28.5	(k) \$600,000 the first year is from the off-road

28.7	routes and trails. Of this amount:
28.8	(1) \$200,000 is for a contract with a project

28.10	planning, designing, and providing a system
28.11	of state touring routes and trails for off-road

28.16	this appropriation not used for the project
28.17	administrator is available for signage or
28.18	promotion and implementation of the system.
28.19	This is a onetime appropriation.
28.20	(2) \$200,000 is for a contract and related work
28.21	to prepare a comprehensive, statewide,
28.22	strategic master plan for off-road vehicle
28.23	touring routes and trails. This is a onetime
28.24	appropriation and is available until June 30,
28.25	2022. Any portion of this appropriation not
28.26	used for the master plan is returned to the
28.27	off-road vehicle account. At a minimum, the
28.28	plan must: identify opportunities to develop
28.29	or enhance new, high-quality, comprehensive
28.30	touring routes and trails for off-road vehicles
28.31	in a system that serves regional and tourist
28.32	destinations; enhance connectivity with
28.33	touring routes and trails for off-road vehicles;
28.34	provide opportunities for promoting economic
28.35	development in greater Minnesota; help people

29.1	connect with the outdoors in a safe and
29.2	environmentally sustainable manner; create
29.3	new and support existing opportunities for
29.4	social, economic, and cultural benefits and
29.5	meaningful and mutually beneficial
29.6	relationships for users of off-road vehicles and
29.7	the communities that host trails for off-road
29.8	vehicles; and promote cooperation with local,
29.9	state, tribal, and federal governments;
29.10	organizations; and other interested partners.
29.11	(3) \$200,000 is to share the cost by
29.12	reimbursing federal, tribal, state, county, and
29.13	township entities for additional needs on roads
29.14	under their jurisdiction when the needs are a
29.15	result of increased use by off-road vehicles
29.16	and are attributable to a border-to-border
29.17	touring route established by the commissioner.
29.18	This paragraph applies to roads that are
29.19	operated by a public road authority as defined
29.20	in Minnesota Statutes, section 160.02,
29.21	subdivision 25. This is a onetime appropriation
29.22	and is available until June 30, 2023. To be
29.23	eligible for reimbursement under this
29.24	paragraph, the claimant must demonstrate that:
29.25	the needs result from additional traffic
29.26	generated by the border-to-border touring
29.27	route; and increased use attributable to a
29.28	border-to-border touring route has caused at
29.29	least a 50 percent increase in maintenance
29.30	costs for roads under the claimant's
29.31	jurisdiction, based on a ten-year maintenance
29.32	average. The commissioner may accept an
29.33	alternative to the ten-year maintenance average
29.34	if a jurisdiction does not have sufficient
29.35	maintenance records. The commissioner has
29.36	discretion to accept an alternative based on a

30.1	good-faith effort by the jurisdiction. Any
30.2	alternative should include baseline
30.3	maintenance costs for at least two years before
30.4	the year the route begins operating. The
30.5	ten-year maintenance average or any
30.6	alternative must be calculated from the years
30.7	immediately preceding the year the route
30.8	begins operating. Before reimbursing a claim
30.9	under this paragraph, the commissioner must
30.10	consider whether the claim is consistent with
30.11	claims made by other entities that administer
30.12	roads on the touring route, in terms of the
30.13	amount requested for reimbursement and the
30.14	frequency of claims made.
30.15	(1) \$600,000 the first year is from the
30.16	all-terrain vehicle account in the natural
30.17	resources fund for grants to St. Louis County.
30.18	Of this amount, \$100,000 is for a grant to St.
30.19	Louis County for an environmental assessment
30.20	worksheet for the overall construction of the
30.21	Voyageur Country ATV Trail system and

30.25	Country ATV Trail from Buyck to Holmes
30.26	Logging Road and to Shuster Road toward
30.27	Cook. This is a onetime appropriation.
30.28	(m) \$2,400,000 the first year is from the
30.29	all-terrain vehicle account in the natural
30.30	resources fund. Of this amount, \$1,300,000 is

30.32	funding sources to develop the Prospector
30.33	Loop Trail system and \$1,100,000 is for
30.34	acquisition, design, environmental review,
30.35	permitting, and construction for all-terrain

vehicle use on the Taconite State Trail
between Ely and Purvis Forest Management
Road.
(n) \$950,000 the first year and \$950,000 the
second year are from the all-terrain vehicle
account in the natural resources fund for grants
to St. Louis County for the Quad Cities ATV
Club trail construction program for planning,

- Subd. 3a. **Invasive aquatic plant management permit.** (a) "Invasive aquatic plant management permit" means an aquatic plant management permit as defined in rules of the

Department of Natural Resources that authorizes the selective control of invasive aquatic plants to cause a significant reduction in the abundance of the invasive aquatic plant.

- (b) The commissioner may waive the dated signature of approval requirement in rules of the Department of Natural Resources for invasive aquatic plant management permits if obtaining signatures would create an undue burden on the permittee or if the commissioner determines that aquatic plant control is necessary to protect natural resources.
- (c) If the signature requirement is waived under paragraph (b) because obtaining signatures would create an undue burden on the permittee, the commissioner shall require an alternate form of landowner notification, including news releases or public notices in a local newspaper, a public meeting, or a mailing or electronic transmission to the most recent permanent physical or electronic mailing address of affected landowners. The notification must be given annually and must include: the proposed date of treatment, the target species, the method of control or product being used, and instructions on how the landowner may request that control not occur adjacent to the landowner's property.
- (d) The commissioner may allow dated signatures of approval obtained for an invasive aquatic plant management permit to satisfy rules of the Department of Natural Resources to remain valid for three years if property ownership remains unchanged.
- Sec. 95. Minnesota Statutes 2018, section 115.03, subdivision 5, is amended to read:
- Subd. 5. Agency authority; national pollutant discharge elimination system. (a) 151.19 Notwithstanding any other provisions prescribed in or pursuant to this chapter and, with 151.20 respect to the pollution of waters of the state, in chapter 116, or otherwise, the agency shall 151.21 have the authority to perform any and all acts minimally necessary including, but not limited 151.22 to, the establishment and application of standards, procedures, rules, orders, variances, 151 23 stipulation agreements, schedules of compliance, and permit conditions, consistent with 151.24 and, therefore not less stringent than the provisions of the Federal Water Pollution Control 151.25 Act, as amended, applicable to the participation by the state of Minnesota in the national 151.26 pollutant discharge elimination system (NPDES); provided that this provision shall not be 151.27 construed as a limitation on any powers or duties otherwise residing with the agency pursuant 151.28 to any provision of law. 151.29
  - (b) An activity that conveys or connects waters of the state without subjecting the transferred water to intervening industrial, municipal, or commercial use does not require a national pollutant discharge elimination system permit. This exemption does not apply to pollutants introduced by the activity itself to the water being transferred.

Sec. 96. Minnesota Statutes 2018, section 115.03, is amended by adding a subdivision to read:

Subd. 5e. Sugar beet storage. The commissioner must not require a sugar beet company that has a current national pollutant discharge elimination system permit or state disposal system permit to install an engineered liner for a storm water runoff pond at a remote storage site for sugar beets unless a risk assessment confirms that there is significant impact on groundwater and that an engineered liner is necessary to prevent, control, or abate water pollution. For purposes of this subdivision, "remote storage site for sugar beets" means an area where sugar beets are temporarily stored before delivery to a sugar beet processing facility and that is not located on land adjacent to the processing facility.

Sec. 97. Minnesota Statutes 2018, section 115.035, is amended to read:

#### 115.035 EXTERNAL PEER REVIEW OF WATER QUALITY STANDARDS.

(a) When the commissioner convenes an external peer review panel during the promulgation or amendment of water quality standards, the commissioner must provide notice and take public comment on the charge questions for the external peer review panel and must allow written and oral public comment as part of the external peer review panel process. Every new or revised numeric water quality standard must be supported by a technical support document that provides the scientific basis for the proposed standard and that has undergone external, scientific peer review. Numeric water quality standards in which the agency is adopting, without change, a United States Environmental Protection Agency criterion that has been through peer review are not subject to this paragraph.

Documentation of the external peer review panel, including the name or names of the peer reviewer or reviewers, must be included in the statement of need and reasonableness for the water quality standard. If the commissioner does not convene an external peer review panel during the promulgation or amendment of water quality standards, the commissioner must state the reason an external peer review panel will not be convened in the statement of need and reasonableness.

(b) Every technical support document developed by the agency must be released in draft
 form for public comment before peer review and before finalizing the technical support
 document.

153.1	(c) The commissioner must provide public notice and information about the external

153.3	process for the numeric water quality standard, and:
153.4	(1) the request for comments must identify the draft technical support document and
153.5	where the document can be found;
153.6	(2) the request for comments must include a proposed charge for the external peer review
153.7	and request comments on the charge;
153.8	(3) all comments received during the public comment period must be made available to
153.9	the external peer reviewers; and
153.10	(4) if the agency is not soliciting external peer review because the agency is adopting a
153.11	United States Environmental Protection Agency criterion without change, that must be
153.12	noted in the request for comments.
153.13	(d) The purpose of the external peer review is to evaluate whether the technical support

153.15	practices. The external peer review must be conducted according to the guidance in the

153.21	(e) The type of review and the number of peer reviewers depends on the nature of the

153.23	significant new science or science that expands significantly beyond current documented
153.24	scientific practices or principles.
153.25	(f) In response to the findings of the external peer review, the agency must revise the

153.29	the new or revised water quality standard. The agency must note changes in the final technical
153.30	support document made in response to the external peer review.
153.31	(b) (g) By December 15 each year, the commissioner shall must post on the agency's
153.32	website a report identifying the water quality standards development work in progress or

completed in the past year, the lead agency scientist for each development effort, and 154.1 opportunities for public input. 154.2 Sec. 98. Minnesota Statutes 2018, section 115A.51, is amended to read: 154.3 115A.51 APPLICATION REQUIREMENTS. 154.4 (a) Applications for assistance under the program shall must demonstrate: 154.5 (a) (1) that the project is conceptually and technically feasible; 154.6 (b) (2) that affected political subdivisions are committed to implement the project, to 154.7 provide necessary local financing, and to accept and exercise the government powers 154.8 necessary to the project; 154.9 (e) (3) that operating revenues from the project, considering the availability and security 154.10 of sources of solid waste and of markets for recovered resources, together with any proposed 154.11 federal, state, or local financial assistance, will be sufficient to pay all costs over the projected life of the project; 154.13 (d) (4) that the applicant has evaluated the feasible and prudent alternatives to disposal, 154.14 including using existing solid waste management facilities with reasonably available capacity 154.15 sufficient to accomplish the goals of the proposed project, and has compared and evaluated the costs of the alternatives, including capital and operating costs, and the effects of the alternatives on the cost to generators.; 154.18 (5) that the applicant has identified: 154.19 (i) waste management objectives in applicable county and regional solid waste 154.20 management plans consistent with section 115A.46, subdivision 2, paragraphs (e) and (f), 154.21 or 473.149, subdivision 1; and 154.22 154.23 (ii) other solid waste facilities identified in the county and regional plans; and (6) that the applicant has conducted a comparative analysis of the project against existing 154.24 public and private solid waste facilities, including an analysis of potential displacement of 154.25 those facilities, to determine whether the project is the most appropriate alternative to achieve 154.26 the identified waste management objectives that considers: 154.27 (i) conformity with approved county or regional solid waste management plans; 154.28 154.29 (ii) consistency with the state's solid waste hierarchy and section 115A.46, subdivision 2, paragraphs (e) and (f), or 473.149, subdivision 1; and 154.30 (iii) environmental standards related to public health, air, surface water, and groundwater.

(b) The commissioner may require completion of a comprehensive solid waste 155.1 management plan conforming to the requirements of section 115A.46, before accepting an 155.2 155.3 application. Within five days of filing an application with the agency, the applicant must submit a copy of the application to each solid waste management facility mentioned in the 155.4 portion of the application addressing the requirements of paragraph (a), clauses (5) and (6). 155.5 **EFFECTIVE DATE.** This section is effective the day following final enactment. 155.6 155.7 Sec. 99. [115B.172] NATURAL RESOURCES DAMAGES ACCOUNT. Subdivision 1. Establishment. The natural resources damages account is established as 155.8 an account in the remediation fund. 155.9 Subd. 2. **Revenues.** The account consists of money from the following sources: 155.10 (1) revenue from actions taken to recover natural resources damages under section 155.11 115B.17, subdivision 7, or any other law, unless otherwise specified in the settlement 155.12 155.13 agreement; (2) appropriations and transfers to the account as provided by law; 155.14 155.15 (3) interest earned on the account; and (4) money received by the commissioner of the Pollution Control Agency or the 155.16 commissioner of natural resources for deposit in the account in the form of a gift or grant. Subd. 3. Expenditures. (a) Money in the account is appropriated to the commissioner 155.18 155.19 of natural resources for the purposes authorized in section 115B.20, subdivision 2, clause 155.20 (4).(b) The commissioner of management and budget must allocate the amounts available 155.21 in any biennium to the commissioner of natural resources for the purposes of this section 155.22 based upon work plans submitted by the commissioner of natural resources and may adjust 155.23 those allocations if revised work plans are submitted. Copies of the work plans must be 155.24 submitted to the chairs of the house of representatives and senate committees and divisions 155.26 having jurisdiction over environment and natural resources finance. Subd. 4. Report. By November 1 each year, the commissioner of natural resources must 155.27 submit a report to the chairs and ranking minority members of the house of representatives 155.28 and senate committees and divisions with jurisdiction over environment and natural resources 155.29 policy and finance on expenditures from the natural resources damages account during the 155.30 previous fiscal year. 155.31

Sec. 100. Minnesota Statutes 2018, section 116.155, subdivision 1, is amended to read:

- Subdivision 1. **Creation.** The remediation fund is created as a special revenue fund in the state treasury to provide a reliable source of public money for response and corrective actions to address releases of hazardous substances, pollutants or contaminants, agricultural chemicals, and petroleum, and for environmental response actions at qualified landfill facilities for which the agency has assumed such responsibility, including perpetual care of such facilities. The specific purposes for which the general portion of the fund may be spent are provided in subdivision 2. In addition to the general portion of the fund, the fund contains three four accounts described in subdivisions 4 to 5a 5b.

- Sec. 103. Minnesota Statutes 2018, section 116.993, subdivision 2, is amended to read:
- Subd. 2. **Eligible borrower.** To be eligible for a loan under this section, a borrower must:

Minnesota Statutes 2018, section 116D.04, subdivision 2a, is amended to read: 157.12 Subd. 2a. When prepared. (a) Where there is potential for significant environmental 157.13 effects resulting from any major governmental action, the action shall must be preceded by 157.14 a detailed environmental impact statement prepared by the responsible governmental unit. The environmental impact statement shall must be an analytical rather than an encyclopedic 157.16 document which that describes the proposed action in detail, analyzes its significant 157.17 environmental impacts, discusses appropriate alternatives to the proposed action and their 157.18 impacts, and explores methods by which adverse environmental impacts of an action could 157.19 be mitigated. The environmental impact statement shall must also analyze those economic, 157.20 employment, and sociological effects that cannot be avoided should the action be 157.21 implemented. To ensure its use in the decision-making process, the environmental impact 157.22 statement shall must be prepared as early as practical in the formulation of an action. 157.23 (b) The board shall by rule establish categories of actions for which environmental 157 24 157.25 impact statements and for which environmental assessment worksheets shall must be prepared as well as categories of actions for which no environmental review is required under this 157.26 section. A mandatory environmental assessment worksheet is not required for the expansion 157.27 of an ethanol plant, as defined in section 41A.09, subdivision 2a, paragraph (b), or the 157.28 conversion of an ethanol plant to a biobutanol facility or the expansion of a biobutanol 157.29 facility as defined in section 41A.15, subdivision 2d, based on the capacity of the expanded 157.30

or converted facility to produce alcohol fuel, but must be required if the ethanol plant or

biobutanol facility meets or exceeds thresholds of other categories of actions for which environmental assessment worksheets must be prepared. The responsible governmental unit for an ethanol plant or biobutanol facility project for which an environmental assessment worksheet is prepared is the state agency with the greatest responsibility for supervising or approving the project as a whole.

- (c) A mandatory environmental impact statement is not required for a facility or plant located outside the seven-county metropolitan area that produces less than 125,000,000 gallons of ethanol, biobutanol, or cellulosic biofuel annually, or produces less than 400,000 tons of chemicals annually, if the facility or plant is: an ethanol plant, as defined in section 41A.09, subdivision 2a, paragraph (b); a biobutanol facility, as defined in section 41A.15, subdivision 2d; or a cellulosic biofuel facility. A facility or plant that only uses a cellulosic feedstock to produce chemical products for use by another facility as a feedstock is not considered a fuel conversion facility as used in rules adopted under this chapter.
- (d) The responsible governmental unit shall promptly publish notice of the completion of an environmental assessment worksheet by publishing the notice in at least one newspaper of general circulation in the geographic area where the project is proposed, by posting the notice on a website that has been designated as the official publication site for publication of proceedings, public notices, and summaries of a political subdivision in which the project is proposed, or in any other manner determined by the board and shall provide copies of the environmental assessment worksheet to the board and its member agencies. Comments on the need for an environmental impact statement may be submitted to the responsible governmental unit during a 30-day period following publication of the notice that an environmental assessment worksheet has been completed. The responsible governmental unit may extend the 30-day comment period for an additional 30 days one time. Further extensions of the comment period may not be made unless approved by the project's proposer. The responsible governmental unit's decision on the need for an environmental impact statement shall must be based on the environmental assessment worksheet and the comments received during the comment period, and shall must be made within 15 days after the close of the comment period. The board's chair may extend the 15-day period by not more than 15 additional days upon the request of the responsible governmental unit.
- (e) An environmental assessment worksheet shall <u>must</u> also be prepared for a proposed action whenever material evidence accompanying a petition by not less than 100 individuals who reside or own property in the state, submitted before the proposed project has received final approval by the appropriate governmental units, demonstrates that, because of the nature or location of a proposed action, there may be potential for significant environmental

- (ii) an expansion of an existing animal feedlot facility with a total cumulative capacity 159.13 of less than 1,000 animal units; 159.14
- (2) the application for the animal feedlot facility includes a written commitment by the 159.15 proposer to design, construct, and operate the facility in full compliance with Pollution 159.16 Control Agency feedlot rules; and 159.17
- (3) the county board holds a public meeting for citizen input at least ten business days before the Pollution Control Agency or county issuing a feedlot permit for the animal feedlot 159.19 facility unless another public meeting for citizen input has been held with regard to the feedlot facility to be permitted. The exemption in this paragraph is in addition to other exemptions provided under other law and rules of the board.
  - (g) The board may, before final approval of a proposed project, require preparation of an environmental assessment worksheet by a responsible governmental unit selected by the board for any action where environmental review under this section has not been specifically provided for by rule or otherwise initiated.
- 159.27 (h) An early and open process shall must be utilized used to limit the scope of the environmental impact statement to a discussion of those impacts that, because of the nature 159.28 or location of the project, have the potential for significant environmental effects. The same 159.29 process shall must be utilized used to determine the form, content, and level of detail of the 159.30 statement as well as the alternatives that are appropriate for consideration in the statement. 159.31 In addition, the permits that will be required for the proposed action shall must be identified 159.32 during the scoping process. Further, the process shall must identify those permits for which

information will be developed concurrently with the environmental impact statement. The board shall provide in its rules for the expeditious completion of the scoping process. The determinations reached in the process shall must be incorporated into the order requiring the preparation of an environmental impact statement.

- (i) The responsible governmental unit shall, to the extent practicable, avoid duplication and ensure coordination between state and federal environmental review and between environmental review and environmental permitting. Whenever practical, information needed by a governmental unit for making final decisions on permits or other actions required for a proposed project shall must be developed in conjunction with the preparation of an environmental impact statement. When an environmental impact statement is prepared for a project requiring multiple permits for which two or more agencies' decision processes include either mandatory or discretionary hearings before a hearing officer before the agencies' decision on the permit, the agencies may, notwithstanding any law or rule to the contrary, conduct the hearings in a single consolidated hearing process if requested by the proposer. All agencies having jurisdiction over a permit that is included in the consolidated hearing shall participate. The responsible governmental unit shall establish appropriate procedures for the consolidated hearing process, including procedures to ensure that the consolidated hearing process is consistent with the applicable requirements for each permit regarding the rights and duties of parties to the hearing, and shall utilize use the earliest applicable hearing procedure to initiate the hearing. All agencies having jurisdiction over a permit identified in the draft environmental assessment worksheet scoping document must begin reviewing any permit application upon publication of the notice of preparation of the environmental impact statement.
- (j) An environmental impact statement shall must be prepared and its adequacy determined within 280 days after notice of its preparation unless the time is extended by consent of the parties or by the governor for good cause. The responsible governmental unit shall determine the adequacy of an environmental impact statement, unless within 60 days after notice is published that an environmental impact statement will be prepared, the board chooses to determine the adequacy of an environmental impact statement. If an environmental impact statement is found to be inadequate, the responsible governmental unit shall have has 60 days to prepare an adequate environmental impact statement.
