AN ACT relating to water; requiring the State Engineer to consider certain conveyances or purported conveyances to be void; revising provisions which require the State Engineer to examine certain reports of conveyance and make determinations concerning those reports; and providing other matters properly relating thereto.

**Legislative Counsel’s Digest:**

1 Existing law requires that every conveyance of an application or permit to  
2 appropriate any of the public waters, a certificate of appropriation, an adjudicated  
3 or unadjudicated water right or an application or permit to change the place of  
4 diversion, manner of use or place of use of water must be: (1) made by deed; (2)  
5 notarized; and (3) recorded in the office of the county recorder of each county in  
6 which the water is applied to beneficial use and in each county in which the water  
7 is diverted from its natural source. (NRS 533.382) Existing law also provides that a  
8 deed of conveyance that is not recorded as required is deemed void as against  
9 certain subsequent purchasers who record a deed first. (NRS 533.383) Existing law  
10 requires a person to whom is conveyed an application or permit to appropriate any  
11 of the public waters, a certificate of appropriation, an adjudicated or unadjudicated  
12 water right or an application or permit to change the place of diversion, manner of  
13 use or place of use of water to file with the State Engineer a report of conveyance  
14 which must include certain information, including an abstract of title and a copy of  
15 any deed. (NRS 533.384) Finally, existing law requires the State Engineer, upon  
16 receipt of such a report of conveyance, to confirm certain actions and information  
17 concerning the conveyance, including confirming that no conflict exists in the chain  
18 of title that can be determined from the conveyance documents or other  
19 information. If the State Engineer confirms the report of conveyance, he or she

20 must provide notice of confirmation to the person who submitted the report. If the  
 21 State Engineer determines that the report is deficient, he or she must reject the  
 22 report and return it to the person who submitted the report with an explanation of  
 23 what material must be submitted to cure the deficiency. If the State Engineer  
 24 determines from the report and other documents submitted that there is a conflict in  
 25 the chain of title, he or she must reject the report and return it to the person who  
 26 submitted the report with an explanation that a conflict appears to exist, and with a  
 27 notice that the State Engineer will not take further action with respect to the report  
 28 until a court of competent jurisdiction has made a final determination as to the  
 29 conflicting claims to ownership. (NRS 533.386)

30 **Section 1** of this bill requires that the State Engineer, for the purposes of  
 31 confirming a report of conveyance, to consider as void a conveyance or purported  
 32 conveyance which is not made by deed, notarized and recorded as required. **Section**  
 33 **2** of this bill provides that a deed of conveyance that is not recorded as required  
 34 must be deemed void by the State Engineer for the purposes of confirming a report  
 35 of conveyance. **Section 3** of this bill prohibits the State Engineer from considering  
 36 a void conveyance or a void deed in determining whether or not a conflict exists in  
 37 the chain of title for the purpose of confirming a report of conveyance.
