of Net Actuarial Costs
(Prepared by LLA)**

This section of the actuarial note pertains to net actuarial costs or savings associated with the retirement systems and with OPEB.

1. Retirement Systems

The net actuarial cost or savings of the proposed legislation associated with the retirement systems is estimated to be \$0. The actuary's analysis is summarized below.

HB 16 authorizes a member to select Option 2-B at any time during employment and allows the member to change that election if the mentally handicapped child predeceases him. For this actuarial note we are interpreting the language of the bill to mean the member is allowed to change the election only if 1) the mentally handicapped child predeceases him prior to application for retirement, and 2) he changes his election prior to or coincident with application for retirement, not after. In this scenario because the various options are actuarially equivalent to the life annuity benefit, there is no actuarial cost associated with HB 16.

2. Other Post-employment Benefits (OPEB)

The net actuarial cost or savings of the proposed legislation associated with OPEB, including retiree health insurance premiums, is estimated to be \$0. The actuary's analysis is summarized below.

The liability for post-retirement medical insurance protection provided to retirees is not affected by changing the timing of the election of a retirement option.

**B. Actuarial Data, Methods and Assumptions
(Prepared by LLA)**

Unless indicated otherwise, the actuarial note for the proposed legislation was prepared using actuarial data, methods, and assumptions as disclosed in the most recent actuarial valuation report adopted by the Public Retirement Systems' Actuarial Committee (PRSAC). The data, methods and assumptions are being used to provide consistency with the actuary for the retirement system who may also be providing testimony to the Senate and House retirement committees. With certain exceptions, the actuary for the LLA finds the assumptions used by the retirement systems and PRSAC to be reasonable.

**C. Actuarial Caveat
(Prepared by LLA)**

There is nothing in the proposed legislation that will compromise the signing actuary's ability to present an unbiased statement of actuarial opinion.

II. FISCAL IMPACT ON RETIREMENT SYSTEMS AND OPEB [Completed by LLA]

This section of the actuarial note pertains to fiscal (annual) costs or savings associated with the retirement systems (Table A) and with OPEB (Table B). Fiscal costs or savings in Table A include benefit-related actuarial costs and administrative costs incurred by the retirement systems.

**A. Estimated Fiscal Impact – Retirement Systems
(Prepared by LLA)**

1. Narrative

Table A shows the estimated fiscal impact of the proposed legislation on the retirement systems and the government entities that sponsor them. A fiscal cost is denoted by "Increase" or a positive number. Fiscal savings are denoted by "Decrease" or a negative number. A revenue increase is denoted by "Increase" or a positive number. A revenue decrease is denoted by "Decrease" or a negative number.

Actuarial Disclosure: Risks Associated with Measuring Costs

This Actuarial Note is an actuarial communication, and is required to include certain disclosures in compliance with Actuarial Standards of Practice (ASOP) No. 51. Risk disclosures otherwise required by ASOP No. 51 do not apply to this Actuarial Note because the proposed bill does not significantly change the types or levels of risks of the retirement system.

**2020 REGULAR SESSION
ACTUARIAL NOTE HB 16**

Information Pertaining to Article (10)(29(F) of the Louisiana Constitution

HB 16 contains a retirement system benefit provision having an actuarial cost.

No members of the Louisiana State Employees' Retirement System would receive a larger benefit with the enactment of HB 16 than what they would have received without HB 16.
