60.25	ARTICLE 4	
60.26	MISCELLANEOUS	
60.27	<u>Section 1. [16B.324] STATE BUILDINGS, RENEWABLE ENERGY PRODUCTION</u>	
60.28	<u>ACCOUNT.</u>	
60.29	<u>Subdivision 1. Definitions. (a) For the purposes of this section, the following terms have</u>	
60.30	<u>the meanings given them.</u>	

(b) "Renewable energy production improvement" means the predesign, design, acquisition, construction, or installation of a renewable energy production project for a state building that is designed to result in a demand-side net reduction in energy use by the state building's electrical, heating, ventilating, air-conditioning, or hot water systems.

(c) "State agency" has the meaning given in section 15.01 and includes the Office of Higher Education, Housing Finance Agency, Pollution Control Agency, Metropolitan Council, Information Technology Services, and Bureau of Mediation Services.

(d) "State building" means a building owned by the state of Minnesota.

Subd. 2. **Establishment.** A state building renewable energy production account is established to provide funds to state agencies to design, construct, and equip renewable energy production improvement projects at state buildings.

Subd. 3. **Account management.** The commissioner shall manage and administer the state building renewable energy production account through the Office of Enterprise Sustainability.

Subd. 4. **Applications.** A state agency applying for renewable energy production improvement funds must submit an application to the commissioner on a form, in the manner, and at the time prescribed by the commissioner. An applicant must supply the following information:

(1) the total estimated cost of the renewable energy production improvements project and the amount sought;

(2) a description of the renewable energy production improvements project;

(3) a detailed budget for the project, including all sources and uses of money;

(4) calculations sufficient to demonstrate the expected monetary savings that will result from construction and installation of the renewable energy production improvements project; and

(5) any additional information requested by the commissioner.

Sec. 2. **[116.196] STORMWATER CONSTRUCTION GRANT PROGRAM.**

Subdivision 1. **Purposes; public interest; declaration of policy.** The legislature finds that enhanced stormwater infrastructure is needed to properly manage stormwater from frequent, heavy rain and other weather events that have increased community flooding due to aging and undersized stormwater systems; that managing stormwater also protects state natural resources and the health, safety, and welfare of its citizens; that opportunities to

62.1 upgrade stormwater infrastructure are not being fully realized by individual political
62.2 subdivisions, Tribal governments, or by agreements among subdivisions; and that therefore
62.3 it is necessary to provide capital assistance to allow for the planning and installation of
62.4 stormwater infrastructure that can manage increases in precipitation and other causes of
62.5 runoff.

62.6 Subd. 2. **Administration; assurance of funds.** The commissioner may provide technical
62.7 and financial assistance for the development and improvement of stormwater infrastructure
62.8 from appropriations made for the purposes of this section. Money appropriated for the
62.9 purposes of this program must be distributed as grants. An individual project may receive
62.10 grants up to 80 percent of the capital cost of the project.

62.11 Subd. 3. **Program established.** The commissioner shall establish a stormwater
62.12 infrastructure funding program to provide supplemental assistance to political subdivisions
62.13 and Tribal governments. When money is appropriated for grants under this program, the
62.14 commissioner shall award grants to political subdivisions and Tribal governments up to a
62.15 maximum of \$5,000,000 per project to cover up to 80 percent of the cost of each stormwater
62.16 infrastructure project necessary to:

- 62.17 (1) increase stormwater system capacity or stormwater storage;
62.18 (2) address environmental damage caused by weather extremes;
62.19 (3) prevent localized flooding;
62.20 (4) create stormwater systems that can manage flows from heavy rains;
62.21 (5) address public safety concerns caused by undersized stormwater systems; or
62.22 (6) ensure continuation of critical services during severe weather.

62.23 Subd. 4. **Grant application.** Application for a grant must be made on a form prescribed
62.24 by the commissioner, including a project schedule and cost estimate for the work necessary
62.25 to comply with the requirements listed in subdivision 1.

62.26 Subd. 5. **Grant approval.** The commissioner shall not grant money for an eligible project
62.27 unless:

- 62.28 (1) the applicant has submitted the as-bid cost for the stormwater infrastructure project;
62.29 and
62.30 (2) the project has been determined to be grant eligible.

63.1 Subd. 6. **Grant disbursement.** Disbursement of a grant must be made for eligible project
63.2 costs as incurred by the political subdivision or Tribal government and in accordance with
63.3 applicable state and federal laws and rules governing the payments.

63.4 Sec. 3. **[174.09] TRANSPORTATION FACILITIES CAPITAL PROGRAM.**

63.5 Subdivision 1. **Establishment; accounts** (a) A transportation facilities capital program
63.6 is established to prioritize among eligible projects that:

63.7 (1) support the programmatic mission of the department;

63.8 (2) extend the useful life of existing buildings; or

63.9 (3) renovate or construct facilities to meet the department's current and future operational
63.10 needs.

63.11 (b) Projects under the transportation facilities capital program are funded by proceeds
63.12 from the sale of trunk highway bonds or from other funds appropriated for the purposes of
63.13 this section.

63.14 (c) A transportation facilities capital account is established in the trunk highway fund.
63.15 The account consists of all money appropriated from the trunk highway fund for the purposes
63.16 of this section and any other money donated, allotted, transferred, or otherwise provided to
63.17 the account by law. Money in the account is appropriated to the commissioner for the
63.18 purposes specified and consistent with the standards and criteria set forth in this section.

63.19 (d) A transportation facilities capital account is established in the bond proceeds account
63.20 of the trunk highway fund. The account consists of trunk highway bond proceeds appropriated
63.21 to the commissioner. Money in the account may only be expended on trunk highway
63.22 purposes, which includes the purposes in this section.

63.23 Subd. 2. **Standards.** (a) Minnesota Constitution, article XIV, section 11, states that trunk
63.24 highway bonds may be issued to finance the construction, improvement, and maintenance
63.25 of the public highway system in the state. The legislature assumes that many projects for
63.26 preservation and replacement of portions of existing capital assets will constitute the
63.27 construction, improvement, maintenance of the public highway system within the meaning
63.28 of the constitution and capital expenditures under generally accepted accounting principles,
63.29 and will be financed more efficiently and economically under the program than by direct
63.30 appropriations for specific projects.

63.31 (b) When allocating funding under this section, the commissioner must review the
63.32 projects deemed eligible under subdivision 3 and prioritize allocations using the criteria in

64.1 subdivision 4. Money allocated to a specific project in an appropriation or other law must
64.2 be allocated as provided by the law.

64.3 Subd. 3. **Eligible expenditures; limitations.** (a) A project is eligible under this section
64.4 only if it is a capital expenditure on a capital building asset owned or to be owned by the
64.5 state within the meaning of accepted accounting principles as applied to public expenditures.

64.6 (b) Capital budget expenditures that are eligible under this section include but are not
64.7 limited to: acquisition of land and buildings and the predesign, design, engineering,
64.8 construction, furnishing, and equipping of district headquarter buildings, truck stations, salt
64.9 storage or other unheated storage buildings, deicing and anti-icing facilities, fuel-dispensing
64.10 facilities, highway rest areas, and vehicle weigh and inspection stations.

64.11 Subd. 4. **Criteria for priorities.** When prioritizing funding allocation among projects
64.12 eligible under subdivision 3, the commissioner must consider:

64.13 (1) whether a project ensures the effective and efficient condition and operation of the
64.14 facility;

64.15 (2) the urgency in ensuring the safe use of existing buildings;

64.16 (3) the project's total life-cycle cost;

64.17 (4) additional criteria for priorities otherwise specified in law, statute, or rule that applies
64.18 to a category listed in the act making an appropriation for the program; and

64.19 (5) any other criteria the commissioner deems necessary.

Sec. 8. Minnesota Statutes 2020, section 446A.072, subdivision 5a, is amended to read:

Subd. 5a. **Type and amount of assistance.** (a) For a governmental unit receiving grant funding from the USDA/RECD, the authority may provide assistance in the form of a grant of up to 65 percent of the eligible grant need determined by USDA/RECD. A governmental unit may not receive a grant under this paragraph for more than ~~\$5,000,000~~ \$8,000,000 per project or \$20,000 per existing connection, whichever is less, unless specifically approved by law.

(b) For a governmental unit receiving a loan from the clean water revolving fund under section 446A.07, the authority may provide assistance under this section in the form of a grant if the average annual residential wastewater system cost after completion of the project would otherwise exceed 1.4 percent of the median household income of the project service area. In determining whether the average annual residential wastewater system cost would exceed 1.4 percent, the authority must consider the total costs associated with building, operating, and maintaining the wastewater system, including existing wastewater debt

67.1 service, debt service on the eligible project cost, and operation and maintenance costs. Debt
67.2 service costs for the proposed project are calculated based on the maximum loan term
67.3 permitted for the clean water revolving fund loan under section 446A.07, subdivision 7.
67.4 The amount of the grant is equal to 80 percent of the amount needed to reduce the average
67.5 annual residential wastewater system cost to 1.4 percent of median household income in
67.6 the project service area, to a maximum of ~~\$5,000,000~~ \$8,000,000 per project or \$20,000
67.7 per existing connection, whichever is less, unless specifically approved by law. The eligible
67.8 project cost is determined by multiplying the total project costs minus any other grants by
67.9 the essential project component percentage calculated under subdivision 3, paragraph (c),
67.10 clause (1). In no case may the amount of the grant exceed 80 percent of the eligible project
67.11 cost.

67.12 (c) For a governmental unit receiving a loan from the drinking water revolving fund
67.13 under section 446A.081, the authority may provide assistance under this section in the form
67.14 of a grant if the average annual residential drinking water system cost after completion of
67.15 the project would otherwise exceed 1.2 percent of the median household income of the
67.16 project service area. In determining whether the average annual residential drinking water
67.17 system cost would exceed 1.2 percent, the authority must consider the total costs associated
67.18 with building, operating, and maintaining the drinking water system, including existing
67.19 drinking water debt service, debt service on the eligible project cost, and operation and
67.20 maintenance costs. Debt service costs for the proposed project are calculated based on the
67.21 maximum loan term permitted for the drinking water revolving fund loan under section
67.22 446A.081, subdivision 8, paragraph (c). The amount of the grant is equal to 80 percent of
67.23 the amount needed to reduce the average annual residential drinking water system cost to
67.24 1.2 percent of median household income in the project service area, to a maximum of
67.25 ~~\$5,000,000~~ \$8,000,000 per project or \$20,000 per existing connection, whichever is less,
67.26 unless specifically approved by law. The eligible project cost is determined by multiplying
67.27 the total project costs minus any other grants by the essential project component percentage
67.28 calculated under subdivision 3, paragraph (c), clause (1). In no case may the amount of the
67.29 grant exceed 80 percent of the eligible project cost.

67.30 (d) Notwithstanding the limits in paragraphs (a), (b), and (c), for a governmental unit
67.31 receiving supplemental assistance under this section after January 1, 2002, if the authority
67.32 determines that the governmental unit's construction and installation costs are significantly
67.33 increased due to geological conditions of crystalline bedrock or karst areas and discharge
67.34 limits that are more stringent than secondary treatment, the maximum award under this
67.35 section shall not be more than \$25,000 per existing connection.

68.1 Sec. 9. Minnesota Statutes 2020, section 446A.081, subdivision 8, is amended to read:

68.2 Subd. 8. **Loan conditions.** (a) When making loans from the drinking water revolving
68.3 fund, the authority shall comply with the conditions of the federal Safe Drinking Water Act,
68.4 including the criteria in this subdivision.

68.5 (b) Loans must be made at or below market interest rates, including zero interest loans,
68.6 for terms not to exceed those allowed under the federal Safe Drinking Water Act.

68.7 (c) The annual principal and interest payments must begin no later than one year after
68.8 completion of the project. Loans must be amortized no later than 20 years after project
68.9 completion, unless the recipient's average annual residential drinking water system cost
68.10 after completion of the project would exceed 1.2 percent of median household income in
68.11 the recipient governmental unit or entity, in which case the loan must be fully amortized
68.12 no later than 30 years after project completion.

68.13 (d) A loan recipient must identify and establish a dedicated source of revenue for
68.14 repayment of the loan, and provide for a source of revenue to properly operate, maintain,
68.15 and repair the water system.

68.16 (e) The fund must be credited with all payments of principal and interest on all loans,
68.17 except the costs as permitted under section 446A.04, subdivision 5, paragraph (a).

68.18 (f) A loan may not be used to pay operating expenses or current obligations, unless
68.19 specifically allowed by the federal Safe Drinking Water Act.

68.20 (g) A loan made by the authority must be secured by notes or bonds of the governmental
68.21 unit and collateral to be determined by the authority for private borrowers.

68.22 (h) Notwithstanding Minnesota Rules, part 7380.0272, the interest rate for loans made
68.23 for the replacement of lead service lands shall be zero percent.

68.24 Sec. 10. Minnesota Statutes 2020, section 446A.081, subdivision 9, is amended to read:

68.25 Subd. 9. **Other uses of fund.** (a) The drinking water revolving loan fund may be used
68.26 as provided in the act, including the following uses:

68.27 (1) to buy or refinance the debt obligations, at or below market rates, of public water
68.28 systems for drinking water systems, where the debt was incurred after the date of enactment
68.29 of the act, for the purposes of construction of the necessary improvements to comply with
68.30 the national primary drinking water regulations under the federal Safe Drinking Water Act;

68.31 (2) to purchase or guarantee insurance for local obligations to improve credit market
68.32 access or reduce interest rates;

69.1 (3) to provide a source of revenue or security for the payment of principal and interest

69.14 established for drinking water projects under the water infrastructure funding program under
69.15 section 446A.072;

69.16 (9) to provide loans, principal forgiveness or grants to the extent permitted under the
69.17 federal Safe Drinking Water Act and other federal law to address green infrastructure, water
69.18 or energy efficiency improvements, or other environmentally innovative activities;

69.19 (10) to provide principal forgiveness, or grants for 80 percent of project costs up to a
69.20 maximum of \$100,000 for projects needed to comply with national primary drinking water
69.21 standards for an existing nonmunicipal community public water system; and

69.22 (11) to provide principal forgiveness or grants to the extent permitted under the federal
69.23 Safe Drinking Water Act and other federal laws for 50 percent of the project costs up to a
