AN ACT relating to mining; revising the application requirements for obtaining a permit to engage in an exploration project or mining operation; prohibiting certain persons from obtaining such a permit; and providing other matters properly relating thereto.

Legislative Counsel’s Digest:

Existing law prohibits a person from engaging in certain exploration projects or mining operations without a permit issued for that purpose by the Division of Environmental Protection of the State Department of Conservation and Natural Resources. (NRS 519A.180, 519A.200) Existing law further: (1) requires certain information to be included in an application for such a permit, including the name and address of the applicant and, if the applicant is a corporation or other business entity, the name and address of its principal officers; and (2) prohibits the issuance of such a permit to an applicant who is in default on any obligation relating to reclamation. (NRS 519A.190, 519A.210)

Sections 1 and 2 of this bill require an applicant for such a permit who is a corporation or business entity to submit with the application the name and address of each person who has a controlling interest in the corporation or business entity. Sections 1 and 2 further require an applicant to submit an affidavit that states whether or not the applicant and each person who has a controlling interest in the corporation or business entity is in good standing with all agencies of other states and federal agencies in relation to exploration projects or mining operations outside of this State.

Sections 1 and 2 prohibit the issuance of a permit to any applicant that is a corporation or other business entity if any person who has a controlling interest in the corporation or business entity has or previously had a controlling interest in another corporation or business entity that has defaulted on any obligation relating to reclamation unless the applicant: (1) pays the full amount of the defaulted
obligation or provides evidence of satisfaction of the defaulted obligation; and (2)
demonstrates that the conditions which led to the default have been remedied and
no longer exist.

Sections 1 and 2 further prohibit the issuance of a permit if the applicant or, if
the applicant is a corporation or other business entity, a person who has a
controlling interest in the corporation or business entity is not in good standing with
an agency of another state or a federal agency in relation to an exploration project
or mining operation outside of this State unless the applicant or person who has a
controlling interest remedies all issues relating to the exploration project or mining
operation outside of this State and becomes in good standing with all agencies of
the other state and federal agencies.
