S1915-1

SENATE STATE OF MINNESOTA NINETY-FIRST SESSION

RSI

S.F. No. 1915

(SENATE AUTHORS: RARICK, Osmek, Mathews, Tomassoni and Simonson)							
DATE	D-PG	OFFICIAL STATUS					
02/28/2019	590	Introduction and first reading					
03/07/2019		Referred to Energy and Utilities Finance and Policy Comm report: To pass as amended and re-refer to Finance					

1.1	A bill for an act
1.2 1.3 1.4	relating to energy; establishing the Conservation Improvement Program Modernization Act of 2019; modifying conservation improvement program requirements for consumer-owned utilities; amending Minnesota Statutes 2018,
1.4	section 216B.241, subdivisions 1c, 1d, 2, 2b, 7; proposing coding for new law in
1.6 1.7	Minnesota Statutes, chapter 216B; repealing Minnesota Statutes 2018, section 216B.241, subdivision 1b.
1.8	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:
1.9	ARTICLE 1
1.10	TITLE
1.11	Section 1. CITATION; CONSERVATION IMPROVEMENT PROGRAM
1.12	MODERNIZATION ACT.
1.13	This act shall be known as the "Conservation Improvement Program Modernization Act
1.14	<u>of 2019."</u>
1.15	ARTICLE 2
1.16	CONSERVATION IMPROVEMENT PROGRAMS
1.17	FOR CONSUMER-OWNED UTILITIES
1.18	Section 1. [216B.2402] CONSERVATION IMPROVEMENT PROGRAMS FOR
1.19	CONSUMER-OWNED UTILITIES.
1.20	Subdivision 1. Definitions. For the purpose of this section, the terms defined in this
1.21	subdivision have the meanings given to them:
1.22	(a) "Consumer-owned utility" means a municipal gas utility, a municipal electric utility,
1.23	or a cooperative electric association.

Article 2 Section 1.

SF1915	REVISOR	RSI	S1915-1	1st Engrossment
--------	---------	-----	---------	-----------------

2.1	(b) "Cumulative lifetime savings" means the total electric energy or natural gas savings
2.2	in a given year from energy conservation improvements installed that year or in previous
2.3	years that are still operational and providing savings in that year because the measures have
2.4	not reached the end of their useful lives.
2.5	(c) "Efficient electrification or conversion improvement" means a project that (1) results
2.6	in converting a customer from use of a fuel to the use of electric energy or natural gas sold
2.7	at retail by a utility subject to this section, resulting in a net increase of the use of electric
2.8	energy or natural gas and a net decrease in energy consumption overall on a fuel-neutral
2.9	basis, and (2) otherwise meets the criteria established in subdivision 7. An efficient
2.10	electrification improvement requires the installation of equipment that utilizes electric energy
2.11	or natural gas, resulting in a reduction or elimination of use of the previous fuel.
2.12	(d) "Electric utility infrastructure projects" means projects owned by a consumer-owned
2.13	utility that replace or modify existing electric utility infrastructure, including utility-owned
2.14	buildings, if the replacement or modification conserves energy or uses energy more
2.15	efficiently.
2.16	(e) "Energy conservation" means an action that results in a net reduction in electric
2.17	energy or natural gas consumption.
2.18	(f) "Energy conservation improvement" means a project that results in energy efficiency
2.19	or energy conservation. Energy conservation improvement may include waste heat that is
2.20	recovered and converted into electricity, but does not include electric utility infrastructure
2.21	projects approved by the commission under section 216B.1636. Energy conservation
2.22	improvement includes waste heat recovered and used as thermal energy.
2.23	(g) "Energy efficiency" means measures or programs, including energy conservation
2.24	measures or programs, that target consumer behavior, equipment, processes, or devices
2.25	designed to produce either an absolute decrease in consumption of electric energy or natural
2.26	gas or a decrease in consumption of electric energy or natural gas on a per unit of production
2.27	basis, without a reduction in the quality level of service provided to the energy consumer.
2.28	(h) "Fuel" means energy consumed by a retail utility customer. Fuel includes electricity,
2.29	propane, natural gas, heating oil, gasoline, or diesel fuel.
2.30	(i) "Fuel neutral" means an approach that compares the use of various fuels for a given
2.31	end use, using a common metric.
2.32	(j) "Gross annual retail energy sales" means the total annual sale of electric energy, as
2.33	determined by the percentage of renewable and hydroelectric sources compared to

	SF1915	REVISOR	RSI	S1915-1	1st Engrossment
3.1	nonrenewal	ble sources identified i	n the portfolio	of the utility's electric	ity provider, to all
3.2	retail custor	mers in a utility's or as	sociation's Min	nesota service territor	ry or, natural gas
3.3	throughput	to all retail customers,	including natu	ral gas transportation	customers, on a
3.4	utility's dist	tribution system in Min	nesota. Gross a	nnual retail energy sal	les does not include:
3.5	<u>(1) gas s</u>	sales to:			
3.6	<u>(i) a larg</u>	ge energy facility;			
3.7	<u>(ii) a lar</u>	ge customer facility w	hose natural ga	s utility has been exer	mpted by the
3.8	commission	ner under subdivision	3, with respect	to natural gas sales n	nade to the large
3.9	customer fa	cility; and			
3.10	<u>(iii) a co</u>	ommercial gas custome	er facility whose	e natural gas utility ha	s been exempted by
3.11	the commis	ssioner under subdivisi	on 13, with resp	pect to natural gas sal	es made to the
3.12	commercial	l gas customer facility;	-		
3.13	(2) elect	tric sales to a large cus	tomer facility v	hose electric utility h	as been exempted
3.14	by the com	missioner under subdiv	vision 13, with	respect to electric sale	es made to the large
3.15	facility; and	1			
3.16	(3) incre	eased electric or natura	l gas sales fron	n efficient electrificati	ion or conversion
3.17	caused by a	utility program.			
3.18	<u>(k)</u> "Lar	ge customer facility" m	eans all buildin	gs, structures, equipm	ent, and installations
3.19	at a single s	site that collectively (1)) impose a peak	electrical demand or	n an electric utility's
3.20	system of a	t least 20,000 kilowatt	s, measured in	he same way as the u	tility that serves the
3.21	customer fa	acility measures electri	c demand for b	illing purpose, or (2)	consume at least
3.22	500,000,00	0 cubic feet of natural	gas annually. W	/hen calculating peak	electrical demand,
3.23	a large cust	omer facility may incl	ude demand off	set by on-site cogene	ration facilities and,
3.24	if engaged i	n mineral extraction, m	ay aggregate pe	ak energy demand from	m the large customer
3.25	facility's mi	ining processing opera	tions.		
3.26	<u>(1)</u> "Larg	ge energy facility" has	the meaning gi	ven it in section 216E	B.2421, subdivision
3.27	<u>2, clause (1</u>	<u>).</u>			
3.28	<u>(m) "Lo</u>	ad management" mear	is an activity, se	rvice, or technology t	to change the timing
3.29	or the effici	ency of a customer's us	se of energy that	t allows a utility or a	customer to respond
3.30	to local and	regional energy system	n conditions, or	to reduce peak deman	d for electric energy
3.31	or natural g	as. Load management t	hat reduces over	call energy use is also e	energy conservation.
3.32	<u>(n)</u> "Lov	w-income programs" n	neans energy co	nservation improvem	ent programs that
3.33	directly ser	ve the needs of low-inc	come persons, i	ncluding low-income	renters and entities

	SF1915	REVISOR	RSI	S1915-1	1st Engrossment		
4.1	that serve low-i	ncome customers.	Programs that	aggregate resources f	or improvements to		
4.2				f appliances, heating a	•		
4.3	and other infras	structure, are consid	dered a direct	benefit.			
4.4	<u>(o) "Membe</u>	r" has the meaning	g given to it in	section 308B.005, sub	odivision 15.		
4.5	(p) "Qualify	ing utility" means	a utility that s	upplies energy to a cus	stomer that enables		
4.6	the customer to	qualify as a large	customer facil	ity.			
4.7	(q) "Source	energy" means the	total amount	of fuel required for a g	given purpose,		
4.8	considering ene	ergy losses in the p	roduction, trar	smission, and delivery	y of that energy.		
4.9	(r) "Waste h	eat recovered and u	used as therma	l energy" means captur	ring heat energy that		
4.10	would be exhau	sted or dissipated to	o the environm	ent from machinery, bu	ildings, or industrial		
4.11	processes, and	productively using	the recovered	thermal energy where	it is used to reduce		
4.12	demand-side co	onsumption of natu	ral gas, electri	c energy, or both.			
4.13	(s) "Waste h	eat recovery conve	erted into elect	ricity" means an energ	gy recovery process		
4.14	that converts of	that converts otherwise lost energy from the heat of exhaust stacks or pipes used for engines					
4.15	or manufacturin	ng or industrial pro	cesses, or the	reduction of high press	sure in water or gas		
4.16	pipelines.						
4.17	<u>Subd. 2.</u> Ap	plicability. This se	ection applies	to:			
4.18	<u>(1) a cooper</u>	ative electric assoc	ciation that pro	ovides retail service to	more than 5,000		
4.19	members;						
4.20	<u>(2)</u> a munici	pality that provides	s electric servi	ce to more than 1,000 r	retail customers; and		
4.21	(3) a munici	pality with more the	han 1,000,000	,000 cubic feet in annu	al throughput sales		
4.22	to natural gas re	etail customers.					
4.23	Subd. 3. Sav	v ings goal. (a) Eacl	n individual co	nsumer-owned utility s	ubject to this section		
4.24	has an annual e	nergy savings goal	equivalent to	1.5 percent of gross an	nnual retail energy		
4.25	sales.						
4.26	(b) A consu	mer-owned utility	s savings goal	is satisfied when the c	consumer-owned		
4.27	utility achieves	a savings equivale	ent of at least t	hree-quarters of one pe	ercent of the		
4.28	consumer-owne	ed utility's gross an	nual retail ene	ergy sales from energy	conservation		
4.29	improvements,	and up to three-qua	arters of one p	ercent from the follow	ing utility activities:		
4.30	<u>(1) energy s</u>	avings from additi	onal energy co	onservation improvement	ents;		
4.31	(2) electric	utility infrastructur	e projects;				

	SF1915	REVISOR	RSI	S1915-1	1st Engrossment			
5.1	(3) net en	ergy savings from eff	ficient electrif	ication and conversion	improvements that			
5.2	meet the criteria under subdivision 8; or							
5.3	(4) CIP so	olar rebates that meet	the criteria pr	ovided under subdivis	<u>ion 9.</u>			
5.4	<u>(c)</u> The en	nergy savings goals s	pecified must	be calculated based on	the most recent			
5.5	three-year, we	eather-normalized ave	rage. When de	termining compliance v	with this subdivision,			
5.6	a consumer-o	owned utility may ele	ct to average	annual energy savings	over a period not to			
5.7	exceed five y	ears, as specified in t	the plan filed	under subdivision 4. A	consumer-owned			
5.8	utility that us	ses annual plans may	carry forward	for up to five years an	y energy savings			
5.9	exceeding 1.	5 percent in a single y	/ear.					
5.10	(d) Nothi	ng in this subdivision	limits a utilit	y's ability to report and	l recognize savings			
5.11	in excess of t	hree-quarters of one	percent of the	utility's gross annual r	etail energy sales			
5.12	generated un	der paragraph (b), cla	uses (1), (2),	and (3), provided the u	tility has satisfied			
5.13	the three-qua	rters of one percent s	avings require	ed under paragraph (b)	÷			
5.14	<u>(e)</u> A con	sumer-owned utility	subject to this	section is not required	to make energy			
5.15	conservation	improvements that ar	e not cost-effe	ective, even if the impro	ovement is necessary			
5.16	to attain the e	energy savings goal.						
5.17	(f) A cons	sumer-owned utility m	nay request that	t the commissioner adj	ust its annual energy			
5.18	savings goal	based on its historica	l conservation	investment experienc	e, customer class			
5.19	makeup, load	growth, a conservation	on potential st	udy, impact on utility re	evenue that threatens			
5.20	necessary sys	stem investment, or ot	her factors the	commissioner and con	sumer-owned utility			
5.21	determines w	arrants an adjustmen	t. The commi	ssioner must adjust the	e savings goal to a			
5.22	level the com	missioner determines	s is supported	by the record.				
5.23	Subd. 4.	Consumer-owned ut	ility; energy	conservation and opt	imization plans. <u>(a)</u>			
5.24	By June 1, 20	021, each consumer-c	owned utility 1	nust file an energy cor	nservation and			
5.25	optimization	plan with the commis	ssioner. The p	lan must identify and o	outline the utility's			
5.26	intended con	servation improveme	nt program, e	fficient electrification of	or conversion			
5.27	improvement	t plans, load managen	nent plans, an	d other processes and	programs to achieve			
5.28	the energy sa	vings goal. The plan	may cover a p	period of time not to ex	ceed five years. For			
5.29	plans with a	duration greater than	one year, the o	consumer-owned utility	y's plan may include			
5.30	years where t	he consumer-owned	utility may no	t achieve the annual say	vings goal, provided			
5.31	the total saving	ngs at the end of the pl	lan meets, at a	minimum, the otherwi	se applicable annual			
5.32	savings goal	for the utility. Beginr	ning June 1, 20	022, and each June 1 th	nereafter, each			
5.33	consumer-ow	vned utility must file a	an annual upd	ate identifying the state	us of, including total			
5.34	expenditures	and investments mad	le to date, and	any intended changes	to its multiyear plan			

SF1915	REVISOR	RSI	S1915-1	1st Engrossment
--------	---------	-----	---------	-----------------

6.1	filed under this subdivision. For consumer-owned utilities whose plans were completed the
6.2	prior June 1, a summary of the plan's result must be filed. A summary for a completed plan's
6.3	result must also be filed. The summary for a completed plan must include: (1) the total
6.4	savings achieved under the plan; (2) a breakdown of total expenditures and investments
6.5	made; and (3) a brief discussion regarding where the utility achieved the greatest savings
6.6	and, if areas exist where savings were less than anticipated under the plan, where the shortage
6.7	occurred and what the suspected reason for the shortage is. For consumer-owned utilities
6.8	that fall short of the total applicable savings goal, the final report or update on that plan
6.9	must indicate where the actual savings differed from anticipated savings, any known reasons
6.10	for the shortfall, and any identified changes that utility will make in future plans filed under
6.11	this subdivision to reach the identified savings goal. A consumer-owned utility must file a
6.12	new plan under this paragraph by June 1 of the year following the completion of the
6.13	consumer-owned utility's most recently completed plan.
6.14	(b) Energy savings from electric utility infrastructure projects or waste heat recovery
6.15	converted into electricity projects that may count as energy savings may be included in a
6.16	plan submitted under paragraph (a). A consumer-owned electric facility's infrastructure
6.17	project must result in increased energy efficiency greater than would have occurred during
6.18	normal maintenance activities.
6.19	(c) Energy savings from thermal-to-electric efficient electrification or conversion
6.20	improvement programs must be stated in kilowatt-hours, using a conversion rate of 3,412
6.21	British thermal units to one kilowatt-hour.
6.22	(d) A consumer-owned utility must not spend or invest in energy conservation
6.23	improvements that directly benefit large energy facility or a large electric customer facility
6.24	the commissioner has issued an exemption to under subdivision 13.
6.25	(e) A generation and transmission cooperative electric association cooperative electric
6.26	association, a municipal power agency, or a comparable organization that provides energy
6.27	services to consumer-owned utilities may invest in energy conservation improvements on
6.28	behalf of the consumer-owned utilities it serves and may fulfill all aspects of the conservation,
6.29	reporting, and energy-saving goals for any of the consumer-owned utilities on an aggregate
6.30	basis.
6.31	Subd. 5. Low-income programs. (a) Each consumer-owned utility subject to this section
6.32	must provide low-income energy conservation programs. When approving spending and
6.33	energy-savings goals for low-income energy conservation programs, the consumer-owned
6.34	utility must consider historic spending and participation levels, energy savings for low-income

SF1915	REVISOR	RSI	S1915-1	1st Engrossment
--------	---------	-----	---------	-----------------

7.1 programs, and the number of low-income persons residing in the utility's service territory. A municipal utility that furnishes gas service must spend at least 0.2 percent off its most 7.2 7.3 recent three-year average gross operating revenue from residential customers in Minnesota on low-income programs. A consumer-owned utility that furnishes electric service must 7.4 spend at least 0.2 percent of its gross operating revenue from residential customers in 7.5 Minnesota on low-income programs. This requirement applies to each generation and 7.6 transmission cooperative association's members' aggregate gross operating revenue from 7.7 7.8 the sale of electricity to residential customers in Minnesota. (b) To meet the requirements of paragraph (a), a consumer-owned utility may contribute 7.9 money to the energy and conservation account in section 216B.241, subdivision 2a. An 7.10 energy conservation improvement plan must state the amount, if any, of low-income energy 7.11 conservation improvement funds the utility plans to contribute to the energy and conservation 7.12 account. Contributions must be remitted to the commissioner by February 1 each year. 7.13 (c) The commissioner must establish low-income programs to use money contributed 7.14 to the energy and conservation account under paragraph (b). When establishing low-income 7.15 programs, the commissioner must consult political subdivisions, utilities, and nonprofit and 7.16 7.17 community organizations, including organizations engaged in providing energy and weatherization assistance to low-income persons. Money contributed to the energy and 7.18 conservation account under paragraph (b) must provide programs for low-income persons, 7.19 including low-income renters, located in the service territory of the utility or association 7.20 providing the money. The commissioner must record and report expenditures and energy 7.21 savings achieved as a result of low-income programs funded through the energy and 7.22 conservation account in the report required under section 216B.241, subdivision 1c, paragraph 7.23 (g). The commissioner may contract with a political subdivision, nonprofit or community 7.24 organization, public utility, municipality, or cooperative electric association to implement 7.25 low-income programs funded through the energy and conservation account. 7.26 (d) A consumer-owned utility may petition the commissioner to modify its required 7.27 spending under this subdivision if the utility and the commissioner were unable to expend 7.28 7.29 the amount required for three consecutive years. Subd. 6. Recovery of expenses. The commission must allow a cooperative electric 7.30 association subject to rate regulation under section 216B.026 to recover expenses resulting 7.31 from (1) a plan under this subdivision, and (2) assessments and contributions to the energy 7.32

and conservation account under section 216B.241, subdivision 2a.

8.1	Subd. 7. Ownership of energy conservation improvement. An energy conservation
8.2	improvement to or installed in a building under this section, except systems owned by the
8.3	consumer-owned utility and designed to turn off, limit, or vary the delivery of energy, is
8.4	the exclusive property of the building owner, except to the extent that the improvement is
8.5	subject to a security interest in favor of the utility in case of a loan to the building owner.
8.6	The utility has no liability for loss, damage, or injury caused directly or indirectly by an
8.7	energy conservation improvement, except for negligence by the utility in purchase,
8.8	installation, or modification of the product.
8.9	Subd. 8. Criteria for efficient electrification or conversion improvements and load
8.10	management. (a) Each consumer-owned utility subject to this section may form a technical
8.11	consumer-owned utility working group to define and establish proposed programs for
8.12	efficient electrification or conversion improvements and load management. A proposed
8.13	program may be included in an energy conservation and optimization plan filed by the
8.14	consumer-owned utility under subdivision 4. The technical consumer-owned utility working
8.15	group may approve a proposed program for efficient electrification or conversion
8.16	improvements if it finds the investment is cost-effective after considering the costs and
8.17	benefits of the proposed investment to rate payers, the utility, participants, and society.
8.18	(b) The commission may permit a consumer-owned utility subject to rate regulation to
8.19	file rate schedules providing for annual recovery of the costs of (1) efficient electrification
8.20	or conversion improvement programs, and (2) cost-effective load management approved
8.21	by the technical consumer-owned utility working group under subdivision 6, including
8.22	reasonable and prudent costs associated with promoting and implementing a program
8.23	approved under this subdivision.
8.24	(c) An efficient electrification or conversion improvement is deemed efficient if the
8.25	technical consumer-owned utility working group finds the improvement, relative to the fuel
8.26	that is being displaced:
8.27	(1) results in a net reduction in the cost and amount of source energy consumed for a
8.28	particular use, measured on a fuel-neutral basis;
8.29	(2) results in a net reduction of statewide greenhouse gas emissions, as defined in section
8.30	216H.01, subdivision 2, over the lifetime of the improvement. For an efficient electrification
8.31	or conversion improvement installed by an electric utility, the reduction in emissions must
8.32	be measured based on the emissions profile of the utility or the utility's wholesale provider
8.33	over the life of the improvement. Where applicable, the emissions profile used must be the
8.34	most recent resource plan accepted by the commission under section 216B.2422;

	SF1915	REVISOR	RSI	S1915-1	1st Engrossment
9.1	(3) is cost	t-effective from a so	cietal perspectiv	ve, considering the co	sts associated with
9.2	<u> </u>	used in the past and			
9.3	(4) is plar	ned to be installed a	nd operated in a	manner that does not	t unduly increase the

9.10	customer's pi			photovoluie equipin	
					1 1.1
9.11	<u> </u>			stem annual energy p	
9.12		*	•	t of the customer's or	
9.13				e intervals, measured	
9.14				of the average monthl	
9.15				as either: (1) less than	12 calendar months
9.16	of actual elec	etric usage; or (2) no	demand meteri	ng available.	
9.17	Subd. 10.	Manner of filing an	nd service. (a) A	A consumer-owned ut	ility must submit the
9.18	filings requir	ed by this section to	the department	using the department	's electronic filing
9.19	system. The	commissioner may e	xempt a consur	ner-owned utility from	n this requirement if
9.20	the utility is	unable to submit filir	ngs using the de	partment's electronic	filing system. All
9.21	other interest	ed parties must submi	t filings to the d	epartment using the de	partment's electronic
9.22	filing system	whenever practicab	le, but may also	file by personal deliv	very or by mail.
9.23	<u>(b)</u> The su	ubmission of a docum	nent to the depar	tment's electronic filir	ng system constitutes
9.24	service on th	e department. If a de	partment rule r	equires service of a no	otice, order, or other
9.25	document by	the department, util	ity, or interested	l party upon persons	on a service list
9.26	maintained b	y the department, ser	vice may be ma	de by personal deliver	y, mail, or electronic
9.27	service, exce	pt that electronic ser	vice may only l	be made to persons or	the service list that
9.28	have previou	sly agreed in writing	to accept elect	ronic service at an ele	ectronic address
9.29	provided to t	he department for ele	ectronic service	purposes.	
9.30	Subd. 11.	Assessment. (a) Th	e commission c	or department may ass	sess utilities subject
9.31	to this section	n to carry out the purp	poses of section	216B.241, subdivisio	n 1d. An assessment
9.32	under this par	ragraph must be prop	ortionate to the	utility's respective gro	ss operating revenue
9.33	from sales of	gas or electric servi	ce in Minnesota	a during the previous	calendar year.

(b) The commission or department may annually assess a utility subject to this section
 to carry out the purposes of section 216B.241, subdivisions 1e and 1f, upon notice from the
 utility of its desire to continue the assessment. An assessment under this paragraph must be
 proportionate to the utility's respective gross revenue from sales of gas or electric service
 in Minnesota during the previous calendar year. Assessments under this paragraph are not
 subject to the cap on assessments provided by section 216B.62, or any other law.

10.7 Subd. 12. Waste heat recovery; thermal energy distribution. Subject to department
approval, demand-side natural gas or electric energy displaced by use of waste heat recovered
and used as thermal energy, including the recovered thermal energy from a cogeneration
or combined heat and power facility, is eligible to be counted toward a consumer-owned
utility's natural gas or electric savings goals.

Subd. 13. Large customer facilities. (a) The owner of a large customer facility may 10.12 10.13 petition the commissioner to exempt municipal electric utilities, municipal gas utilities, and cooperative electric associations serving the large customer facility from the investment 10.14 and expenditure requirements of the municipal electric utility, municipal gas utility, or 10.15 cooperative electric association's plan under this section with respect to retail revenues 10.16 attributable to the large customer facility. The filing must include a discussion of the 10.17 competitive or economic pressures facing the owner of the facility and the efforts taken to 10.18 10.19 identify, evaluate, and implement energy conservation and efficiency improvements. A filing submitted on or before October 1 of any year must be approved within 90 days and 10.20 becomes effective January 1 of the year following the filing, unless the commissioner finds 10.21 the owner of the large customer facility has failed to take reasonable measures to identify, 10.22 10.23 evaluate, and implement energy conservation and efficiency improvements. If a facility qualifies as a large customer facility solely due to its peak electrical demand or annual 10.24 natural gas usage, the exemption may be limited to the qualifying utility if the commissioner 10.25 finds that the owner of the large customer facility has failed to take reasonable measures to 10.26 identify, evaluate, and implement energy conservation and efficiency improvements with 10.27 respect to the nonqualifying utility. Once an exemption is approved, the commissioner may 10.28 10.29 request the owner of a large customer facility to submit a report demonstrating the large customer facility's ongoing commitment to energy conservation and efficiency improvement 10.30 after the exemption filing. The commissioner may request a report under this paragraph not 10.31 more than once every five years for up to ten years after the effective date of the exemption. 10.32 If the majority ownership of the large customer facility changes, the commissioner may 10.33 request additional reports for up to ten years after the change in ownership occurs. The 10.34 commissioner may, within 180 days of receiving a report submitted under this paragraph, 10.35

rescind any exemption granted under this paragraph upon a determination that the large 11.1 customer facility is not continuing to make reasonable efforts to identify, evaluate, and 11.2 11.3 implement energy conservation improvements. A large customer facility that is exempt from the investment and expenditure requirements of this section under an order from the 11.4 commissioner as of December 31, 2010, is not required to submit a report to retain its exempt 11.5 status, except as otherwise provided in this paragraph with respect to ownership changes. 11.6 An exempt large customer facility is prohibited from participating in a municipal electric, 11.7 11.8 municipal gas, or cooperative electric association utility's conservation improvement program unless the owner of the facility files with the commissioner to withdraw its exemption. 11.9 (b) A commercial gas customer that is not a large customer facility and that purchases 11.10 or acquires natural gas from a municipal gas utility may petition the commissioner to exempt 11.11 the commercial gas customer from the municipal gas customer from the municipal gas 11.12 utility's plan under this section with respect to gas sales attributable to the commercial gas 11.13 customer. The petition must be supported by evidence demonstrating that the commercial 11.14 gas customer has acquired or can reasonably acquire the capability to bypass use of the 11.15 municipal utility's gas distribution system by obtaining natural gas directly from a supplier 11.16 other than the municipal gas utility. The commissioner must grant the exemption if the 11.17 commissioner finds the petitioner has made the demonstration required by this paragraph. 11.18 11.19 (c) A municipal electric utility, municipal gas utility, cooperative electric association, or the owner of a large customer facility may appeal the commissioner's decision under 11.20 paragraph (a) or (b) to the commissioner under subdivision 2. When reviewing a decision 11.21 of the commissioner under paragraph (a) or (b), the commission must rescind the decision 11.22 if it finds the decision is not in the public's interest. 11.23 (d) A municipal electric utility, municipal gas utility, or cooperative electric association 11.24 is prohibited from spending for or investing in energy conservation improvements that 11.25 directly benefit a large facility or a large electric customer facility that the commissioner 11.26 11.27 has issued an exemption for under this section. **ARTICLE 3** 11.28 **PUBLIC UTILITIES** 11.29 Section 1. Minnesota Statutes 2018, section 216B.241, subdivision 1c, is amended to read: 11.30 11.31 Subd. 1c. Public utility; energy-saving goals. (a) The commissioner shall establish energy-saving goals for energy conservation improvement expenditures and shall evaluate 11.32

an energy conservation improvement program on how well it meets the goals set.

(b) Each individual public utility and association shall have an annual energy-savings 12.1 goal equivalent to 1.5 percent of gross annual retail energy sales unless modified by the 12.2 commissioner under paragraph (d). The savings goals must be calculated based on the most 12.3 recent three-year weather-normalized average. A public utility or association may elect to 12.4 carry forward energy savings in excess of 1.5 percent for a year to the succeeding three 12.5 calendar years, except that savings from electric utility infrastructure projects allowed under 12.6 paragraph (d) (c) may be carried forward for five years. A particular energy savings can be 12.7 12.8 used only for one year's goal.

(c) The commissioner must adopt a filing schedule that is designed to have all utilities
 and associations operating under an energy-savings plan by calendar year 2010.

(d) (c) In its energy conservation improvement plan filing, a <u>public</u> utility or association
may request the commissioner to adjust its annual energy-savings percentage goal based
on its historical conservation investment experience, customer class makeup, load growth,
a conservation potential study, or other factors the commissioner determines warrants an
adjustment. The commissioner may not approve a plan of a public utility that provides for
an annual energy-savings goal of less than one percent of gross annual retail energy sales
from energy conservation improvements.

A public utility or association may include in its energy conservation plan energy savings 12.18 from electric utility infrastructure projects approved by the commission under section 12.19 216B.1636 or waste heat recovery converted into electricity projects that may count as 12.20 energy savings in addition to a minimum energy-savings goal of at least one percent for 12.21 energy conservation improvements. Energy savings from electric utility infrastructure 12.22 projects, as defined in section 216B.1636, may be included in the energy conservation plan 12.23 of a municipal utility or cooperative electric association. Electric utility infrastructure projects 12.24 must result in increased energy efficiency greater than that which would have occurred 12.25 through normal maintenance activity. 12.26

(c) An (d) A public utility's energy-savings goal is not satisfied by attaining the revenue
 expenditure requirements of subdivisions 1a and 1b, but can only be satisfied by meeting
 the energy-savings goal established in this subdivision.

(f) An association or (e) A public utility is not required to make energy conservation
investments to attain the energy-savings goals of this subdivision that are not cost-effective
even if the investment is necessary to attain the energy-savings goals. For the purpose of
this paragraph, in determining cost-effectiveness, the commissioner shall consider the costs
and benefits to ratepayers, the utility, participants, and society. In addition, the commissioner

shall consider the rate at which an association or municipal utility is increasing its energy
savings and its expenditures on energy conservation.

(g) (f) On an annual basis, the commissioner shall produce and make publicly available
a report on the annual energy savings and estimated carbon dioxide reductions achieved by
the energy conservation improvement programs for the two most recent years for which
data is available. The commissioner shall report on program performance both in the
aggregate and for each entity filing an energy conservation improvement plan for approval
or review by the commissioner.

(h) By January 15, 2010, the commissioner shall report to the legislature whether the
 spending requirements under subdivisions 1a and 1b are necessary to achieve the
 energy-savings goals established in this subdivision.

13.12 (i) This subdivision does not apply to:

13.17

13.13 (1) a cooperative electric association with fewer than 5,000 members;

13.14 (2) a municipal utility with fewer than 1,000 retail electric customers; or

13.15 (3) a municipal utility with less than 1,000,000 cubic feet in annual throughput sales
13.16 to retail natural gas customers.

Sec. 2. Minnesota Statutes 2018, section 216B.241, subdivision 1d, is amended to read:

Subd. 1d. Technical assistance. (a) The commissioner shall evaluate energy conservation 13.18 improvement programs under this section and section 216B.2402 on the basis of 13.19 cost-effectiveness and the reliability of the technologies employed. The commissioner shall, 13.20 by order, establish, maintain, and update energy-savings assumptions that must be used 13.21 when filing energy conservation improvement programs. The commissioner shall establish 13.22 an inventory of the most effective energy conservation programs, techniques, and 13.23 technologies, and encourage all Minnesota utilities to implement them, where appropriate, 13.24 in their service territories. The commissioner shall describe these programs in sufficient 13.25 detail to provide a utility reasonable guidance concerning implementation. The commissioner 13.26 shall prioritize the opportunities in order of potential energy savings and in order of 13.27 cost-effectiveness. The commissioner may contract with a third party to carry out any of 13.28 the commissioner's duties under this subdivision, and to obtain technical assistance to 13.29 evaluate the effectiveness of any conservation improvement program. The commissioner 13.30 13.31 may assess up to \$850,000 annually for the purposes of this subdivision. The assessments must be deposited in the state treasury and credited to the energy and conservation account 13.32

14.1 created under subdivision 2a. An assessment made under this subdivision is not subject to
14.2 the cap on assessments provided by section 216B.62, or any other law.

(b) Of the assessment authorized under paragraph (a), the commissioner may expend
up to \$400,000 annually for the purpose of developing, operating, maintaining, and providing
technical support for a uniform electronic data reporting and tracking system available to
all utilities subject to this section, in order to enable accurate measurement of the cost and
energy savings of the energy conservation improvements required by this section. This
paragraph expires June 30, 2018.

14.9 Sec. 3. Minnesota Statutes 2018, section 216B.241, subdivision 2, is amended to read:

Subd. 2. Programs. (a) The commissioner may require public utilities to make 14.10 14.11 investments and expenditures in energy conservation improvements, explicitly setting forth the interest rates, prices, and terms under which the improvements must be offered to the 14.12 customers. The required programs must cover no more than a three-year period. Public 14.13 utilities shall file conservation improvement plans by June 1, on a schedule determined by 14.14 order of the commissioner, but at least every three years. Plans received by a public utility 14.15 14.16 by June 1 must be approved or approved as modified by the commissioner by December 1 of that same year. The commissioner shall evaluate the program on the basis of 14.17 cost-effectiveness and the reliability of technologies employed. The commissioner's order 14.18 14.19 must provide to the extent practicable for a free choice, by consumers participating in the program, of the device, method, material, or project constituting the energy conservation 14.20 improvement and for a free choice of the seller, installer, or contractor of the energy 14.21 conservation improvement, provided that the device, method, material, or project seller, 14.22 installer, or contractor is duly licensed, certified, approved, or qualified, including under 14.23 the residential conservation services program, where applicable. 14.24

(b) The commissioner may require a utility subject to subdivision 1c to make an energy
conservation improvement investment or expenditure whenever the commissioner finds
that the improvement will result in energy savings at a total cost to the utility less than the
cost to the utility to produce or purchase an equivalent amount of new supply of energy.
The commissioner shall nevertheless ensure that every public utility operate one or more
programs under periodic review by the department.

(c) Each public utility subject to subdivision 1a may spend and invest annually up to ten
percent of the total amount required to be spent and invested on energy conservation
improvements under this section by the utility on research and development projects that

meet the definition of energy conservation improvement in subdivision 1 and that are fundeddirectly by the public utility.

(d) A public utility may not spend for or invest in energy conservation improvements
that directly benefit a large energy facility or a large electric customer facility for which the
commissioner has issued an exemption pursuant to subdivision 1a, paragraph (b). The
commissioner shall consider and may require a <u>public</u> utility to undertake a program
suggested by an outside source, including a political subdivision, a nonprofit corporation,
or community organization.

(e) A utility, a political subdivision, or a nonprofit or community organization that has 15.9 15.10 suggested a program, the attorney general acting on behalf of consumers and small business interests, or a utility customer that has suggested a program and is not represented by the 15.11 attorney general under section 8.33 may petition the commission to modify or revoke a 15.12 department decision under this section, and the commission may do so if it determines that 15.13 the program is not cost-effective, does not adequately address the residential conservation 15.14 improvement needs of low-income persons, has a long-range negative effect on one or more 15.15 classes of customers, or is otherwise not in the public interest. The commission shall reject 15.16 a petition that, on its face, fails to make a reasonable argument that a program is not in the 15.17 public interest. 15.18

(f) The commissioner may order a public utility to include, with the filing of the utility's 15.19 annual status report, the results of an independent audit of the utility's conservation 15.20 improvement programs and expenditures performed by the department or an auditor with 15.21 experience in the provision of energy conservation and energy efficiency services approved 15.22 by the commissioner and chosen by the utility. The audit must specify the energy savings 15.23 or increased efficiency in the use of energy within the service territory of the utility that is 15.24 the result of the spending and investments. The audit must evaluate the cost-effectiveness 15.25 of the utility's conservation programs. 15.26

(g) A gas utility may not spend for or invest in energy conservation improvements that
directly benefit a large customer facility or commercial gas customer facility for which the
commissioner has issued an exemption pursuant to subdivision 1a, paragraph (b), (c), or
(e). The commissioner shall consider and may require a utility to undertake a program
suggested by an outside source, including a political subdivision, a nonprofit corporation,
or a community organization.

16.1 Sec. 4. Minnesota Statutes 2018, section 216B.241, subdivision 2b, is amended to read:

Subd. 2b. Recovery of expenses. The commission shall allow a public utility to recover 16.2 expenses resulting from a conservation improvement program required by the department 16.3 and contributions and assessments to the energy and conservation account, unless the 16.4 recovery would be inconsistent with a financial incentive proposal approved by the 16.5 commission. The commission shall allow a cooperative electric association subject to rate 16.6 regulation under section 216B.026, to recover expenses resulting from energy conservation 16.7 16.8 improvement programs, load management programs, and assessments and contributions to the energy and conservation account unless the recovery would be inconsistent with a 16.9 financial incentive proposal approved by the commission. In addition, a public utility may 16.10 file annually, or the Public Utilities Commission may require the utility to file, and the 16.11 commission may approve, rate schedules containing provisions for the automatic adjustment 16.12 of charges for utility service in direct relation to changes in the expenses of the utility for 16.13 real and personal property taxes, fees, and permits, the amounts of which the utility cannot 16.14 control. A public utility is eligible to file for adjustment for real and personal property taxes, 16.15 fees, and permits under this subdivision only if, in the year previous to the year in which it 16.16 files for adjustment, it has spent or invested at least 1.75 percent of its gross revenues from 16.17 provision of electric service, excluding gross operating revenues from electric service 16.18 provided in the state to large electric customer facilities for which the commissioner has 16.19 issued an exemption under subdivision 1a, paragraph (b), and 0.6 percent of its gross revenues 16.20 from provision of gas service, excluding gross operating revenues from gas services provided 16.21 in the state to large electric customer facilities for which the commissioner has issued an 16.22 exemption under subdivision 1a, paragraph (b), for that year for energy conservation 16.23 improvements under this section. 16.24

Sec. 5. Minnesota Statutes 2018, section 216B.241, subdivision 7, is amended to read: 16.25 16.26 Subd. 7. Low-income programs. (a) The commissioner shall ensure that each public utility and association subject to subdivision 1c provides low-income programs. When 16.27 approving spending and energy-savings goals for low-income programs, the commissioner 16.28 shall consider historic spending and participation levels, energy savings for low-income 16.29 programs, and the number of low-income persons residing in the utility's service territory. 16.30 16.31 A municipal utility that furnishes gas service must spend at least 0.2 percent, and a public utility furnishing gas service must spend at least 0.4 percent, of its most recent three-year 16.32 average gross operating revenue from residential customers in the state on low-income 16.33 programs. A utility or association that furnishes electric service must spend at least 0.1 16.34 percent of its gross operating revenue from residential customers in the state on low-income 16.35

programs. For a generation and transmission cooperative association, this requirement shall
apply to each association's members' aggregate gross operating revenue from sale of
electricity to residential customers in the state. Beginning in 2010, A public utility or
association that furnishes electric service must spend 0.2 percent of its gross operating
revenue from residential customers in the state on low-income programs.

(b) To meet the requirements of paragraph (a), a <u>public utility or association</u> may
contribute money to the energy and conservation account. An energy conservation
improvement plan must state the amount, if any, of low-income energy conservation
improvement funds the <u>public utility or association</u> will contribute to the energy and
conservation account. Contributions must be remitted to the commissioner by February 1
of each year.

(c) The commissioner shall establish low-income programs to utilize money contributed 17.12 to the energy and conservation account under paragraph (b). In establishing low-income 17.13 programs, the commissioner shall consult political subdivisions, utilities, and nonprofit and 17.14 community organizations, especially organizations engaged in providing energy and 17.15 weatherization assistance to low-income persons. Money contributed to the energy and 17.16 conservation account under paragraph (b) must provide programs for low-income persons, 17.17 including low-income renters, in the service territory of the public utility or association 17.18 providing the money. The commissioner shall record and report expenditures and energy 17.19 savings achieved as a result of low-income programs funded through the energy and 17.20 conservation account in the report required under subdivision 1c, paragraph (g). The 17.21 commissioner may contract with a political subdivision, nonprofit or community organization, 17.22 public utility, municipality, or cooperative electric association to implement low-income 17.23 17.24 programs funded through the energy and conservation account.

(d) A <u>public</u> utility or association may petition the commissioner to modify its required
spending under paragraph (a) if the utility or association and the commissioner have been
unable to expend the amount required under paragraph (a) for three consecutive years.

(e) The costs and benefits associated with any approved low-income gas or electric
conservation improvement program that is not cost-effective when considering the costs
and benefits to the utility may, at the discretion of the utility, be excluded from the calculation
of net economic benefits for purposes of calculating the financial incentive to the utility.
The energy and demand savings may, at the discretion of the utility, be applied toward the
calculation of overall portfolio energy and demand savings for purposes of determining
progress toward annual goals and in the financial incentive mechanism.

18.1			ARTICLE	4	
18.2			REPEALE	R	
18.3	Section 1.	REPEALER.			
184	Minnesota Statutes 2018, section 216B.241, subdivision 1b, is repealed.				

216B.241 ENERGY CONSERVATION IMPROVEMENT.

Subd. 1b. **Conservation improvement by cooperative association or municipality.** (a) This subdivision applies to:

(1) a cooperative electric association that provides retail service to its members;

(2) a municipality that provides electric service to retail customers; and

(3) a municipality with more than 1,000,000,000 cubic feet in annual throughput sales to natural gas to retail customers.

(b) Each cooperative electric association and municipality subject to this subdivision shall spend and invest for energy conservation improvements under this subdivision the following amounts:

(1) for a municipality, 0.5 percent of its gross operating revenues from the sale of gas and 1.5 percent of its gross operating revenues from the sale of electricity, excluding gross operating revenues from electric and gas service provided in the state to large electric customer facilities; and

(2) for a cooperative electric association, 1.5 percent of its gross operating revenues from service provided in the state, excluding gross operating revenues from service provided in the state to large electric customer facilities indirectly through a distribution cooperative electric association.

(c) Each municipality and cooperative electric association subject to this subdivision shall identify and implement energy conservation improvement spending and investments that are appropriate for the municipality or association, except that a municipality or association may not spend or invest for energy conservation improvements that directly benefit a large energy facility or a large electric customer facility for which the commissioner has issued an exemption under subdivision 1a, paragraph (b).

(d) Each municipality and cooperative electric association subject to this subdivision may spend and invest annually up to ten percent of the total amount required to be spent and invested on energy conservation improvements under this subdivision on research and development projects that meet the definition of energy conservation improvement in subdivision 1 and that are funded directly by the municipality or cooperative electric association.

(e) Load-management activities may be used to meet 50 percent of the conservation investment and spending requirements of this subdivision.

(f) A generation and transmission cooperative electric association that provides energy services to cooperative electric associations that provide electric service at retail to consumers may invest in energy conservation improvements on behalf of the associations it serves and may fulfill the conservation, spending, reporting, and energy-savings goals on an aggregate basis. A municipal power agency or other not-for-profit entity that provides energy service to municipal utilities that provide electric service at retail may invest in energy conservation improvements on behalf of the municipal utilities it serves and may fulfill the conservation, spending, reporting, and energy-savings goals on an aggregate basis, under an agreement between the municipal power agency or not-for-profit entity for funding the investments.

(g) Each municipality or cooperative shall file energy conservation improvement plans by June 1 on a schedule determined by order of the commissioner, but at least every three years. Plans received by June 1 must be approved or approved as modified by the commissioner by December 1 of the same year. The municipality or cooperative shall provide an evaluation to the commissioner detailing its energy conservation improvement spending and investments for the previous period. The evaluation must briefly describe each conservation program and must specify the energy savings or increased efficiency in the use of energy within the service territory of the utility or association that is the result of the spending and investments. The evaluation must analyze the cost-effectiveness of the utility's or association's conservation programs, using a list of baseline energy and capacity savings assumptions developed in consultation with the department. The commissioner shall review each evaluation and make recommendations, where appropriate, to the municipality or association to increase the effectiveness of conservation improvement activities.

(h) MS 2010 [Expired, 1Sp2003 c 11 art 3 s 4; 2007 c 136 art 2 s 5]

(i) The commissioner shall consider and may require a utility, association, or other entity providing energy efficiency and conservation services under this section to undertake a program suggested by an outside source, including a political subdivision, nonprofit corporation, or community organization.
