## House Bill 3348

Sponsored by Representatives HOLVEY, SMITH G (at the request of Oregon Building Trades Council)

## **SUMMARY**

The following summary is not prepared by the sponsors of the measure and is not a part of the body thereof subject to consideration by the Legislative Assembly. It is an editor's brief statement of the essential features of the measure **as introduced.** 

Provides that electric company may use electricity to comply with renewable portfolio standard only if electricity is generated by facility that procures electricity in accordance with certain delivery requirements.

## A BILL FOR AN ACT

- 2 Relating to utilities; creating new provisions; and amending ORS 469A.005.
  - Be It Enacted by the People of the State of Oregon:
  - SECTION 1. Section 2 of this 2017 Act is added to and made a part of ORS 469A.005 to 469A.210.
    - SECTION 2. (1) For purposes of ORS 469A.005 to 469A.210, an electric company may use electricity to comply with a renewable portfolio standard only if the electricity is generated by a facility that procures electricity in accordance with one of the following delivery requirements:
    - (a) The facility has a first point of interconnection within the metered boundaries of a balancing authority area of a balancing authority that serves any amount of the electrical load of an electric company in this state;
    - (b) The facility has a first point of interconnection with a distribution facility that is used to serve retail electricity consumers within the metered boundaries of a balancing authority area of a balancing authority that serves any amount of the electrical load of an electric company in this state; or
    - (c) If the facility is not interconnected as described in paragraphs (a) and (b) of this subsection, the electricity procured by the facility is scheduled for delivery to a balancing authority that serves any amount of the electrical load of an electric company in this state without substituting electricity from any other source.
    - (2) For purposes of subsection (1)(c) of this section, the use of any other energy source to provide ancillary services that are necessary to maintain an hourly or subhourly import schedule by the balancing authority is permitted, and electricity generated by the facility may be used for the purpose of complying with the requirements of ORS 469A.005 to 469A.210 even if the amount of electricity generated is different than the amount of electricity necessary to maintain the hourly or subhourly import schedule.
    - **SECTION 3.** ORS 469A.005, as amended by section 3, chapter 28, Oregon Laws 2016, is amended to read:
      - 469A.005. As used in ORS 469A.005 to 469A.210:
    - (1) "Acquires service territory" does not include an acquisition by a city of a facility, plant, equipment or service territory within the boundaries of the city, pursuant to ORS 225.020 or city

charter, if the city:

- (a) Already owns, controls or operates an electric light and power system for supplying electricity to the inhabitants of the city and for general municipal purposes;
- (b) Provides fair, just and reasonable compensation to the electric company whose service territory is acquired that:
- (A) Gives consideration for the service territory rights and the cost of the facility, plant or equipment acquired and for depreciation, fair market value, reproduction cost and any other relevant factor; and
- (B) Is based on the present value of the service territory rights and the facility, plant and equipment acquired, including the value of poles, wires, transformers and similar and related appliances necessarily required to provide electric service; and
- (c) Pays any stranded costs obligation established pursuant to section 18, chapter 28, Oregon Laws 2016.
- (2) "Ancillary services" means services necessary or incidental to the transmission and delivery of electricity from generating facilities to retail electricity consumers.
- (3) "Balancing authority" means the entity responsible for integrating resource plans ahead of time, maintaining load-interchange-generation balance within a balancing authority area and supporting interconnection frequency in real time.
- (4) "Balancing authority area" means the collection of generation, transmission and loads within the metered boundaries of a balancing authority.
- [(2)] (5) "Banked renewable energy certificate" means a bundled or unbundled renewable energy certificate that is not used by an electric utility or electricity service supplier to comply with a renewable portfolio standard in a calendar year, and that is carried forward for the purpose of compliance with a renewable portfolio standard in a subsequent year.
- [(3)] (6) "BPA electricity" means electricity provided by the Bonneville Power Administration, including electricity generated by the Federal Columbia River Power System hydroelectric projects and electricity acquired by the Bonneville Power Administration by contract.
- [(4)] (7) "Bundled renewable energy certificate" means a renewable energy certificate for qualifying electricity that is acquired:
- (a) By an electric utility or electricity service supplier by a trade, purchase or other transfer of electricity that includes the renewable energy certificate that was issued for the electricity; or
- (b) By an electric utility by generation of the electricity for which the renewable energy certificate was issued.
- [(5)] (8) "Compliance year" means the calendar year for which the electric utility or electricity service supplier seeks to establish compliance with the renewable portfolio standard applicable to the electric utility or electricity service supplier in the compliance report submitted under ORS 469A.170.
- [(6)] (9) "Consumer-owned utility" means a municipal electric utility, a people's utility district organized under ORS chapter 261 that sells electricity or an electric cooperative organized under ORS chapter 62.
  - [(7)] (10) "Distribution utility" has the meaning given that term in ORS 757.600.
- [(8)] (11) "Electric company" has the meaning given that term in ORS 757.600.
  - [(9)] (12) "Electric utility" has the meaning given that term in ORS 757.600.
- 44 [(10)] (13) "Electricity service supplier" has the meaning given that term in ORS 757.600.
- 45 [(11)] (14) "Qualifying electricity" means electricity described in ORS 469A.010.

	[(12)] (15)	"Renew	able energy	source"	means a	source	of electricity	described	in ORS	469A	.025
	[(13)] (16)	${\rm ``Retail'}$	electricity	consume	r" means	a retail	electricity	consumer,	as define	ed in	ORS
757.	600, that	is locate	d in Oregor	ı.							

[(14)] (17) "Unbundled renewable energy certificate" means a renewable energy certificate for qualifying electricity that is acquired by an electric utility or electricity service supplier by trade, purchase or other transfer without acquiring the electricity that is associated with the renewable energy certificate.

SECTION 4. Notwithstanding section 2 of this 2017 Act, electricity generated by a facility that does not procure electricity in accordance with the delivery requirements specified in section 2 of this 2017 Act may be used by an electric company to comply with a renewable portfolio standard if that electricity is delivered to the electric company pursuant to a contract or other legal obligation in effect on the effective date of this 2017 Act. A contract or other legal obligation described in this section may not be renewed.
