S0227-1

SENATE STATE OF MINNESOTA NINETY-SECOND SESSION

S.F. No. 227

DATE	D-PG	OFFICIAL STATUS
01/21/2021	130	Introduction and first reading
		Referred to Energy and Utilities Finance and Policy
02/15/2021		Comm report: To pass as amended
		Second reading

RSI

1.1	A bill for an act
1.2 1.3 1.4 1.5 1.6	relating to energy; establishing the Energy Conservation and Optimization Act of 2021; amending Minnesota Statutes 2020, sections 216B.2401; 216B.241, subdivisions 1a, 1c, 1d, 1f, 1g, 2, 2b, 3, 5, 7, 8, by adding subdivisions; proposing coding for new law in Minnesota Statutes, chapter 216B; repealing Minnesota Statutes 2020, section 216B.241, subdivisions 1, 1b, 2c, 4, 10.
1.7	BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF MINNESOTA:
1.8	Section 1. TITLE.
1.9	Sections 2 to 18 may be cited as the "Energy Conservation and Optimization Act of
1.10	<u>2021."</u>
1.11	EFFECTIVE DATE. This section is effective the day following final enactment.
1.12	Sec. 2. Minnesota Statutes 2020, section 216B.2401, is amended to read:
1.13	216B.2401 ENERGY SAVINGS <u>AND OPTIMIZATION POLICY GOAL</u> .
1.14	(a) The legislature finds that energy savings are an energy resource, and that cost-effective
1.15	energy savings are preferred over all other energy resources. In addition, the legislature
1.16	finds that optimizing the timing and method used by energy consumers to manage energy
1.17	use provides significant benefits to the consumers and to the utility system as a whole. The
1.18	legislature further finds that cost-effective energy savings and load management programs
1.19	should be procured systematically and aggressively in order to reduce utility costs for
1.20	businesses and residents, improve the competitiveness and profitability of businesses, create
1.21	more energy-related jobs, reduce the economic burden of fuel imports, and reduce pollution
1.22	and emissions that cause climate change. Therefore, it is the energy policy of the state of
1.23	Minnesota to achieve annual energy savings equal to at least 1.5 percent of annual retail

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

2.1	energy sales of electricity and natural gas through cost-effective energy conservation
2.2	improvement programs and rate design, energy efficiency achieved by energy consumers
2.3	without direct utility involvement, energy codes and appliance standards, programs designed
2.4	to transform the market or change consumer behavior, energy savings resulting from
2.5	efficiency improvements to the utility infrastructure and system, and other efforts to promote
2.6	energy efficiency and energy conservation. multiple measures, including but not limited to:
2.7	(1) cost-effective energy conservation improvement programs and efficient fuel-switching
2.8	utility programs under sections 216B.2402 to 216B.241;
2.9	(2) rate design;
2.10	(3) energy efficiency achieved by energy consumers without direct utility involvement;
2.11	(4) advancements in statewide energy codes and cost-effective appliance and equipment
2.12	standards;
2.13	(5) programs designed to transform the market or change consumer behavior;
2.14	(6) energy savings resulting from efficiency improvements to the utility infrastructure
2.15	and system; and
2.16	(7) other efforts to promote energy efficiency and energy conservation.
2.17	(b) A utility is encouraged to design and offer to its customers load management programs
2.18	that enable: (1) customers to maximize the economic value gained from the energy purchased
2.19	from the customer's utility service provider; and (2) utilities to optimize the infrastructure
2.20	and generation capacity needed to effectively serve customers and facilitate the integration
2.21	of renewable energy into the energy system.
2.22	(c) The commissioner must provide a reasonable estimate of progress made toward the
2.23	statewide energy-savings goal under paragraph (a) in the annual report required under section
2.24	216B.241, subdivision 1c, and make recommendations for administrative or legislative
2.25	initiatives to increase energy savings toward that goal. The commissioner must also annually
2.26	report on the energy productivity of the state's economy by estimating the ratio of economic
2.27	output produced in the most recently completed calendar year to the primary energy inputs
2.28	used in that year.
2.29	EFFECTIVE DATE. This section is effective the day following final enactment.
2.30	Sec. 3. [216B.2402] DEFINITIONS.
2.31	Subdivision 1. Definitions. For the purposes of section 216B.16, subdivision 6b, and

2.32 sections 216B.2401 to 216B.241, the following terms have the meanings given them.

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
3.1	Subd. 2.	Consumer-owned u	tility. <u>"</u> Consume	er-owned utility" mea	ans a municipal gas
3.2	utility, a mu	nicipal electric utility	, or a cooperativ	e electric association	<u>l.</u>
3.3	Subd. 3.	Cumulative lifetime	e savings. "Cum	ulative lifetime savin	gs" means the total
3.4	electric energ	gy or natural gas savin	gs in a given yea	r from energy conserv	vation improvements
3.5	installed in t	hat given year and en	ergy conservation	on improvements ins	talled in previous
3.6	years that are	e still in operation.			
3.7	<u>Subd. 4.</u>	Efficient fuel-switchi	ng improvemen	nt. "Efficient fuel-swit	ching improvement"
3.8	means a proj	ect that:			
3.9	<u>(1)</u> replac	ces a fuel used by a c	ustomer with ele	ectricity or natural ga	s delivered at retail
3.10	by a utility s	ubject to section 216	B.2403 or 216B	.241;	
3.11	(2) result	s in a net increase in	the use of electr	icity or natural gas a	nd a net decrease in
3.12	source energ	y consumption on a f	fuel-neutral basi	<u>s;</u>	
3.13	(3) other	wise meets the criteri	a established for	r consumer-owned ut	ilities in section
3.14	216B.2403,	subdivision 8, and fo	r public utilities	under section 216B.	241, subdivision 11;
3.15	and				
3.16	<u>(4)</u> requir	res the installation of	equipment that u	utilizes electricity or n	natural gas, resulting
3.17	in a reductio	n or elimination of th	e previous fuel	used.	
3.18	An efficient	fuel-switching impro	ovement is not a	n energy conservation	n improvement or
3.19	energy effici	ency even if it result	s in a net reducti	on in electricity or n	atural gas use. An
3.20	efficient fuel	l-switching improven	nent does not ind	clude, and shall not c	ount toward any
3.21	energy savin	gs goal from energy	conservation im	provements required	under this section,
3.22	when fuel sv	vitching would result	in an increase c	f greenhouse gas em	issions into the
3.23	atmosphere of	on an annual basis. A	consumer-owne	ed utility or public ut	ility filing an energy
3.24	conservation	and optimization pla	an that includes	an efficient fuel-swit	ching program to
3.25	achieve the u	utility's energy saving	gs goal must, as	part of the filing, der	nonstrate by a
3.26	comparison (of greenhouse gas en	nissions betweer	the fuels, that the ca	urbon intensity of an
3.27	equivalent a	mount of energy, usin	g a full fuel-cyc	le energy analysis me	ets the requirements
3.28	of this subdi	vision.			
3.29	Subd. 5.	Energy conservation	n. "Energy cons	ervation" means an a	ction that results in
3.30	a net reducti	on in electricity or na	tural gas consur	nption. Energy conse	ervation does not
3.31	include an et	fficient fuel-switching	g improvement.		
3.32	Subd. 6.	Energy conservation	n improvement	. "Energy conservation	on improvement"
3.33	<u>means a proj</u>	ect that results in ener	gy efficiency or	energy conservation.	Energy conservation

56227	KE VISOK	KSI	30227-1	1st Engrossment
mprovement	t may include waste	heat that is recov	vered and converted into	o electricity or used
as thermal en	ergy, but does not i	nclude electric u	tility infrastructure pro	jects approved by
he commissi	ion under section 21	6B.1636.		
Subd. 7. I	Energy efficiency. "	Energy efficienc	y" means measures or p	programs, including
energy conse	rvation measures or	programs, that	(1) target consumer be	havior, equipment,
processes, or	devices, (2) are des	igned to produc	e a decrease in consum	ption of electricity
or natural gas	s on either an absolu	ite or per unit of	production basis, and	(3) do not reduce
he quality or	e level of service pro	ovided to the end	ergy consumer.	
<u>Subd. 8.</u>	Fuel. "Fuel" means	energy, includin	g electricity, propane, 1	natural gas, heating
oil, gasoline,	diesel fuel, or stear	n, consumed by	a retail utility custome	<u>r.</u>
<u>Subd. 9.</u> I	Fuel neutral. "Fuel 1	neutral" means ar	approach that compare	es the use of various
fuels for a giv	ven end use, using a	a common metri	<u>.</u>	
Subd. 10.	Gross annual reta	il energy sales.	"Gross annual retail er	nergy sales" means
a utility's ann	ual electric sales to	all Minnesota r	etail customers, or natu	ral gas throughput
to all retail cu	ustomers, including	natural gas tran	sportation customers, o	on a utility's
distribution s	ystem in Minnesota	. Gross annual r	etail energy sales does	not include:
<u>(1) gas sa</u>	les to:			
(i) a large	energy facility;			
(ii) a large	e customer facility v	whose natural ga	s utility has been exem	npted by the
commissione	r under section 216	B.241, subdivisio	on 1a, paragraph (a), wi	th respect to natural
gas sales mad	de to the large custo	mer facility; and	<u>l</u>	
(iii) a con	nmercial gas custom	er facility whos	e natural gas utility has	been exempted by
he commissi	ioner under section	216B.241, subdi	vision 1a, paragraph (b	o), with respect to
natural gas sa	ales made to the cor	nmercial gas cus	tomer facility;	
(2) electri	c sales to a large cu	stomer facility v	vhose electric utility ha	as been exempted
by the comm	issioner under secti	on 216B.241, su	bdivision 1a, paragrap	h (a), with respect
to electric sal	les made to the large	e facility; or		
(3) the an	nount of electric sale	es prior to Decer	nber 31, 2032, that are	associated with a
utility's prog	ram, rate, or tariff fo	or electric vehicl	e charging based on a	methodology and
assumptions	developed by the de	epartment in con	sultation with intereste	d stakeholders no
ater than De	cember 31, 2020. A	fter December 3	1, 2032, incremental s	ales to electric
vehicles mus	t be included in cald	culating a utility	s gross retail sales.

SF227

REVISOR

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
5.1	Subd. 11	. Investments and ex	xpenses of a pi	ıblic utility. "Investme	nts and expenses of
5.2				ses incurred by a public	
5.3	with an ener	gy conservation imp	rovement.		
5.4	Subd. 12	. Large customer fa	cility. "Large c	sustomer facility" mean	s all buildings,
5.5	structures, e	quipment, and install	ations at a sing	le site that in aggregate	: (1) impose a peak
5.6	electrical de	mand on an electric u	utility's system	of at least 20,000 kilov	vatts, measured in
5.7	the same wa	y as the utility that se	erves the custor	ner facility measures e	lectric demand for
5.8	billing purpo	oses; or (2) consume	at least 500,00	0,000 cubic feet of natu	ıral gas annually.
5.9	When calcul	lating peak electrical	demand, a larg	e customer facility may	y include demand
5.10	offset by on-	-site cogeneration fac	vilities and, if e	ngaged in mineral extra	action, may include
5.11	peak energy	demand from the lar	ge customer fa	cility's mining processi	ng operations.
5.12	<u>Subd. 13</u>	<u>.</u> Large energy facili	ty. "Large energ	gy facility" has the mear	ing given in section
5.13	<u>216B.2421,</u>	subdivision 2, clause	(1).		
5.14	<u>Subd. 14</u>	. Lifetime energy sa	vings. "Lifetin	ne energy savings" mea	ins the amount of
5.15	savings a pa	rticular energy conse	rvation improv	ement is projected to p	roduce over the
5.16	improvemer	nt's effective useful li	fetime.		
5.17	Subd. 15	. Load management	t. "Load manag	gement" means an activ	ity, service, or
5.18	technology t	hat changes the timing	g or the efficien	cy of a customer's use o	of energy that allows
5.19	<u>a utility or a</u>	customer to: (1) resp	ond to local and	d regional energy system	m conditions; or (2)
5.20	reduce peak	demand for electricity	or natural gas.	Load management that 1	reduces a customer's
5.21	<u>net annual e</u>	nergy consumption is	s also energy co	onservation.	
5.22	<u>Subd. 16</u>	. Low-income house	hold. "Low-ind	come household" means	a household whose
5.23	household in	ncome is 60 percent o	or less of the sta	ate median household i	ncome.
5.24	<u>Subd. 17</u>	. Low-income progr	ams. "Low-inc	ome programs" means e	energy conservation
5.25	improvemer	nt programs that direc	tly serve the ne	eeds of low-income hou	useholds, including
5.26	low-income	renters.			
5.27	<u>Subd. 18</u>	8. Member. "Member	" has the mean	ing given in section 308	B.005, subdivision
5.28	<u>15.</u>				
5.29	<u>Subd. 19</u>	. <u>Multifamily buildi</u>	ng. "Multifam	ily building" means a re	esidential building
5.30	containing f	ive or more dwelling	units.		
5.31	<u>Subd. 20</u>	. Preweatherization	measure. "Pre	eweatherization measur	e" means an
5.32	improvemen	nt that is necessary to	allow energy c	conservation improvem	ents to be installed
5.33	in a home.				

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
6.1	Subd. 21. Q	ualifying utility. "	Qualifying utili	ty" means a utility that s	upplies a customer
6.2	with energy that	at enables the custo	omer to qualify	as a large customer faci	lity.
6.3	<u>Subd. 22.</u> W	Vaste heat recove	red and used as	s thermal energy. <u>"</u> Was	ste heat recovered
6.4	and used as the	rmal energy" mea	ns capturing hea	at energy that would be	exhausted or
6.5	dissipated to th	e environment fro	m machinery, b	uildings, or industrial pr	rocesses, and
6.6	productively us	sing the recovered	thermal energy	where it was captured o	or distributing it as
6.7	thermal energy	to other locations	where it is used	to reduce demand-side	consumption of
6.8	natural gas, ele	ctric energy, or bo	th.		
6.9	<u>Subd. 23.</u> W	Vaste heat recover	ry converted in	to electricity. "Waste h	eat recovery
6.10	converted into	electricity" means	an energy recov	very process that conver	rts to electricity
6.11	energy from the	e heat of exhaust s	tacks or pipes u	sed for engines or manu	ufacturing or
6.12	industrial proce	esses, or from the 1	eduction of hig	h pressure in water or g	as pipelines, that
6.13	would otherwis	se be lost.			
6.14	EFFECTIV	E DATE. This se	ection is effectiv	e the day following fina	al enactment.
6.15	Sec. 4. [216B.	2403] CONSUME	R-OWNED UT	TILITIES; ENERGY C	ONSERVATION
6.16	AND OPTIMI	ZATION.			
6.17	Subdivision	<u>1.</u> Applicability.	This section ap	plies to:	
6.18	<u>(1) a cooper</u>	rative electric asso	ciation that prov	vides retail service to m	ore than 5,000
6.19	members;				
6.20	(2) a munici	pality that provide	es electric servic	e to more than 1,000 ret	ail customers; and
6.21	<u>(3) a munic</u>	ipality with more t	han 1,000,000,0	000 cubic feet in annual	throughput sales
6.22	to natural gas r	etail customers.			
6.23	<u>Subd. 2.</u> Co	onsumer-owned u	tility; energy-s	avings goal. (a) Each ir	ndividual
6.24	consumer-owne	ed utility subject to	this section has	an annual energy-savin	gs goal equivalent
6.25	to 1.5 percent c	of gross annual reta	ail energy sales,	to be met with a minim	um of energy
6.26	savings from en	nergy conservatior	improvements	equivalent to at least or	ne percent of the
6.27	consumer-own	ed utility's gross a	nnual retail ener	gy sales. The balance o	f energy savings
6.28	toward the annu	ual energy-savings	goal may be ac	chieved only by the follo	owing
6.29	consumer-own	ed utility activities	<u>:</u>		
6.30	<u>(1) energy s</u>	avings from addit	ional energy con	nservation improvement	<u>ts;</u>

	SF227 KL	VISOR	K31	30227-1	1st Engrossment
	(2) electric utility	infrastructure pro	ojects, as defined	in section 216B.16	36, subdivision
	1, that result in incre	ased efficiency gr	eater than would	have occurred throu	ugh normal
	maintenance activity	<u>,</u>			
	(3) net energy say	vings from efficier	nt fuel-switching	improvements that r	neet the criteria
	under subdivision 8;	0		r	
			1 1 1 1	1 1 4 *	1' 1 1
				ural gas or electric en	
	by use of waste heat				overed inermal
	energy from a cogen	eration or combin	ed neat and pow	er facility.	
	(b) The energy-sa	avings goals speci	fied in this section	on must be calculate	d based on
	weather-normalized	sales averaged ov	er the most recer	nt three years. A con	sumer-owned
]	utility may elect to c	arry forward ener	gy savings in exc	cess of 1.5 percent for	or a year to the
1	next three years, exc	ept that savings fi	om electric utilit	y infrastructure proj	ects may be
	carried forward for f	ive years. A partie	cular energy savi	ngs can only be used	d to meet one
	year's goal.				
	(c) A consumer-o	owned utility subj	ect to this sectior	n is not required to n	nake energy
!	conservation improv	ements that are no	t cost-effective, e	ven if the improvem	ent is necessary
1	to attain the energy-	savings goal. A co	nsumer-owned u	utility subject to this	section must
1	make reasonable eff	orts to implement	energy conserva	tion improvements t	hat exceed the
1	ninimum level estab	lished under this s	ubdivision if cost	effective opportunit	ties and funding
ć	are available, consid	ering other potent	ial investments t	he consumer-owned	utility intends
	to make to benefit cu	ustomers during th	e term of the pla	n filed under subdiv	vision 3.
	Subd. 3. Consun	ner-owned utility	; energy conserv	vation and optimiz:	ation plans. (a)
	By June 1, 2024, and	at least every thre	e years thereafter	; each consumer-ow	ned utility must
	file with the commis	sioner an energy c	onservation and	optimization plan th	at describes the
	programs for energy	conservation, eff	cient fuel-switch	ning, load manageme	ent, and other
	measures the consun	ner-owned utility i	ntends to offer to	achieve the utility's	energy savings
	goal.				
	(b) A plan's term	may be up to three	e years. A multi	year plan must ident	tify the total
	energy savings and e	energy savings res	ulting from energ	gy conservation imp	rovements that
	are projected to be ad	chieved in each ye	ar of the plan. A	multiyear plan that d	loes not, in each
	year of the plan, mee	et both the minim	ım energy saving	gs goal from energy	conservation
	improvements and th	ne total energy sav	vings goal of 1.5	percent, or lower go	als adjusted by
	the commissioner ur	ider paragraph (k)	, must:		
	(1) state why eac	h goal is projected	l to be unmet; an	d

S0227-1

1st Engrossment

REVISOR

SF227

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
8.1	<u>(2)</u> demo	onstrate how the const	umer-owned uti	lity proposes to meet	both goals on an
8.2	average bas	is over the duration of	f the plan.		
8.3	<u>(c) A pla</u>	an filed under this sub	division must p	rovide:	
8.4	(1) for ex	xisting programs, an a	analysis of the c	ost-effectiveness of t	he consumer-owned
8.5	utility's prog	grams offered under the	e plan, using a lis	st of baseline energy-	and capacity-savings
8.6	assumptions	s developed in consult	tation with the d	epartment; and	
8.7	(2) for n	ew programs, a prelin	ninary analysis	upon which the progr	am will proceed, in
8.8	parallel with	n further development	of assumptions	and standards.	
8.9	(d) The o	commissioner must ev	valuate a plan fi	ed under this subdivi	ision based on the
8.10	plan's likelil	hood to achieve the er	nergy-savings go	oals established in su	bdivision 2. The
8.11	commission	er may make recomm	endations to a c	onsumer-owned utili	ty regarding ways to
8.12	increase the	effectiveness of the c	consumer-owned	l utility's energy cons	servation activities
8.13	and progran	ns under this subdivis	ion. The commi	ssioner may recomm	end that a
8.14	consumer-o	wned utility implemer	nt a cost-effectiv	e energy conservation	n program, including
8.15	an energy co	onservation program	suggested by an	outside source such	as a political
8.16	subdivision,	, nonprofit corporation	n, or community	v organization.	
8.17	(e) Begin	nning June 1, 2023, an	nd every June 1	thereafter, each cons	umer-owned utility
8.18	must file: (1) an annual update ide	entifying the stat	us of its plan filed un	der this subdivision,
8.19	including: (i	i) total expenditures a	nd investments	made to date under th	ne plan; and (ii) any
8.20	intended cha	anges to the plan; and	(2) a summary o	f the annual energy-sa	avings achievements
8.21	under a plar	n. An annual filing ma	ide in the last ye	ar of a plan must cor	ntain a new plan that
8.22	complies wi	ith this section.			
8.23	(f) When	n evaluating the cost-e	effectiveness of	a consumer-owned u	tility's energy
8.24	conservation	n programs, the consu	mer-owned util	ity and the commission	oner must consider
8.25	the costs and	d benefits to ratepayer	rs, the utility, par	ticipants, and society	7. The commissioner
8.26	<u>must also co</u>	onsider the rate at whic	h the consumer-	owned utility is increa	asing energy savings
8.27	and expendi	tures on energy conser	vation, and lifet	me energy savings an	d cumulative energy
8.28	savings.				
8.29	(g) A co	nsumer-owned utility	may annually s	pend and invest up to	ten percent of the
8.30	total amoun	t spent and invested o	n energy conser	vation improvements	s on research and
8.31	developmen	nt projects that meet th	ne definition of o	energy conservation i	mprovement.
8.32	<u>(h) A ge</u>	neration and transmis	sion cooperative	e electric association	or municipal power
8.33	agency that	provides energy servi	ces to consumer	-owned utilities may	file a plan under this

SF227	REVISOR	KSI	50227-1	1st Engrossment
subdivision	on behalf of the cons	sumer-owned uti	lities to which the ass	ociation or agency
provides en	ergy services and ma	y make investme	ents, offer conservatio	n programs, and
otherwise fu	lfill the energy-savir	ngs goals and rep	porting requirements o	f this subdivision
or those co	nsumer-owned utiliti	es on an aggrega	ate basis.	
<u>(i)</u> A cor	nsumer-owned utility	is prohibited fro	om spending for or inv	vesting in energy
onservation	a improvements that	directly benefit	a large energy facility	or a large electric
ustomer fa	cility the commission	er has exempted	l under section 216B.2	241, subdivision 1a.
<u>(j)</u> The e	energy conservation a	nd optimization	plan of a consumer-or	wned utility may
nclude activ	vities to improve ene	rgy efficiency in	the public schools set	rved by the utility.
These activi	ities may include prog	grams to:		
<u>(1) incre</u>	ase the efficiency of	the school's ligh	ting and heating and c	cooling systems;
<u>(2) recon</u>	nmission buildings;			
<u>(3) train</u>	building operators; a	Ind		
<u>(4) provi</u>	ide opportunities to e	ducate students,	teachers, and staff reg	garding energy
efficiency n	neasures implemented	d at the school.		
<u>(k)</u> A co	nsumer-owned utility	may request the	at the commissioner a	djust its minimum
goal for ene	rgy savings from ene	rgy conservation	n improvements under	subdivision 2,
oaragraph (a	a), for the duration of	`the plan filed ur	nder this subdivision.	The request must be
nade by Jar	uary 1 of the year wh	nen the consume	r-owned utility must f	ile a plan under this
subdivision.	. The request must be	based on:		
<u>(1) histo</u>	rical energy conserva	ation improveme	nt program achievem	ents;
<u>(2) custo</u>	omer class makeup;			
<u>(3) proje</u>	ected load growth;			
<u>(4)</u> an er	nergy conservation po	otential study the	t estimates the amoun	t of cost-effective
energy cons	ervation potential that	at exists in the co	onsumer-owned utility	's service territory;
<u>(5) the c</u>	ost-effectiveness and	quality of the en	nergy conservation pro	ograms offered by
the consume	er-owned utility; and			
(6) other	factors the commiss	ioner and consu	mer-owned utility dete	ermine warrant an
adjustment.				
The commis	sioner must adjust the	energy savings g	goal to a level the comm	nissioner determines
s supported	by the record, but m	ust not approve	a minimum energy sa	vings goal from

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

10.1	energy conservation improvements that is less than an average of one percent per year over
10.2	the consecutive years of the plan's duration, including the year the minimum energy savings
10.3	goal is adjusted.
10.4	Subd. 4. Consumer-owned utility; energy savings investment. (a) Except as otherwise
10.5	provided, a consumer-owned utility that the commissioner determines falls short of the
10.6	minimum energy savings goal from energy conservation improvements established in
10.7	subdivision 2, paragraph (a), for three consecutive years during which the utility has annually
10.8	spent on energy conservation improvements less than 1.5 percent of its gross operating
10.9	revenues for an electric utility or less than 0.5 percent of its gross operating revenues for a
10.10	natural gas utility, must spend no less than the following amounts for energy conservation
10.11	improvements:
10.12	(1) for a municipality, 0.5 percent of its gross operating revenues from the sale of gas
10.13	and 1.5 percent of its gross operating revenues from the sale of electricity, excluding gross
10.14	operating revenues from electric and gas service provided in Minnesota to large electric
10.15	customer facilities; and
10.16	(2) for a cooperative electric association, 1.5 percent of its gross operating revenues
10.17	from service provided in the state, excluding gross operating revenues from service provided
10.18	in Minnesota to large electric customers facilities indirectly through a distribution cooperative
10.19	electric association.
10.20	(b) The commissioner may not impose the spending requirement under this subdivision
10.21	if the commissioner has determined that the utility has followed the commissioner's
10.22	recommendations, if any, provided under subdivision 3, paragraph (d).
10.23	(c) Upon request of a consumer-owned utility, the commissioner may reduce the amount
10.24	or duration of the spending requirement imposed under this subdivision, or both, if the
10.25	commissioner determines that the consumer-owned utility's failure to maintain the minimum
10.26	energy savings goal is the result of:
10.27	(1) a natural disaster or other emergency that is declared by the executive branch through
10.28	an emergency executive order that affects the consumer-owned utility's service area;
10.29	(2) a unique load distribution experienced by the consumer-owned utility; or
10.30	(3) other factors that the commissioner determines justifies a reduction.
10.31	(d) Unless the commissioner reduces the duration of the spending requirement under
10.32	paragraph (c), the spending requirement under this subdivision remains in effect until the

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
11.1	consumer-ov	wned utility has met t	he minimum er	ergy savings goal for	three consecutive
11.2	years.				
11.3	<u>Subd. 5.</u>	Energy conservation	n programs foi	· low-income househ	olds. (a) A
11.4	consumer-ov	wned utility subject to	this section m	ist provide energy cor	servation programs
11.5	to low-incor	ne households. The c	ommissioner m	ust evaluate a consum	er-owned utility's
11.6	plans under	this section by consid	ering the consu	mer-owned utility's h	istoric spending on
11.7	energy conse	ervation programs dir	ected to low-in	come households, the	rate of customer
11.8	participation	in and the energy say	vings resulting	from those programs,	and the number of
11.9	low-income	persons residing in th	e consumer-ow	ned utility's service te	rritory. A municipal
11.10	utility that fu	urnishes natural gas so	ervice must spe	nd at least 0.2 percent	of the municipal
11.11	utility's mos	t recent three-year ave	erage gross ope	rating revenue from re	esidential customers
11.12	in Minnesota	a on energy conservat	tion programs f	or low-income househ	olds. A
11.13	consumer-ov	wned utility that furni	shes electric ser	vice must spend at lea	st 0.2 percent of the
11.14	consumer-ov	wned utility's gross op	perating revenue	e from residential cust	omers in Minnesota
11.15	on energy co	onservation programs	for low-income	e households. The req	uirement under this
11.16	paragraph ap	oplies to each generat	ion and transmi	ssion cooperative asso	ociation's aggregate
11.17	gross operat	ing revenue from the	sale of electrici	ty to residential custo	mers in Minnesota
11.18	by all of the	association's member	distribution co	ooperatives.	
11.19	<u>(b) To me</u>	eet all or part of the sp	ending requirer	nents of paragraph (a)	a consumer-owned
11.20	utility may c	ontribute money to th	e energy and co	onservation account es	stablished in section
11.21	216B.241, st	ubdivision 2a. An ene	rgy conservatio	n optimization plan m	ust state the amount
11.22	of contributi	ons the consumer-ow	med utility plan	s to make to the energ	y and conservation
11.23	account. Cor	tributions to the accou	ant must be used	l for energy conservation	on programs serving
11.24	low-income	households, including	renters, located	in the service area of t	he consumer-owned
11.25	utility makir	ng the contribution. C	ontributions mu	ist be remitted to the c	commissioner by
11.26	February 1 e	each year.			
11.27	<u>(c)</u> The c	ommissioner must es	tablish energy o	conservation programs	s for low-income
11.28	households t	funded through contri	butions to the e	energy and conservation	on account under
11.29	paragraph (b). When establishing e	energy conserva	tion programs for low-	income households,
11.30	the commiss	ioner must consult pol	itical subdivision	ons, utilities, and nonp	ofit and community
11.31	organization	s, including organizat	tions providing	energy and weatheriz	ation assistance to
11.32	low-income	households. The com	missioner must	record and report expe	enditures and energy
11.33	savings achi	eved as a result of end	ergy conservati	on programs for low-i	ncome households
11.34	funded throu	igh the energy and co	nservation acco	ount in the report requ	ired under section
11.35	<u>216B.241, s</u>	ubdivision 1c, paragra	aph (f). The cor	nmissioner may contr	act with a political

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
12.1	subdivision, no	onprofit or commu	nity organization	n, public utility, muni	cipality, or
12.2	consumer-own	ed utility to impler	nent low-income	programs funded thr	ough the energy and
12.3	conservation ac	count.			
12.4	(d) A consu	mer-owned utility	may petition the	e commissioner to me	odify the required
12.5	spending under	this subdivision i	f the consumer-o	owned utility and the	commissioner were
12.6	unable to expen	nd the amount requ	uired for three co	onsecutive years.	
12.7	(e) The com	missioner must dev	velop and establis	sh guidelines for deter	mining the eligibility
12.8	of multifamily	buildings to partic	ipate in energy of	conservation program	is provided to
12.9	low-income ho	useholds. Notwiths	standing the defin	nition of low-income	household in section
12.10	216B.2402, a c	onsumer-owned u	tility or associat	ion may apply the mo	ost recent guidelines
12.11	published by th	e department for p	ourposes of deter	rmining the eligibility	of multifamily
12.12	buildings to pa	rticipate in low-ind	come programs.	The commissioner m	ust convene a
12.13	stakeholder gro	oup to review and	update these gui	delines by July 1, 202	21, and at least once
12.14	every five year	s thereafter. The st	takeholder group	must include but is	not limited to
12.15	representatives	of public utilities;	municipal elect	ric or gas utilities; ele	ectric cooperative
12.16	associations; m	ultifamily housing	g owners and dev	velopers; and low-inc	come advocates.
12.17	(f) Up to 15	percent of a cons	umer-owned util	ity's spending on low	-income energy
12.18	conservation pr	rograms may be sp	ent on preweath	erization measures. A	A consumer-owned
12.19	utility is prohib	ited from claiming	g energy savings	from preweatherizati	on measures toward
12.20	the consumer-o	owned utility's energy	rgy savings goal	÷	
12.21	(g) The con	nmissioner must, b	y order, establis	h a list of preweather	vization measures
12.22	eligible for incl	usion in low-incom	ne energy conse	rvation programs no	later than March 15,
12.23	<u>2021.</u>				
12.24	(h) A Healt	hy AIR (Asbestos	Insulation Remo	oval) account is estab	lished as a separate
12.25	account in the s	special revenue fur	nd in the state tre	easury. A consumer-c	owned utility may
12.26	elect to contribu	ite money to the H	ealthy AIR accou	ant to provide preweat	therization measures
12.27	for households	eligible for weathe	rization assistance	ce from the state weat	herization assistance
12.28	program in sect	tion 216C.264. Ret	mediation activit	ties must be executed	in conjunction with
12.29	federal weather	rization assistance	program service	s. Money contributed	l to the account by a
12.30	consumer-own	ed utility counts to	ward: (1) the min	nimum low-income sp	pending requirement
12.31	under paragrap	h (a); and (2) the c	cap on preweathe	erization measures ur	ider paragraph (f).
12.32	Money in the a	ccount is annually	appropriated to	the commissioner of c	commerce to pay for
12.33	Healthy AIR-re	elated activities.			

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
13.1	Subd. 6.	Recovery of expense	es. The commis	ssion must allow a coo	operative electric
13.2	association	subject to rate regulati	on under section	on 216B.026 to recove	er expenses resulting
13.3	from: (1) a p	plan under this section	; and (2) assess	sments and contribution	ons to the energy and
13.4	conservation	n account under sectio	on 216B.241, s	ubdivision 2a.	
13.5	<u>Subd. 7.</u>	Ownership of prewe	eatherization 1	neasure or energy co	onservation
13.6	improveme	e nt. (a) A preweatheriz	zation measure	or energy conservation	on improvement
13.7	installed in	a building under this s	ection, excludi	ing a system owned by	a consumer-owned
13.8	utility that i	s designed to turn off,	limit, or vary	the delivery of energy	, is the exclusive
13.9	property of	the building owner, ex	ccept to the ext	ent that the improvem	ent is subject to a
13.10	security inte	erest in favor of the co	nsumer-owned	l utility in case of a lo	an to the building
13.11	owner for th	ne improvement.			
13.12	<u>(b)</u> A co	nsumer-owned utility	has no liability	for loss, damage, or	injury directly or
13.13	indirectly ca	aused by a preweather	ization measur	e or energy conservat	ion improvement,
13.14	unless a cor	nsumer-owned utility i	s determined t	o have been negligent	in purchasing,
13.15	installing, o	r modifying a preweat	therization pro-	duct.	
13.16	<u>Subd. 8.</u>	Criteria for efficient	t fuel-switchin	g improvements. (a)	A fuel-switching
13.17	improvemen	nt is deemed efficient i	f, applying the	technical criteria estab	blished under section
13.18	<u>216B.241, s</u>	subdivision 1d, paragra	aph (b), the im	provement, relative to	the fuel being
13.19	displaced:				
13.20	<u>(1) resul</u>	ts in a net reduction in	the amount of	f source energy consu	med for a particular
13.21	use, measur	red on a fuel-neutral ba	asis;		
13.22	<u>(2) resul</u>	ts in a net reduction of	statewide gree	nhouse gas emissions,	as defined in section
13.23	216H.01, su	bdivision 2, over the li	fetime of the in	nprovement. For an eff	icient fuel-switching
13.24	improvemen	nt installed by an elect	tric consumer-o	owned utility, the redu	ection in emissions
13.25	must be me	asured based on the ho	ourly emission	s profile of the consum	ner-owned utility or
13.26	the utility's	electricity supplier, as	reported in the	e most recent resource	plan approved by
13.27	the commis	sion under section 216	6B.2422. If the	hourly emissions pro-	file is not available,
13.28	the commiss	sioner must develop a	method consu	mer-owned utilities m	ust use to estimate
13.29	that value;				
13.30	<u>(3) is co</u>	st-effective, considerin	ng the costs an	d benefits from the pe	rspective of the
13.31	consumer-o	wned utility, participa	nts, and societ	y; and	
13.32	(4) is ins	stalled and operated in	a manner that	improves the consum	er-owned utility's
13.33	system load	factor.			

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

- (b) For purposes of this subdivision, "source energy" means the total amount of primary
 energy required to deliver energy services, adjusted for losses in generation, transmission,
 and distribution, and expressed on a fuel-neutral basis.
- 14.4Subd. 9. Manner of filing and service. (a) A consumer-owned utility must submit the14.5filings required under this section to the department using the department's electronic filing14.6system. The commissioner may approve an exemption from this requirement if an affected14.7consumer-owned utility is unable to submit filings via the department's electronic filing14.8system. All other interested parties must submit filings to the department via the department's14.9electronic filing system whenever practicable but may also file by personal delivery or by14.10mail.
- (b) The submission of a document to the department's electronic filing system constitutes
 service on the department. If a department rule requires service of a notice, order, or other
 document by the department, a consumer-owned utility, or an interested party upon persons
 on a service list maintained by the department, service may be made by personal delivery,
 mail, or electronic service. Electronic service may be made only to persons on the service
 list that have previously agreed in writing to accept electronic service at an e-mail address
 provided to the department for electronic service purposes.
- 14.18 <u>Subd. 10.</u> Assessment. The commission or department may assess consumer-owned
 14.19 utilities subject to this section to carry out the purposes of section 216B.241, subdivisions
- 14.20 1d, 1e, and 1f. An assessment under this paragraph must be proportionate to the
- 14.21 consumer-owned utility's respective gross operating revenue from sales of gas or electric
- 14.22 service in Minnesota during the previous calendar year. Assessments under this subdivision
- 14.23 are not subject to the cap on assessments under section 216B.62 or any other law.

14.24 **EFFECTIVE DATE.** This section is effective the day following final enactment.

- 14.25 Sec. 5. Minnesota Statutes 2020, section 216B.241, subdivision 1a, is amended to read:
- 14.26 Subd. 1a. Investment, expenditure, and contribution; public utility Large customer
- 14.27 **facility.** (a) For purposes of this subdivision and subdivision 2, "public utility" has the
- 14.28 meaning given it in section 216B.02, subdivision 4. Each public utility shall spend and
- 14.29 invest for energy conservation improvements under this subdivision and subdivision 2 the
- 14.30 following amounts:
- 14.31 (1) for a utility that furnishes gas service, 0.5 percent of its gross operating revenues
 14.32 from service provided in the state;

(2) for a utility that furnishes electric service, 1.5 percent of its gross operating revenues
 from service provided in the state; and

(3) for a utility that furnishes electric service and that operates a nuclear-powered electric
 generating plant within the state, two percent of its gross operating revenues from service
 provided in the state.

For purposes of this paragraph (a), "gross operating revenues" do not include revenues
from large customer facilities exempted under paragraph (b), or from commercial gas
customers that are exempted under paragraph (c) or (e).

(b) (a) The owner of a large customer facility may petition the commissioner to exempt 15.9 both electric and gas utilities serving the large customer facility from the investment and 15.10 expenditure requirements of paragraph (a) contributing to investments and expenditures 15.11 made under an energy and conservation optimization plan filed under subdivision 2 or 15.12 section 216B.2403, subdivision 3, with respect to retail revenues attributable to the large 15.13 customer facility. The filing must include a discussion of the competitive or economic 15.14 pressures facing the owner of the facility and the efforts taken by the owner to identify, 15.15 evaluate, and implement energy conservation and efficiency improvements. A filing 15.16 submitted on or before October 1 of any year must be approved within 90 days and become 15.17 effective January 1 of the year following the filing, unless the commissioner finds that the 15.18 owner of the large customer facility has failed to take reasonable measures to identify, 15.19 evaluate, and implement energy conservation and efficiency improvements. If a facility 15.20 qualifies as a large customer facility solely due to its peak electrical demand or annual 15.21 natural gas usage, the exemption may be limited to the qualifying utility if the commissioner 15.22 finds that the owner of the large customer facility has failed to take reasonable measures to 15.23 identify, evaluate, and implement energy conservation and efficiency improvements with 15.24 respect to the nonqualifying utility. Once an exemption is approved, the commissioner may 15.25 request the owner of a large customer facility to submit, not more often than once every 15.26 five years, a report demonstrating the large customer facility's ongoing commitment to 15.27 energy conservation and efficiency improvement after the exemption filing. The 15.28 15.29 commissioner may request such reports for up to ten years after the effective date of the exemption, unless the majority ownership of the large customer facility changes, in which 15.30 case the commissioner may request additional reports for up to ten years after the change 15.31 in ownership occurs. The commissioner may, within 180 days of receiving a report submitted 15.32 under this paragraph, rescind any exemption granted under this paragraph upon a 15.33 15.34 determination that the large customer facility is not continuing to make reasonable efforts to identify, evaluate, and implement energy conservation improvements. A large customer 15.35

16.1 facility that is, under an order from the commissioner, exempt from the investment and 16.2 expenditure requirements of paragraph (a) as of December 31, 2010, is not required to 16.3 submit a report to retain its exempt status, except as otherwise provided in this paragraph 16.4 with respect to ownership changes. No exempt large customer facility may participate in a 16.5 utility conservation improvement program unless the owner of the facility submits a filing 16.6 with the commissioner to withdraw its exemption.

(c) (b) A commercial gas customer that is not a large customer facility and that purchases 16.7 or acquires natural gas from a public utility having fewer than 600,000 natural gas customers 16.8 in Minnesota may petition the commissioner to exempt gas utilities serving the commercial 16.9 gas customer from the investment and expenditure requirements of paragraph (a) contributing 16.10 to investments and expenditures made under an energy and conservation optimization plan 16.11 filed under subdivision 2 or section 216B.2403, subdivision 3, with respect to retail revenues 16.12 attributable to the commercial gas customer. The petition must be supported by evidence 16.13 demonstrating that the commercial gas customer has acquired or can reasonably acquire 16.14 the capability to bypass use of the utility's gas distribution system by obtaining natural gas 16.15 directly from a supplier not regulated by the commission. The commissioner shall grant the 16.16 exemption if the commissioner finds that the petitioner has made the demonstration required 16.17 by this paragraph. 16.18

(d) The commissioner may require investments or spending greater than the amounts
 required under this subdivision for a public utility whose most recent advance forecast
 required under section 216B.2422 or 216C.17 projects a peak demand deficit of 100
 megawatts or greater within five years under midrange forecast assumptions.

16.23 (e) (c) A public utility, consumer-owned utility, or owner of a large customer facility 16.24 may appeal a decision of the commissioner under paragraph (a) or (b), (c), or (d) to the 16.25 commission under subdivision 2. In reviewing a decision of the commissioner under 16.26 paragraph (a) or (b), (c), or (d), the commission shall rescind the decision if it finds that the 16.27 required investments or spending will:

16.28 (1) not result in cost-effective energy conservation improvements; or

16.29 (2) otherwise the decision is not be in the public interest.

16.30 (d) Large customer facilities and commercial gas customers that are, under an order

16.31 from the commissioner, exempt from the investment and expenditure requirements of this

16.32 section as of December 31, 2020, are not required to submit additional documentation to

16.33 maintain that exemption and shall not be assessed any costs related to any energy

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

17.1 conservation and optimization plan filed under this section, including but not limited to,
 17.2 costs associated with programs for efficient fuel-switching improvements.

17.3 (e) A public utility is prohibited from spending for or investing in energy conservation

17.4 improvements that directly benefit a large energy facility or a large electric customer facility

17.5 <u>the commissioner has issued an exemption to under this section.</u>

17.6 **EFFECTIVE DATE.** This section is effective the day following final enactment.

17.7 Sec. 6. Minnesota Statutes 2020, section 216B.241, subdivision 1c, is amended to read:

Subd. 1c. <u>Public utility; energy-saving goals.</u> (a) The commissioner shall establish
energy-saving goals for energy conservation improvement expenditures improvements and
shall evaluate an energy conservation improvement program on how well it meets the goals
set.

(b) Each individual A public utility and association shall have providing electric service 17.12 has an annual energy-savings goal equivalent to 1.5 1.75 percent of gross annual retail 17.13 energy sales unless modified by the commissioner under paragraph (d). (c). A public utility 17.14 providing natural gas service has an annual energy-savings goal equivalent to one percent 17.15 of gross annual retail energy sales, which cannot be lowered by the commissioner. The 17.16 savings goals must be calculated based on the most recent three-year weather-normalized 17.17 17.18 average. A public utility or association providing electric service may elect to carry forward energy savings in excess of 1.5 1.75 percent for a year to the succeeding three calendar 17.19 years, except that savings from electric utility infrastructure projects allowed under paragraph 17.20 17.21 (d) may be carried forward for five years. A public utility providing natural gas service may elect to carry forward energy savings in excess of one percent for a year to the succeeding 17.22 three calendar years. A particular energy savings can only be used only for to meet one 17.23 year's goal. 17.24

(c) The commissioner must adopt a filing schedule that is designed to have all utilities
 and associations operating under an energy-savings plan by calendar year 2010.

(d) (c) In its energy conservation improvement and optimization plan filing, a public
utility or association may request the commissioner to adjust its annual energy-savings
percentage goal based on its historical conservation investment experience, customer class
makeup, load growth, a conservation potential study, or other factors the commissioner
determines warrants an adjustment.

(d) The commissioner may not approve a plan of a public utility that provides for an
 annual energy-savings goal of less than one percent of gross annual retail energy sales from
 energy conservation improvements.

A utility or association may include in its energy conservation plan energy savings from
 The balance of the 1.75 percent annual energy savings goal may be achieved through energy
 savings from:

18.7 (1) additional energy conservation improvements;

- (2) electric utility infrastructure projects approved by the commission under section 18.8 216B.1636 that result in increased efficiency greater than would have occurred through 18.9 normal maintenance activity; or waste heat recovery converted into electricity projects that 18.10 may count as energy savings in addition to a minimum energy-savings goal of at least one 18.11 18.12 percent for energy conservation improvements. Energy savings from electric utility infrastructure projects, as defined in section 216B.1636, may be included in the energy 18.13 conservation plan of a municipal utility or cooperative electric association. Electric utility 18.14 infrastructure projects must result in increased energy efficiency greater than that which 18.15 would have occurred through normal maintenance activity 18.16
- 18.17 (3) subject to department approval, demand-side natural gas or electric energy displaced
 18.18 by use of waste heat recovered and used as thermal energy, including the recovered thermal
 18.19 energy from a cogeneration or combined heat and power facility.
- (e) An energy-savings goal is not satisfied by attaining the revenue expenditure
 requirements of subdivisions 1a and 1b, but can only be satisfied by meeting the
 energy-savings goal established in this subdivision.
- 18.23 (f) An association or (e) A public utility is not required to make energy conservation investments to attain the energy-savings goals of this subdivision that are not cost-effective 18.24 even if the investment is necessary to attain the energy-savings goals. For the purpose of 18.25 this paragraph, in determining cost-effectiveness, the commissioner shall consider: (1) the 18.26 costs and benefits to ratepayers, the utility, participants, and society. In addition, the 18.27 18.28 commissioner shall consider; (2) the rate at which an association or municipal a public utility is increasing both its energy savings and its expenditures on energy conservation; 18.29 and (3) the public utility's lifetime energy savings and cumulative energy savings. 18.30
- (g) (f) On an annual basis, the commissioner shall produce and make publicly available
 a report on the annual energy and capacity savings and estimated carbon dioxide reductions
 achieved by the energy conservation improvement programs under this section and section
 216B.2403 for the two most recent years for which data is available. The report must also

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

19.1 include information regarding any annual energy sales or generation capacity increases

19.2 resulting from efficient fuel-switching improvements. The commissioner shall report on

19.3 program performance both in the aggregate and for each entity filing an energy conservation

19.4 improvement plan for approval or review by the commissioner, and must estimate progress

19.5 made toward the statewide energy-savings goal under section 216B.2401.

- 19.6 (h) By January 15, 2010, the commissioner shall report to the legislature whether the
- 19.7 spending requirements under subdivisions 1a and 1b are necessary to achieve the
- 19.8 energy-savings goals established in this subdivision.
- 19.9 (i) This subdivision does not apply to:
- 19.10 (1) a cooperative electric association with fewer than 5,000 members;

19.11 (2) a municipal utility with fewer than 1,000 retail electric customers; or

19.12 (3) a municipal utility with less than 1,000,000,000 cubic feet in annual throughput sales

- 19.13 to retail natural gas customers.
- 19.14 **EFFECTIVE DATE.** This section is effective the day following final enactment.

19.15 Sec. 7. Minnesota Statutes 2020, section 216B.241, subdivision 1d, is amended to read:

Subd. 1d. Technical assistance. (a) The commissioner shall evaluate energy conservation
improvement programs <u>filed under this section and section 216B.2403</u> on the basis of
cost-effectiveness and the reliability of the technologies employed. The commissioner shall,
by order, establish, maintain, and update energy-savings assumptions that must be used <u>by</u>
<u>utilities</u> when filing energy conservation improvement programs. <u>The department must track</u>
a public utility's or consumer-owned utility's lifetime energy savings and cumulative lifetime
energy savings reported in plans submitted under this section and section 216B.2403.

(b) The commissioner shall establish an inventory of the most effective energy
conservation programs, techniques, and technologies, and encourage all Minnesota utilities
to implement them, where appropriate, in their service territories. The commissioner shall
describe these programs in sufficient detail to provide a utility reasonable guidance
concerning implementation. The commissioner shall prioritize the opportunities in order of
potential energy savings and in order of cost-effectiveness.

(c) The commissioner may contract with a third party to carry out any of the
commissioner's duties under this subdivision, and to obtain technical assistance to evaluate
the effectiveness of any conservation improvement program.

20.1 (d) The commissioner may assess up to \$850,000 annually for the purposes of this 20.2 subdivision. The assessments must be deposited in the state treasury and credited to the 20.3 energy and conservation account created under subdivision 2a. An assessment made under 20.4 this subdivision is not subject to the cap on assessments provided by section 216B.62, or 20.5 any other law.

(b) Of the assessment authorized under paragraph (a), the commissioner may expend
up to \$400,000 annually for the purpose of developing, operating, maintaining, and providing
technical support for a uniform electronic data reporting and tracking system available to
all utilities subject to this section, in order to enable accurate measurement of the cost and
energy savings of the energy conservation improvements required by this section. This
paragraph expires June 30, 2018.

- 20.12 (e) The commissioner must work with stakeholders to develop technical guidelines that 20.13 public utilities and consumer-owned utilities must use to:
- 20.14 (1) determine whether deployment of a fuel-switching improvement meets the criteria
- 20.15 established in subdivision 11, paragraph (e), or section 216B.2403, subdivision 8, as
- 20.16 applicable; and

20.17 (2) calculate the amount of energy saved by deployment of a fuel-switching improvement.

- 20.18 The guidelines must be issued by the commissioner by order no later than March 15, 2021,
 20.19 and must be updated as the commissioner determines is necessary.
- 20.20 **EFFECTIVE DATE.** This section is effective the day following final enactment.
- 20.21 Sec. 8. Minnesota Statutes 2020, section 216B.241, subdivision 1f, is amended to read:

20.22 Subd. 1f. **Facilities energy efficiency.** (a) The commissioner of administration and the 20.23 commissioner of commerce shall maintain and, as needed, revise the sustainable building 20.24 design guidelines developed under section 16B.325.

- (b) The commissioner of administration and the commissioner of commerce shall maintain
 and update the benchmarking tool developed under Laws 2001, chapter 212, article 1, section
 3, so that all public buildings can use the benchmarking tool to maintain energy use
- 20.28 information for the purposes of establishing energy efficiency benchmarks, tracking building
 20.29 performance, and measuring the results of energy efficiency and conservation improvements.
- (c) The commissioner shall require that utilities include in their conservation improvement
 plans programs that facilitate professional engineering verification to qualify a building as
 Energy Star-labeled, Leadership in Energy and Environmental Design (LEED) certified, or

Green Globes-certified. The state goal is to achieve certification of 1,000 commercial
buildings as Energy Star-labeled, and 100 commercial buildings as LEED-certified or Green
Globes-certified by December 31, 2010.

(d) The commissioner may assess up to \$500,000 annually for the purposes of this
subdivision. The assessments must be deposited in the state treasury and credited to the
energy and conservation account created under subdivision 2a. An assessment made under
this subdivision is not subject to the cap on assessments provided by section 216B.62, or
any other law.

21.9

EFFECTIVE DATE. This section is effective the day following final enactment.

21.10 Sec. 9. Minnesota Statutes 2020, section 216B.241, subdivision 1g, is amended to read:

Subd. 1g. Manner of filing and service. (a) A public utility, generation and transmission 21.11 cooperative electric association, municipal power agency, cooperative electric association, 21.12 and municipal utility shall submit filings to the department via the department's electronic 21.13 filing system. The commissioner may approve an exemption from this requirement in the 21.14 event an affected public utility or association is unable to submit filings via the department's 21.15 21.16 electronic filing system. All other interested parties shall submit filings to the department via the department's electronic filing system whenever practicable but may also file by 21.17 personal delivery or by mail. 21.18

(b) Submission of a document to the department's electronic filing system constitutes
service on the department. Where department rule requires service of a notice, order, or
other document by the department, <u>public</u> utility, <u>association</u>, or interested party upon
persons on a service list maintained by the department, service may be made by personal
delivery, mail, or electronic service, except that electronic service may only be made upon
persons on the service list who have previously agreed in writing to accept electronic service
at an electronic address provided to the department for electronic service purposes.

21.26

26 **EFFECTIVE DATE.** This section is effective the day following final enactment.

21.27

7 Sec. 10. Minnesota Statutes 2020, section 216B.241, subdivision 2, is amended to read:

21.28 Subd. 2. Programs Public utility; energy conservation and optimization plans. (a)

The commissioner may require <u>a public utilities utility</u> to make investments and expenditures in energy conservation improvements, explicitly setting forth the interest rates, prices, and terms under which the improvements must be offered to the customers. The required programs must cover no more than a three-year period.

(b) A public utilities utility shall file an energy conservation improvement plans and 22.1 optimization plan by June 1, on a schedule determined by order of the commissioner, but 22.2 at least every three years. Plans received As provided in subdivisions 11 to 13, plans may 22.3 include programs for efficient fuel-switching improvements and load management. An 22.4 individual utility program may combine elements of energy conservation, load management, 22.5 or efficient fuel-switching. The plan must estimate the lifetime energy savings and cumulative 22.6 lifetime energy savings projected to be achieved under the plan. A plan filed by a public 22.7 utility by June 1 must be approved or approved as modified by the commissioner by 22.8 December 1 of that same year. 22.9

(c) The commissioner shall evaluate the program plan on the basis of cost-effectiveness 22.10 and the reliability of technologies employed. The commissioner's order must provide to the 22.11 extent practicable for a free choice, by consumers participating in the an energy conservation 22.12 program, of the device, method, material, or project constituting the energy conservation 22.13 improvement and for a free choice of the seller, installer, or contractor of the energy 22.14 conservation improvement, provided that the device, method, material, or project seller, 22.15 installer, or contractor is duly licensed, certified, approved, or qualified, including under 22.16 the residential conservation services program, where applicable. 22.17

(b) (d) The commissioner may require a utility subject to subdivision 1c to make an
energy conservation improvement investment or expenditure whenever the commissioner
finds that the improvement will result in energy savings at a total cost to the utility less than
the cost to the utility to produce or purchase an equivalent amount of new supply of energy.
The commissioner shall nevertheless ensure that every public utility operate one or more
programs under periodic review by the department.

(c) (e) Each public utility subject to this subdivision 1a may spend and invest annually
up to ten percent of the total amount required to be spent and invested on energy conservation
improvements under this section by the <u>public</u> utility on research and development projects
that meet the definition of energy conservation improvement in subdivision 1 and that are
funded directly by the public utility.

(d) A public utility may not spend for or invest in energy conservation improvements
 that directly benefit a large energy facility or a large electric customer facility for which the
 commissioner has issued an exemption pursuant to subdivision 1a, paragraph (b).

(f) The commissioner shall consider and may require a <u>public</u> utility to undertake <u>a an</u>
 energy conservation program suggested by an outside source, including a political
 subdivision, a nonprofit corporation, or community organization.

(e) (g) A public utility, a political subdivision, or a nonprofit or community organization 23.1 that has suggested a an energy conservation program, the attorney general acting on behalf 23.2 of consumers and small business interests, or a public utility customer that has suggested a 23.3 an energy conservation program and is not represented by the attorney general under section 23.4 8.33 may petition the commission to modify or revoke a department decision under this 23.5 section, and the commission may do so if it determines that the energy conservation program 23.6 is not cost-effective, does not adequately address the residential conservation improvement 23.7 23.8 needs of low-income persons, has a long-range negative effect on one or more classes of customers, or is otherwise not in the public interest. The commission shall reject a petition 23.9 that, on its face, fails to make a reasonable argument that a n energy conservation program 23.10 is not in the public interest. 23.11

(f) (h) The commissioner may order a public utility to include, with the filing of the 23.12 public utility's annual status report, the results of an independent audit of the public utility's 23.13 conservation improvement programs and expenditures performed by the department or an 23.14 auditor with experience in the provision of energy conservation and energy efficiency 23.15 services approved by the commissioner and chosen by the public utility. The audit must 23.16 specify the energy savings or increased efficiency in the use of energy within the service 23.17 territory of the public utility that is the result of the public utility's spending and investments. 23.18 The audit must evaluate the cost-effectiveness of the public utility's conservation programs. 23.19

(g) A gas utility may not spend for or invest in energy conservation improvements that
directly benefit a large customer facility or commercial gas customer facility for which the
commissioner has issued an exemption pursuant to subdivision 1a, paragraph (b), (c), or
(e). The commissioner shall consider and may require a utility to undertake a program
suggested by an outside source, including a political subdivision, a nonprofit corporation,
or a community organization.

(i) The energy conservation and optimization plan of each public utility subject to this
section must include activities to improve energy efficiency in public schools served by the
utility. As applicable to each public utility, at a minimum the activities must include programs
to increase the efficiency of the school's lighting and heating and cooling systems, and to
provide for building recommissioning, building operator training, and opportunities to
educate students, teachers, and staff regarding energy efficiency measures implemented at
the school.

23.33 (j) The commissioner may require investments or spending greater than the amounts
23.34 proposed in a plan filed under this subdivision or section 216C.17 for a public utility whose

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
24.124.224.3	deficit of 10	0 megawatts or more	within five year	tion 216B.2422 projects the start of the sta	ecast assumptions.
24.4	Sec. 11. M	innesota Statutes 202	0, section 216B	.241, subdivision 2b, :	is amended to read:
24.5	Subd. 2b	. Recovery of expens	ses. <u>(a)</u> The com	mission shall allow a	public utility to
24.6	recover expe	enses resulting from a	an energy cons	ervation improvemen	t program required
24.7	and optimiza	ation plan approved b	y the departmen	t under this section an	d contributions and
24.8	assessments	to the energy and con	nservation accou	int, unless the recover	y would be
24.9	inconsistent	with a financial incent	ive proposal appr	roved by the commission	on. The commission
24.10	shall allow a	- cooperative electric-	association subj	ect to rate regulation	under section
24.11	216B.026, to) recover expenses rea	sulting from energy	rgy conservation impr	ovement programs,
24.12	load manage	ment programs, and	assessments and	contributions to the c	energy and
24.13	conservation	end of the rest of	ecovery would t	be inconsistent with a	financial incentive
24.14	proposal app	proved by the commis	sion. In addition	n,	

(b) A public utility may file annually, or the Public Utilities Commission may require 24.15 24.16 the public utility to file, and the commission may approve, rate schedules containing provisions for the automatic adjustment of charges for utility service in direct relation to 24.17 changes in the expenses of the public utility for real and personal property taxes, fees, and 24.18 permits, the amounts of which the public utility cannot control. A public utility is eligible 24.19 to file for adjustment for real and personal property taxes, fees, and permits under this 24.20 24.21 subdivision only if, in the year previous to the year in which it files for adjustment, it has spent or invested at least 1.75 percent of its gross revenues from provision of electric service, 24.22 excluding gross operating revenues from electric service provided in the state to large electric 24.23 customer facilities for which the commissioner has issued an exemption under subdivision 24.24 1a, paragraph (b), and 0.6 percent of its gross revenues from provision of gas service, 24.25 excluding gross operating revenues from gas services provided in the state to large electric 24.26 customer facilities for which the commissioner has issued an exemption under subdivision 24.27 24.28 1a, paragraph (b), for that year for energy conservation improvements under this section.

24.29

EFFECTIVE DATE. This section is effective the day following final enactment.

24.30 Sec. 12. Minnesota Statutes 2020, section 216B.241, subdivision 3, is amended to read:

24.31 Subd. 3. Ownership of preweatherization measure or energy conservation

24.32 **improvement.** An <u>A preweatherization measure or energy conservation improvement made</u>

24.33 to or installed in a building in accordance with this section, except systems owned by the a

25.1 <u>public</u> utility and designed to turn off, limit, or vary the delivery of energy, are the exclusive
25.2 property of the owner of the building except to the extent that the improvement is subjected
25.3 to a security interest in favor of the public utility in case of a loan to the building owner.

25.4 The public utility has no liability for loss, damage or injury caused directly or indirectly by

25.5 an <u>a preweatherization measure or energy conservation improvement except for negligence</u>

25.6 by the utility in purchase, installation, or modification of the product.

25.7

7 **EFFECTIVE DATE.** This section is effective the day following final enactment.

25.8

Sec. 13. Minnesota Statutes 2020, section 216B.241, subdivision 5, is amended to read:

Subd. 5. Efficient lighting program. (a) Each public utility, cooperative electric
association, and municipal and consumer-owned utility that provides electric service to
retail customers and is subject to subdivision 1c or section 216B.2403 shall include as part
of its conservation improvement activities a program to strongly encourage the use of LED
lamps LEDs. The program must include at least a public information campaign to encourage
use of LED lamps LEDs and proper management of spent lamps and LEDs by all customer
classifications.

(b) A public utility that provides electric service at retail to 200,000 or more customers
shall establish, either directly or through contracts with other persons, including lamp
manufacturers, distributors, wholesalers, and retailers and local government units, a system
to collect for delivery to a reclamation or recycling facility spent fluorescent and
high-intensity discharge lamps from households and from small businesses as defined in
section 645.445 that generate an average of fewer than ten spent lamps per year.

(c) A collection system must include establishing reasonably convenient locations for
collecting spent lamps from households and financial incentives sufficient to encourage
spent lamp generators to take the lamps to the collection locations. Financial incentives may
include coupons for purchase of new LED lamps, a cash back system, or any other financial
incentive or group of incentives designed to collect the maximum number of spent lamps
from households and small businesses that is reasonably feasible.

(d) A public utility that provides electric service at retail to fewer than 200,000 customers,
a cooperative electric association, or a municipal or a consumer-owned utility that provides
electric service at retail to customers may establish a collection system under paragraphs
(b) and (c) as part of conservation improvement activities required under this section.

(e) The commissioner of the Pollution Control Agency may not, unless clearly required
by federal law, require a public utility, cooperative electric association, or municipality or

26.1 <u>consumer-owned utility</u> that establishes a household fluorescent and high-intensity discharge
26.2 lamp collection system under this section to manage the lamps as hazardous waste as long
26.3 as the lamps are managed to avoid breakage and are delivered to a recycling or reclamation
26.4 facility that removes mercury and other toxic materials contained in the lamps prior to
26.5 placement of the lamps in solid waste.

(f) If a public utility, cooperative electric association, or municipal or consumer-owned
utility contracts with a local government unit to provide a collection system under this
subdivision, the contract must provide for payment to the local government unit of all the
unit's incremental costs of collecting and managing spent lamps.

(g) All the costs incurred by a public utility, cooperative electric association, or municipal
 or consumer-owned utility to promote the use of LED lamps and to collect fluorescent and
 high-intensity discharge to collect LED lamps under this subdivision are conservation
 improvement spending under this section.

(h) For the purposes of this subdivisionsection, "LED lamp" <u>"LED"</u> means a light-emitting
diode lamp that consists of a solid state device that emits visible light when an electric
current passes through a semiconductor bulb or lighting product.

26.17 **EFFECTIVE DATE.** This section is effective the day following final enactment.

26.18 Sec. 14. Minnesota Statutes 2020, section 216B.241, subdivision 7, is amended to read:

Subd. 7. Low-income programs. (a) The commissioner shall ensure that each public 26.19 utility and association subject to subdivision 1c provides low-income energy conservation 26.20 programs to low-income households. When approving spending and energy-savings goals 26.21 for low-income programs, the commissioner shall consider historic spending and participation 26.22 levels, energy savings for achieved by low-income programs, and the number of low-income 26.23 persons residing in the utility's service territory. A municipal utility that furnishes gas service 26.24 must spend at least 0.2 percent, and a public utility furnishing gas service must spend at 26.25 least 0.4 0.8 percent, of its most recent three-year average gross operating revenue from 26.26 residential customers in the state on low-income programs. A public utility or association 26.27 that furnishes electric service must spend at least 0.1 0.4 percent of its gross operating 26.28 revenue from residential customers in the state on low-income programs. For a generation 26.29 26.30 and transmission cooperative association, this requirement shall apply to each association's members' aggregate gross operating revenue from sale of electricity to residential customers 26.31 in the state. Beginning in 2010, a utility or association that furnishes electric service must 26.32 spend 0.2 percent of its gross operating revenue from residential customers in the state on 26.33 26.34 low-income programs.

(b) To meet the requirements of paragraph (a), a <u>public utility or association may</u>
contribute money to the energy and conservation account <u>established under subdivision 2a</u>.
An energy conservation improvement plan must state the amount, if any, of low-income
energy conservation improvement funds the <u>public utility or association</u> will contribute to
the energy and conservation account. Contributions must be remitted to the commissioner
by February 1 of each year.

27.7 (c) The commissioner shall establish low-income <u>energy conservation</u> programs to utilize
 27.8 <u>money contributed contributions made</u> to the energy and conservation account under

paragraph (b). In establishing low-income programs, the commissioner shall consult political
subdivisions, utilities, and nonprofit and community organizations, especially organizations
engaged in providing energy and weatherization assistance to low-income persons

households. Money contributed Contributions made to the energy and conservation account 27.12 under paragraph (b) must provide programs for low-income persons households, including 27.13 low-income renters, in the service territory of the public utility or association providing the 27.14 money. The commissioner shall record and report expenditures and energy savings achieved 27.15 as a result of low-income programs funded through the energy and conservation account in 27.16 the report required under subdivision 1c, paragraph $\frac{g}{g}$ (f). The commissioner may contract 27.17 with a political subdivision, nonprofit or community organization, public utility, municipality, 27.18 or cooperative electric association consumer-owned utility to implement low-income 27.19 programs funded through the energy and conservation account. 27.20

(d) A <u>public</u> utility or association may petition the commissioner to modify its required
spending under paragraph (a) if the utility or association and the commissioner have been
unable to expend the amount required under paragraph (a) for three consecutive years.

27.24 (e) The commissioner must develop and establish guidelines to determine the eligibility

27.25 of multifamily buildings to participate in low-income energy conservation programs.

27.26 Notwithstanding the definition of low-income household in section 216B.2402, for purposes

27.27 of determining the eligibility of multifamily buildings for low-income programs, a public

27.28 <u>utility may apply the most recent guidelines published by the department. The commissioner</u>

27.29 must convene a stakeholder group to review and update guidelines by July 1, 2021, and at

27.30 least once every five years thereafter. The stakeholder group must include but is not limited

27.31 to representatives of public utilities as defined in section 216B.02, subdivision 4; municipal

27.32 electric or gas utilities; electric cooperative associations; multifamily housing owners and

27.33 developers; and low-income advocates.

SF227	REVISOR	RSI	S0227-1	1st Engrossment
-------	---------	-----	---------	-----------------

- (f) Up to 15 percent of a public utility's spending on low-income programs may be spent 28.1 on preweatherization measures. A public utility is prohibited from claiming energy savings 28.2 from preweatherization measures toward the public utility's energy savings goal. 28.3 (g) The commissioner must, by order, establish a list of preweatherization measures 28.4 28.5 eligible for inclusion in low-income programs no later than March 15, 2021. (h) A Healthy AIR (Asbestos Insulation Removal) account is established as a separate 28.6 account in the special revenue fund in the state treasury. A public utility may elect to 28.7 contribute money to the Healthy AIR account to provide preweatherization measures to 28.8 households eligible for weatherization assistance under section 216C.264. Remediation 28.9 28.10 activities must be executed in conjunction with federal weatherization assistance program services. Money contributed to the account counts toward: (1) the minimum low-income 28.11 spending requirement in paragraph (a); and (2) the cap on preweatherization measures under 28.12 paragraph (f). Money in the account is annually appropriated to the commissioner of 28.13
- commerce to pay for Healthy AIR-related activities. 28.14

28.15 (e) (i) The costs and benefits associated with any approved low-income gas or electric conservation improvement program that is not cost-effective when considering the costs 28.16 and benefits to the public utility may, at the discretion of the utility, be excluded from the 28.17 calculation of net economic benefits for purposes of calculating the financial incentive to 28.18 the public utility. The energy and demand savings may, at the discretion of the public utility, 28.19 be applied toward the calculation of overall portfolio energy and demand savings for purposes 28.20 of determining progress toward annual goals and in the financial incentive mechanism. 28.21

28.22

EFFECTIVE DATE. This section is effective the day following final enactment.

Sec. 15. Minnesota Statutes 2020, section 216B.241, subdivision 8, is amended to read: 28.23

Subd. 8. Assessment. The commission or department may assess public utilities subject 28.24 to this section in proportion to their respective gross operating revenue from sales of gas or 28.25 electric service within the state during the last calendar year to carry out the purposes of 28.26 subdivisions 1d, 1e, and 1f. Those assessments are not subject to the cap on assessments 28.27 provided by section 216B.62, or any other law. 28.28

EFFECTIVE DATE. This section is effective the day following final enactment. 28.29

	rossment
--	----------

29.1	Sec. 16. Minnesota Statutes 2020, section 216B.241, is amended by adding a subdivision
29.2	to read:
29.3	Subd. 11. Programs for efficient fuel-switching improvements; electric utilities. (a)
29.4	On or after June 1, 2023, a public utility providing electric service at retail may include in
29.5	the plan required under subdivision 2 programs to implement efficient fuel-switching
29.6	improvements or combinations of energy conservation improvements, fuel-switching
29.7	improvements, and load management. For each program, the public utility must provide a
29.8	proposed budget, an analysis of the program's cost-effectiveness, and estimated net energy
29.9	and demand savings.
29.10	(b) The department may approve proposed programs for efficient fuel-switching
29.11	improvements if it determines the improvements meet the requirements of paragraph (d).
29.12	For fuel-switching improvements that require the deployment of electric technologies, the
29.13	department must also consider whether the fuel-switching improvement can be operated in
29.14	a manner that facilitates the integration of variable renewable energy into the electric system.
29.15	The net benefits from an efficient fuel-switching improvement that is integrated with an
29.16	energy efficiency program approved under this section may be counted toward the net
29.17	benefits of the energy efficiency program, if the department determines the primary purpose
29.18	and effect of the program is energy efficiency.
29.19	(c) A public utility may file a rate schedule with the commission that provides for annual
29.20	cost recovery of reasonable and prudent costs to implement and promote efficient
29.21	fuel-switching programs. The commission may not approve a financial incentive to encourage
29.22	efficient fuel-switching programs operated by a public utility providing electric service.
29.23	(d) A fuel-switching improvement is deemed efficient if, applying the technical criteria
29.24	established under section 216B.241, subdivision 1d, paragraph (b), the improvement meets
29.25	the following criteria, relative to the fuel that is being displaced:
29.26	(1) results in a net reduction in the amount of source energy consumed for a particular
29.27	use, measured on a fuel-neutral basis;
29.28	(2) results in a net reduction of statewide greenhouse gas emissions as defined in section
29.29	216H.01, subdivision 2, over the lifetime of the improvement. For an efficient fuel-switching
29.30	improvement installed by an electric utility, the reduction in emissions must be measured
29.31	based on the hourly emission profile of the electric utility, using the hourly emissions profile
29.32	in the most recent resource plan approved by the commission under section 216B.2422;
29.33	(3) is cost-effective, considering the costs and benefits from the perspective of the utility,

29.34 participants, and society; and

	SF227	REVISOR	RSI	S0227-1	1st Engrossment
30.1	(4) is installe	ed and operated in	a manner that	improves the utility's	system load factor.
30.2	(e) For purpo	oses of this subdivi	ision, "source e	energy" means the tota	l amount of primary
30.3				ted for losses in gener	
30.4		, and expressed on			<u>.</u>
					1
30.5	EFFECTIV	E DATE. This see	ction is effectiv	ve the day following fi	nal enactment.
30.6	Sec. 17. Minne	esota Statutes 2020	0, section 216E	3.241, is amended by a	dding a subdivision
30.7	to read:				
30.8	<u>Subd. 12.</u> Pr	ograms for effici	ent fuel-swite	hing improvements;	natural gas
30.9	utilities. (a) On	or after June 1, 202	23, as part of a	public utility's plan file	d under subdivision
30.10	2, a public utility	that provides natu	ral gas service	to Minnesota retail cus	tomers may propose
30.11	one or more prog	grams to install ele	ectric technolog	gies that reduce the con	sumption of natural
30.12	gas by the utility	y's retail customer	s as an energy	conservation improver	ment. The
30.13	commissioner m	ay approve a prop	osed program	if the commissioner, ap	plying the technical
30.14	criteria develope	ed under section 2	16B.241, subd	ivision 1d, paragraph (b), determines that:
30.15	(1) the electr	ric technology to b	e installed me	ets the criteria establis	hed under section
30.16	216B.241, subd	ivision 11, paragra	aph (d), clauses	s (1) and (2); and	
30.17	(2) the progr	am is cost-effectiv	ve, considering	the costs and benefits	to ratepayers, the
30.18	utility, participar	nts, and society.			
30.19	(b) If a progr	am is approved by	the commission	on under this subdivision	on, the public utility
30.20	may count the p	rogram's energy s	avings toward	its energy savings goa	l under section

APPENDIX Repealed Minnesota Statutes: S0227-1

216B.241 ENERGY CONSERVATION IMPROVEMENT.

Subdivision 1. **Definitions.** For purposes of this section and section 216B.16, subdivision 6b, the terms defined in this subdivision have the meanings given them.

(a) "Commission" means the Public Utilities Commission.

(b) "Commissioner" means the commissioner of commerce.

(c) "Department" means the Department of Commerce.

(d) "Energy conservation" means demand-side management of energy supplies resulting in a net reduction in energy use. Load management that reduces overall energy use is energy conservation.

(e) "Energy conservation improvement" means a project that results in energy efficiency or energy conservation. Energy conservation improvement may include waste heat that is recovered and converted into electricity, but does not include electric utility infrastructure projects approved by the commission under section 216B.1636. Energy conservation improvement also includes waste heat recovered and used as thermal energy.

(f) "Energy efficiency" means measures or programs, including energy conservation measures or programs, that target consumer behavior, equipment, processes, or devices designed to produce either an absolute decrease in consumption of electric energy or natural gas or a decrease in consumption of electric energy or natural gas on a per unit of production basis without a reduction in the quality or level of service provided to the energy consumer.

(g) "Gross annual retail energy sales" means annual electric sales to all retail customers in a utility's or association's Minnesota service territory or natural gas throughput to all retail customers, including natural gas transportation customers, on a utility's distribution system in Minnesota. For purposes of this section, gross annual retail energy sales exclude:

(1) gas sales to:

(i) a large energy facility;

(ii) a large customer facility whose natural gas utility has been exempted by the commissioner under subdivision 1a, paragraph (b), with respect to natural gas sales made to the large customer facility; and

(iii) a commercial gas customer facility whose natural gas utility has been exempted by the commissioner under subdivision 1a, paragraph (c), with respect to natural gas sales made to the commercial gas customer facility; and

(2) electric sales to a large customer facility whose electric utility has been exempted by the commissioner under subdivision 1a, paragraph (b), with respect to electric sales made to the large customer facility.

(h) "Investments and expenses of a public utility" includes the investments and expenses incurred by a public utility in connection with an energy conservation improvement, including but not limited to:

(1) the differential in interest cost between the market rate and the rate charged on a no-interest or below-market interest loan made by a public utility to a customer for the purchase or installation of an energy conservation improvement;

(2) the difference between the utility's cost of purchase or installation of energy conservation improvements and any price charged by a public utility to a customer for such improvements.

(i) "Large customer facility" means all buildings, structures, equipment, and installations at a single site that collectively (1) impose a peak electrical demand on an electric utility's system of not less than 20,000 kilowatts, measured in the same way as the utility that serves the customer facility measures electrical demand for billing purposes or (2) consume not less than 500 million cubic feet of natural gas annually. In calculating peak electrical demand, a large customer facility may include demand offset by on-site cogeneration facilities and, if engaged in mineral extraction, may aggregate peak energy demand from the large customer facility's mining and processing operations.

(j) "Large energy facility" has the meaning given it in section 216B.2421, subdivision 2, clause (1).

APPENDIX Repealed Minnesota Statutes: S0227-1

(k) "Load management" means an activity, service, or technology to change the timing or the efficiency of a customer's use of energy that allows a utility or a customer to respond to wholesale market fluctuations or to reduce peak demand for energy or capacity.

(l) "Low-income programs" means energy conservation improvement programs that directly serve the needs of low-income persons, including low-income renters.

(m) "Qualifying utility" means a utility that supplies the energy to a customer that enables the customer to qualify as a large customer facility.

(n) "Waste heat recovered and used as thermal energy" means capturing heat energy that would otherwise be exhausted or dissipated to the environment from machinery, buildings, or industrial processes and productively using such recovered thermal energy where it was captured or distributing it as thermal energy to other locations where it is used to reduce demand-side consumption of natural gas, electric energy, or both.

(o) "Waste heat recovery converted into electricity" means an energy recovery process that converts otherwise lost energy from the heat of exhaust stacks or pipes used for engines or manufacturing or industrial processes, or the reduction of high pressure in water or gas pipelines.

Subd. 1b. **Conservation improvement by cooperative association or municipality.** (a) This subdivision applies to:

(1) a cooperative electric association that provides retail service to more than 5,000 members;

(2) a municipality that provides electric service to more than 1,000 retail customers; and

(3) a municipality with more than 1,000,000,000 cubic feet in annual throughput sales to natural gas retail customers.

(b) Each cooperative electric association and municipality subject to this subdivision shall spend and invest for energy conservation improvements under this subdivision the following amounts:

(1) for a municipality, 0.5 percent of its gross operating revenues from the sale of gas and 1.5 percent of its gross operating revenues from the sale of electricity, excluding gross operating revenues from electric and gas service provided in the state to large electric customer facilities; and

(2) for a cooperative electric association, 1.5 percent of its gross operating revenues from service provided in the state, excluding gross operating revenues from service provided in the state to large electric customer facilities indirectly through a distribution cooperative electric association.

(c) Each municipality and cooperative electric association subject to this subdivision shall identify and implement energy conservation improvement spending and investments that are appropriate for the municipality or association, except that a municipality or association may not spend or invest for energy conservation improvements that directly benefit a large energy facility or a large electric customer facility for which the commissioner has issued an exemption under subdivision 1a, paragraph (b).

(d) Each municipality and cooperative electric association subject to this subdivision may spend and invest annually up to ten percent of the total amount required to be spent and invested on energy conservation improvements under this subdivision on research and development projects that meet the definition of energy conservation improvement in subdivision 1 and that are funded directly by the municipality or cooperative electric association.

(e) Load-management activities may be used to meet 50 percent of the conservation investment and spending requirements of this subdivision.

(f) A generation and transmission cooperative electric association that provides energy services to cooperative electric associations that provide electric service at retail to consumers may invest in energy conservation improvements on behalf of the associations it serves and may fulfill the conservation, spending, reporting, and energy-savings goals on an aggregate basis. A municipal power agency or other not-for-profit entity that provides energy service to municipal utilities that provide electric service at retail may invest in energy conservation improvements on behalf of the municipal utilities it serves and may fulfill the conservation, spending, reporting, and energy-savings goals on an aggregate basis, under an agreement between the municipal power agency or not-for-profit entity for funding the investments.

(g) Each municipality or cooperative shall file energy conservation improvement plans by June 1 on a schedule determined by order of the commissioner, but at least every three years. Plans received by June 1 must be approved or approved as modified by the commissioner by December

APPENDIX Repealed Minnesota Statutes: S0227-1

1 of the same year. The municipality or cooperative shall provide an evaluation to the commissioner detailing its energy conservation improvement spending and investments for the previous period. The evaluation must briefly describe each conservation program and must specify the energy savings or increased efficiency in the use of energy within the service territory of the utility or association that is the result of the spending and investments. The evaluation must analyze the cost-effectiveness of the utility's or association's conservation programs, using a list of baseline energy and capacity savings assumptions developed in consultation with the department. The commissioner shall review each evaluation and make recommendations, where appropriate, to the municipality or association to increase the effectiveness of conservation improvement activities.

(h) The commissioner shall consider and may require a utility, association, or other entity providing energy efficiency and conservation services under this section to undertake a program suggested by an outside source, including a political subdivision, nonprofit corporation, or community organization.

Subd. 2c. **Performance incentives.** By December 31, 2008, the commission shall review any incentive plan for energy conservation improvement it has approved under section 216B.16, subdivision 6c, and adjust the utility performance incentives to recognize making progress toward and meeting the energy-savings goals established in subdivision 1c.

Subd. 4. Federal law prohibitions. If investments by public utilities in energy conservation improvements are in any manner prohibited or restricted by federal law and there is a provision under which the prohibition or restriction may be waived, then the commission, the governor, or any other necessary state agency or officer shall take all necessary and appropriate steps to secure a waiver with respect to those public utility investments in energy conservation improvements included in this section.

Subd. 10. Waste heat recovery; thermal energy distribution. Demand-side natural gas or electric energy displaced by use of waste heat recovered and used as thermal energy, including the recovered thermal energy from a cogeneration or combined heat and power facility, is eligible to be counted towards a utility's natural gas or electric energy savings goals, subject to department approval.
