Bill Summary: This proposal establishes provisions relating to assessment of virtual school students.

FISCAL SUMMARY

Total Estimated Net Effect on General Revenue	More or less than (\$558,719)	More or less than (\$364,675)	More or less than (\$370,662)

*Oversight notes that the proposal states that any virtual school or program may administer any statewide assessment required pursuant to the provisions of section 160.518 in a virtual setting that aligns with the student’s regular academic instruction. Therefore, the costs (student technology, Data Forensics/Test Security, and DRC for development/scoring/reporting) combined could exceed the \$250,000 threshold.

FISCAL ANALYSIS

ASSUMPTION

Officials from **Department of Elementary and Secondary Education (DESE)** state Section 161.670 would allow the virtual administration of the statewide assessment of students enrolled in virtual school.

The Missouri Technical Advisory Committee for Assessment recommends that the Department of Elementary and Secondary Education (DESE) create a separate test form to meet the requirements as outlined and to limit the exposure of the item bank used for all assessments. Estimated cost:

1. Data Recognition Corporation (DRC) currently is contracted to do similar work and DESE assumes would be responsible for the development of forms (tests), scoring, and reporting either through a contract amendment or a new contract. Based on the current contract costs, fourteen forms will need to be developed for grade levels: 3-8 English Language Arts, 3-8 Mathematics, 5 & 8 Science (\$73,941 year one) and ten forms will need to be developed for end-of-course English 1 & 2, Algebra 1 & 2, Geometry, Government, Biology, Physical Science, American History, and Personal Finance (\$69,978 year one). Annual costs for the first four years would be:

FY 2025 - \$143,919
FY 2026 - \$149,675
FY 2027 - \$155,662
FY 2028 - \$161,688

2. \$200,000 annually for data forensics and test security.

3. \$214,800 for camera and communication devices necessary for remote test administration. DESE assumes the state would be responsible for providing these to vendors with an estimated cost per camera = \$30 per x 7,160 unduplicated count of students enrolled in MoCAP = \$214,800. This equipment would be returned to vendors with an estimated annual need to replace a minimum number. Annual replacement cost is estimated at \$15,000.

Oversight notes that the proposal states that any virtual school or program may administer any statewide assessment required pursuant to the provisions of section 160.518 in a virtual setting that aligns with the student's regular academic instruction. Oversight is unable to determine how many virtual schools or programs will decide to administer virtual assessments.

In addition, the cost of camera and communication devices necessary for remote test administration could potentially vary depending on compatibility with specific devices as well as the required wide degree angle of view in order to meet the requirements of the proposal.

Therefore, Oversight will reflect a \$0 (no participation in virtual assessment) to a fiscal impact that could exceed the estimate provided by DESE in the fiscal note.

Officials from the **Concordia R-II School District** assume the proposal will have no fiscal impact on their organization.

Officials from the **Henry County R-1 School District** assume the proposal will have a fiscal impact on their organization.

Oversight does not anticipate a fiscal impact to school districts. However, Oversight received limited responses from school districts related to the fiscal impact of this proposal. Oversight has presented this fiscal note on the best current information available. Upon the receipt of additional responses, Oversight will review to determine if an updated fiscal note should be prepared and seek approval to publish a new fiscal note.

Oversight only reflects the responses received from state agencies and political subdivisions; however, school districts were requested to respond to this proposed legislation but did not. A listing of political subdivisions included in the Missouri Legislative Information System (MOLIS) database is available upon request.

FISCAL DESCRIPTION

This act provides that any virtual school or program that is part of the Missouri Course Access and Virtual School Program may administer any statewide assessment virtually. The act outlines requirements for such virtual assessments, including the monitoring of students via a camera and the maintaining of a student-to-proctor ratio that is targeted at 10-1 or lower.

This legislation is not federally mandated, would not duplicate any other program and would not require additional capital improvements or rental space.
