Health and Human Services

CHAPTER.....

AN ACT relating to public health; requiring certain reports relating to sentinel events to be made available to the public; revising provisions relating to the use and release of certain information submitted to the Internet-based surveillance system established by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services; and providing other matters properly relating thereto.

Legislative Counsel's Digest:

Existing law requires certain medical facilities to submit to the Health Division of the Department of Health and Human Services reports of sentinel events. (NRS 439.835) The term “sentinel event” is defined for the purposes of these reports to mean an unexpected occurrence involving facility-acquired infection, death or serious physical or psychological injury or the risk thereof. (NRS 439.830) The Health Division is required to prepare annual reports concerning those reports which were submitted by medical facilities located in a county whose population is 100,000 or more (currently Clark and Washoe Counties). (NRS 439.840) **Section 1** of this bill requires the Health Division to make those annual reports available on the Department’s website.

Existing law requires medical facilities which provide care to 25 or more patients per day to submit information to the Internet-based surveillance system established and maintained by the Centers for Disease Control and Prevention of the United States Department of Health and Human Services and requires the Health Division to analyze that information. (NRS 439.847) **Section 2** of this bill requires the Health Division to report that information publicly in a format which allows comparisons of medical facilities.
