

HB 2494 -- CALCULATIONS OF STATE AID FOR SCHOOL DISTRICTS

SPONSOR: Quade

This bill creates a new definition for "weighted average daily attendance" as the term is used for the calculation of state aid to public schools. Beginning with the 2025-26 school year, the new definition uses the average daily enrollment of a school district with specific multipliers for free and reduced price lunch pupils, special education pupils, and limited english proficiency pupils.
