**Legislative Counsel's Digest:**

1 Existing law establishes provisions governing public hearings on the adequacy  
2 of a utility's plan to increase its supply of electricity or decrease the demands made  
3 on its system. Existing law also authorizes the Commission, in determining the  
4 adequacy of a utility's plan, to give preference to the measures and sources of  
5 supply that meet certain criteria, including providing the greatest economic and  
6 environmental benefits to the State and providing the greatest opportunity for the  
7 creation of new jobs in this State. (NRS 704.746)

8 **Section 1** of this bill requires the Public Utilities Commission of Nevada to  
9 require a utility which supplies electricity in this State to meet with personnel from  
10 the Commission and the Bureau of Consumer Protection in the Office of the  
11 Attorney General and any other interested persons at least 4 months before filing a  
12 resource plan or within a reasonable period before filing an amendment to an  
13 existing plan to provide an overview of the plan or amendment.

14 **Section 6** of this bill requires the Commission to give preference to those  
15 measures and sources of supply that provide the greatest economic and  
16 environmental benefits to the State, as well as those that provide for diverse  
17 electricity supply portfolios and which reduce customer exposure to price volatility  
18 of fossil fuels and the potential costs of carbon. Under **section 6**, in determining the  
19 preference given to such measures and sources of supply, the Commission is  
20 required to consider the cost of those measures and sources of supply to the  
21 customers of the electric utility. **Section 6.5** of this bill requires any order of the  
22 Commission accepting or modifying a utility's plan or an amendment to such plan  
23 to include the Commission's justification for the preferences given to those  
24 measures and sources of supply.
