Legislative Counsel’s Digest:

Existing law requires the Department of Health and Human Services to encourage certain providers of health care or other services to perform a test to determine the amount of lead in the blood of each child receiving services from the provider at certain times. Existing law also requires: (1) certain tests that indicate an elevated amount of lead in the blood to be confirmed by a second test; and (2) each qualified laboratory that conducts a blood test for the presence of lead in a child to report the results to the appropriate health authority. (NRS 442.700) **Section 23** of this bill revises the conditions under which the results of a test are considered to indicate an elevated amount of lead in the blood. **Section 23** also requires offices of providers of health care or other services and medical facilities to report the results of tests of children for lead to the health authority and prescribes the required contents of such a report.

Existing law requires the Director of the Department of Health and Human Services to appoint a committee to research opportunities to increase the availability of diapers and diapering supplies to recipients of public assistance and other low-income families in this State. (NRS 422A.660) **Section 29.5** of this bill creates the Diapering Resources Account and requires the money in the Account to be expended to provide diapers and diapering supplies to such persons. **Section 29.5** requires the State Board of Health, upon the recommendation of the committee, to adopt regulations prescribing: (1) the criteria for determining whether a person qualifies for assistance from the Account; and (2) the procedure for distributing money from the Account. **Section 29.5** also requires the Division of Public and Behavioral Health of the Department to submit to the Legislature an annual report concerning the use of the money in the Account.
