4 (a) Prior to issuing an extended-release long-acting opioid in a non-abuse deterrent form

for outpatient use for the first time, a practitioner registered under section 7 shall: (i) evaluate the

patient's current condition, risk factors, history of mental health or substance use disorder, if any,

7 and whether the patient has taken or is currently taking medications to treat any such disorders;

(ii) discuss with the patient and, if the patient is a minor, the patient's parent or legal guardian,

the risks of addiction and overdose associated with the medication and the risk of concurrent use

of alcohol or other central nervous system depressants; (iii) inform the patient and, if the patient

is a minor, the patient's parent or legal guardian, and note in the patient's medical record that the

prescribed medication, in the prescriber's medical opinion, is an appropriate course of treatment

- based on the medical need of the patient; and (iv) obtain the patient's written informed consent
- and, if the patient is a minor, the written informed consent of the patient's parent or legal
- guardian, on a consent form established by the department which shall indicate that the
- practitioner consulted with and informed the patient and, where applicable, the patient's parent
- or legal guardian, as required by this section.
