1 A. The board shall identify prescription drug
2 products that are:

3 (1) brand name drugs or biologics that, as
4 adjusted annually for inflation in accordance with the consumer
5 price index published by the bureau of labor statistics of the

25 dosage approved for labeling by the United States food and drug

.218723.3

1 administration; 2) a supply lasting a patient for fewer than
2 thirty days based on the recommended dosage approved for

6 dosage; and

7 (b) that increased by two hundred

12 months; and

13 (4) other prescription drug products that may
14 create affordability challenges for the state health care
15 system and patients, in consultation with the stakeholder
16 council.

17 B. After identifying prescription drug products as
18 required by Subsection A of this section, the board shall
19 determine whether to conduct an affordability review for each

21 (1) seeking stakeholder council input about
22 the prescription drug product; and

23 (2) considering the average patient cost share
24 of the prescription drug product.

6 and the estimated value or cost-effectiveness of the

10 affordability review does not affect the authority of the board
11 to conduct such a review.

12 E. If the board conducts a review of the cost and
13 affordability of a prescription drug product, the review shall
14 determine whether use of the prescription drug product that is
15 fully consistent with the labeling approved by the United
16 States food and drug administration or standard medical
17 practice has led or will lead to affordability challenges for
18 the state health care system or high out-of-pocket costs for
19 patients. To the extent practicable, in determining whether a
20 prescription drug product has led or will lead to an
21 affordability challenge, the board shall consider the following
22 factors:

23 (1) the wholesale acquisition cost for the
24 prescription drug product sold in the state;

25 (2) the average monetary price concession,

1 discount or rebate the manufacturer provides to health plans in

3 state as reported by manufacturers and health plans, expressed

5 prescription drug product under review;

6 (3) the total amount of the price concession,
7 discount or rebate the manufacturer provides to each pharmacy
8 benefits manager operating in the state for the prescription
9 drug product under review, as reported by manufacturers and
10 pharmacy benefits managers, expressed as a percent of the
11 wholesale acquisition costs;

12 (4) the price at which therapeutic
13 alternatives have been sold in the state;

14 (5) the average monetary concession, discount
15 or rebate the manufacturer provides or is expected to provide
16 to health plan payers and pharmacy benefits managers in the
17 state for therapeutic alternatives;

19 access consistent with United States food and drug
20 administration labeled indications and recognized standard
21 medical practice;

22 (7) the impact on patient access resulting
23 from the cost of the prescription drug product relative to
24 insurance benefit design;

25 (8) the current or expected dollar value of

.218723.3

1 drug-specific patient access programs that are supported by the
2 manufacturer;

3 (9) the relative financial impacts to health,
4 medical or social services costs as can be quantified and
5 compared to baseline effects of existing therapeutic
6 alternatives;

7 (10) the average patient copayment or other
8 cost sharing for the prescription drug product in the state;

9 (11) any information a manufacturer chooses to
10 provide; and

11 (12) any other factors as required by rule
12 promulgated by the board.

13 F. If the board finds the spending on a
14 prescription drug product reviewed pursuant to this section has
15 led or will lead to an affordability challenge, the board shall
16 establish an upper payment limit after considering:

17 (1) the cost of administering the drug;

18 (2) the cost of delivering the drug to
19 consumers; and

20 (3) other relevant administrative costs
21 related to the drug.

22 G. The upper payment limit shall apply to all
23 purchases and payer reimbursements of the prescription drug
