An Act relative to ensuring uniformity in the regulation of sanitary sewage treatments.

*Be it enacted by the Senate and House of Representatives in General Court assembled, and by the authority of the same, as follows:*

1 SECTION 1. Section 13 of chapter 21A of the General Laws, as appearing in the 2010  
2 Official Edition, is hereby amended by adding the following paragraph:-

3 Notwithstanding the provisions of any general or special law to the contrary, no  
4 municipal board of health may promulgate any such regulations which impose standards,  
5 procedures or other requirements more stringent than or otherwise exceeding those set forth in  
6 the state environmental code, and in particular Title 5 thereof, concerning any matter relating to  
7 the subsurface treatment or disposal of sanitary sewage, including without limitation the  
8 construction, alteration or inspection of any system thereof. Provided, however, that where the  
9 board of health of any municipality determines, based upon unique local environmental  
10 concerns, supported by findings that have generally recognized scientific basis, the board of  
11 health may file a written application for approval to adopt such regulations with the  
12 commissioner of the department of environmental protection. Such application shall include an  
13 explanation of such unique local conditions, the specific regulation or regulations sought to be  
14 adopted by the board of health and copies of the scientific data, evidence and study that forms  
15 the basis for the application. Upon the receipt of a completed application with accompanying

16 documentation, the commissioner of the department of environmental protection shall, within  
17 thirty days, make a written determination of whether the proposed regulations are reasonably  
18 necessary for the protection of public health, safety, welfare and the environment of said  
19 municipality and approve or disapprove said regulations. No additional or more stringent  
20 regulations shall be adopted or become effective in any municipality until approved by the  
21 commissioner of the department of environmental protection.
