18 Section 21–228, 21–229, and 21–229.1
19 Annotated Code of Maryland
20 (2015 Replacement Volume and 2016 Supplement)

21 Preamble

22 WHEREAS, Name brand and specialty drug costs rose over 12% in 2014, which is
23 nearly double the cost increase in any other health care category; and

24 WHEREAS, Drug costs are a major cause of higher health insurance premiums each
25 year; and

26 WHEREAS, In 2013, the U.S. health care system spent more than \$80 billion on
27 specialty drugs alone, which cost on average 37 times more than traditional drugs and
28 represent 31% of total drug spending, and these costs are projected to increase to 44% of
29 overall drug spending by 2017; and

30 WHEREAS, Certain drug manufacturers, exploiting insufficient competition in the
31 market for certain essential generic drugs that had long been available to consumers at an
32 affordable price, have in recent years imposed unconscionable price increases, impeding
33 access to these drugs and putting patients and public health at risk; and

34 WHEREAS, Disclosure of drug development costs and marketing expenditures by
35 drug manufacturers will foster transparency for consumers and public and private health
36 insurers and create accountability on the part of drug manufacturers to deliver a fair return
37 on public investment in their products; and

1 WHEREAS, Consumers and policymakers deserve more information on drug costs
2 and cost increases to inform solutions that may help lower health care costs to consumers;
3 and

4 WHEREAS, Requiring drug corporations to disclose the basis for the prices of their
5 prescription drugs and to notify the public about substantial increases in prices would
6 create accountability on the part of drug manufacturers and help to stem the increase in
7 health care costs, which is harming individual consumers and the entire national economy;
8 and

9 WHEREAS, The entire national health care system is at risk if drug costs are not
10 stabilized; now, therefore,
