STATE OF RHODE ISLAND

IN GENERAL ASSEMBLY

JANUARY SESSION, A.D. 2020

A N A C T

RELATING TO INSURANCE -- ACCIDENT AND SICKNESS INSURANCE POLICIES

Introduced By: Senator Dawn M. Euer

Date Introduced: February 25, 2020

Referred To: Senate Health & Human Services

It is enacted by the General Assembly as follows:

1 SECTION 1. Purpose and legislative findings.

2 (a) Purpose. It is the policy of the state of Rhode Island not to permit introduction of
3 pollutants into the ground waters and water systems of the state or otherwise to be discharged in
4 concentrations which are known to be toxic, carcinogenic, mutagenic, or teratogenic as the same
5 are defined in the Rhode Island department of environmental management groundwater quality
6 rules and the rules and regulations for hazardous waste management. More specifically, the Rhode
7 Island department of environmental management, in regulation #DEM OWM-HW 01-14, most
8 recent revision dated January 7, 2014, defines certain antineoplastic or cytotoxic chemotherapy
9 agents and drugs as "Extremely Hazardous Waste."

10 (b) Findings.

11 (1) The Drug Quality and Security Act (H.R. 3204) is a new federal law that amended the
12 Federal Food, Drug, and Cosmetic Act to grant the Food and Drug Administration more authority
13 to regulate and monitor the manufacturing and handling of compounded drugs. This bill was written
14 in response to the New England Compounding Center meningitis outbreak that took place in 2012,
15 which killed sixty-four (64) people. The bill was signed into law by President Obama on November
16 27, 2013.

17 (2) This act mandated that the FDA order the United States Pharmacopeia (USP) to set
18 standards for compounding drugs. USP 800 was published in 2017 and took effect December 1,
19 2019. These standards require the control of certain cytotoxic chemotherapy drugs from the time

1 they arrive at the pharmacy, all the way through excretion of the drugs by the patient.

2 (3) This mandate puts an enormous financial burden on the Rhode Island hospital system,
3 insurance companies, Medicaid and the people of Rhode Island. This cost should be carried by the
4 producers of therapies that are used in combination with cytotoxic drugs as well as the producers
5 of cytotoxic drugs

6 (4) This federal mandate requires that the waste follow all federal, state, and local
7 regulations including #DEM OWM-HW 01-14 which defines "Extremely Hazardous Waste."

8 (5) It is acknowledged by medical experts that bodily wastes of patients undergoing
9 chemotherapy treatment may contain levels of chemicals that are toxic, carcinogenic, mutagenic or
10 teratogenic for a certain period of time, to such an extent that the World Health Organization defines
11 genotoxic waste as chemotherapy drug waste including urine, feces and vomit from patients, which
12 may contain potentially hazardous amounts of the administered cytostatic drugs or of their
13 metabolites, and which should be considered genotoxic for at least forty-eight (48) hours and
14 sometimes up to one week after drug administration. According to the World Health Organization,
15 ten percent (10 %) of known carcinogens are chemicals used to cure cancer.

16 (6) While, according to the American Society of Clinical Oncology, the cost of one
17 additional cancer patient resulting from the exposure to these harmful chemicals is approximately
18 one hundred seventy thousand dollars (\$170,000) per treatment year, the cost of the implementation
19 of cytotoxic chemical safety protocols is estimated to be less than two percent (2%) of that cost.

20 (7) The World Health Organization further states that any discharge of genotoxic waste
21 into the environment could have disastrous ecological consequences. The World Health
22 Organization places the responsibility for genotoxic waste on the chief pharmacist and further states
23 that the chief pharmacist also has the special responsibility of ensuring that genotoxic products are
24 used safely, and that genotoxic waste is managed safely.

25 (8) The European Commission, Executive Agency for Health and Consumers undertook a
26 comprehensive "Study on the environmental risks of medicinal products" which was released in
27 June of 2014, drafted by BIO Intelligence Service, a division of Deloitte Consulting LLP, reviewing
28 the prevalence of contaminants in drinking water and noting the extreme dangers arising from
29 improper disposal of cytotoxic chemotherapy drugs.

30 (9) Dr. Christian G. Daughton, former chief of environmental chemistry for the United
31 States Environmental Protection Agency, notes in a paper entitled "Eco-directed sustainable
32 prescribing: feasibility for reducing water contamination by drugs" published in the journal
33 "Science of the Total Environment" on June 3, 2014, that generally, the best practice for lowering
34 the level of drugs in our environment is reduction of dosages, but that "[c]ertain drug classes

1 (especially cytotoxic chemotherapeutics) may not be amenable to this approach; the best control
2 measure for such highly toxic drugs may simply be the prevention of urine and feces from entering
3 sewers."

4 (10) The federal Occupational Safety and Health Administration ("OSHA") is the main
5 federal agency charged with the enforcement of safety and health legislation. OSHA, in concert
6 with the National Institute for Occupational Safety and Health ("NIOSH") and the Joint
7 Commission on Healthcare, an independent, not-for-profit organization that accredits and certifies
8 more than twenty thousand (20,000) health care organizations and programs in the United States,
9 stated in a 2011 letter to every hospital in the country that "[e]very day in healthcare settings across
10 America, workers are exposed to hundreds of powerful drugs used for cancer chemotherapy,
11 antiviral treatments, hormone regimens and other therapies. While these drugs are used to relieve
12 and heal patients, many of them present serious hazards to the health and safety of your workers.
13 Some of these drugs have been known to cause cancer, reproductive and developmental problems,
14 allergic reactions, and other adverse effects that can be irreversible even after low-level exposures."

15 (11) Further, because of the risk of ongoing exposure to these extremely hazardous
16 excreted drugs, the American Cancer Society has published a comprehensive list of safety
17 precautions regarding the in-home personal hygiene for individuals undergoing chemotherapy and
18 their families.

19 (12) Therefore, for the protection of both the public health and the environment, the general
20 assembly shall require that standards are set forth pursuant to these sections to address this serious
21 health and safety issue.

22 SECTION 2. Chapter 27-18 of the General Laws entitled "Individual Health Insurance
23 Coverage" is hereby amended by adding thereto the following section:

24 **27-18-85. Cancer patient safety and environmental protection.**

25 (a) Chemotherapy precautions following treatment. All physicians, pharmacists, or other
26 health care professionals licensed in the state of Rhode Island authorized to prescribe and/or
27 administer chemotherapy treatment shall:

28 (1) Provide written notice from the prescribing pharmacist to each patient undergoing such
29 treatment as to the hazards posed to patients and their families of extremely hazardous excretions,
30 including, but not limited to, urine, vomit, and feces, for a period following treatment as generally
31 determined by the food and drug administration label accompanying said chemotherapy drug or
32 drugs. To the extent such notices are generally consistent with those now provided for patients
33 undergoing treatment with radioactive drugs, or consistent with the recommendations of the World
34 Health Organization with regard to cytotoxic drugs, or otherwise consistent with similar standards

1 that may be approved by the department of environmental management in the context of a product
2 stewardship plan adopted pursuant to chapter 19.16 of title 23, then the prescribing pharmacist will
3 not be held liable for the form of such notice;

4 (2) Participate in an approved product stewardship program for the collection, safe and
5 proper disposal of extremely hazardous wastes, including cytotoxic drugs and related byproducts
6 and wastes adopted pursuant to chapter 19.16 of title 23 in order that providers and patients can
7 safely collect and contain extremely hazardous excretions for a period of time as determined by the
8 United States Food and Drug Administration ("FDA") and referenced on the relevant FDA
9 prescription insert(s).

10 (b) Cytotoxic drug producers shall provide for the costs of managing and safely disposing
11 of the health care waste identified in this section in accordance with chapter 19.16 of title 23.

12 (c) Receipt of notice from the party administering chemotherapy drugs or their agent
13 responsible for proper disposal of the hazardous wastes by the prescribing pharmacist or chief
14 pharmacist that the wastes have been disposed of in accordance with a product stewardship plan
15 shall satisfy the responsibility of the prescribing pharmacist hereunder.

16 (d) For the purposes of this section, extremely hazardous excretions shall mean any
17 excretion from a patient on a regimen of chemotherapy agents that are antineoplastic or cytotoxic,
18 and which may be excreted during the period of administration or the time period referenced in
19 subsection (c)(2) of this section, including, but not limited to, drugs listed in the NIOSH list of
20 antineoplastic and other hazardous drugs, as the same may be updated or amended from time to
21 time.

22 SECTION 3. Chapter 27-18.5 of the General Laws entitled "Nonprofit Hospital Service
23 Corporations" is hereby amended by adding thereto the following section:

24 **27-18.5-11. Cancer patient safety and environmental protection.**

25 (a) Chemotherapy precautions following treatment. All physicians, pharmacists, or other
26 health care professionals licensed in the state of Rhode Island authorized to prescribe and/or
27 administer chemotherapy treatment shall:

28 (1) Provide written notice from the prescribing pharmacist to each patient undergoing such
29 treatment as to the hazards posed to patients and their families of extremely hazardous excretions,
30 including, but not limited to, urine, vomit, and feces, for a period following treatment as generally
31 determined by the food and drug administration label accompanying said chemotherapy drug or
32 drugs. To the extent such notices are generally consistent with those now provided for patients
33 undergoing treatment with radioactive drugs, or consistent with the recommendations of the World
34 Health Organization with regard to cytotoxic drugs, or otherwise consistent with similar standards

1 that may be approved by the department of environmental management in the context of a product
2 stewardship plan adopted pursuant to chapter 19.16 of title 23, then the prescribing pharmacist will
3 not be held liable for the form of such notice;

4 (2) Participate in an approved product stewardship program for the collection, safe and
5 proper disposal of extremely hazardous wastes, including cytotoxic drugs and related byproducts
6 and wastes adopted pursuant to chapter 19.16 of title 23 in order that providers and patients can
7 safely collect and contain extremely hazardous excretions for a period of time as determined by the
8 United States Food and Drug Administration ("FDA") and referenced on the relevant FDA
9 prescription insert(s).

10 (b) Cytotoxic drug producers shall provide for the costs of managing and safely disposing
11 of the health care waste identified in this section in accordance with chapter 19.16 of title 23.

12 (c) Receipt of notice from the party administering chemotherapy drugs or their agent
13 responsible for proper disposal of the hazardous wastes by the prescribing pharmacist or chief
14 pharmacist that the wastes have been disposed of in accordance with a product stewardship plan
15 shall satisfy the responsibility of the prescribing pharmacist hereunder.

16 (d) For the purposes of this section, extremely hazardous excretions shall mean any
17 excretion from a patient on a regimen of chemotherapy agents that are antineoplastic or cytotoxic,
18 and which may be excreted during the period of administration or the time period referenced in
19 subsection (c)(2) of this section, including, but not limited to, drugs listed in the NIOSH list of
20 antineoplastic and other hazardous drugs, as the same may be updated or amended from time to
21 time.

22 SECTION 4. Chapter 27-19 of the General Laws entitled "Nonprofit Medical Service
23 Corporations" is hereby amended by adding thereto the following section:

24 **27-19-77. Cancer patient safety and environmental protection.**

25 (a) Chemotherapy precautions following treatment. All physicians, pharmacists, or other
26 health care professionals licensed in the state of Rhode Island authorized to prescribe and/or
27 administer chemotherapy treatment shall:

28 (1) Provide written notice from the prescribing pharmacist to each patient undergoing such
29 treatment as to the hazards posed to patients and their families of extremely hazardous excretions,
30 including, but not limited to, urine, vomit, and feces, for a period following treatment as generally
31 determined by the food and drug administration label accompanying said chemotherapy drug or
32 drugs. To the extent such notices are generally consistent with those now provided for patients
33 undergoing treatment with radioactive drugs, or consistent with the recommendations of the World
34 Health Organization with regard to cytotoxic drugs, or otherwise consistent with similar standards

1 that may be approved by the department of environmental management in the context of a product
2 stewardship plan adopted pursuant to chapter 19.16 of title 23, then the prescribing pharmacist will
3 not be held liable for the form of such notice;

4 (2) Participate in an approved product stewardship program for the collection, safe and
5 proper disposal of extremely hazardous wastes, including cytotoxic drugs and related byproducts
6 and wastes adopted pursuant to chapter 19.16 of title 23 in order that providers and patients can
7 safely collect and contain extremely hazardous excretions for a period of time as determined by the
8 United States Food and Drug Administration ("FDA") and referenced on the relevant FDA
9 prescription insert(s).

10 (b) Cytotoxic drug producers shall provide for the costs of managing and safely disposing
11 of the health care waste identified in this section in accordance with chapter 19.16 of title 23.

12 (c) Receipt of notice from the party administering chemotherapy drugs or their agent
13 responsible for proper disposal of the hazardous wastes by the prescribing pharmacist or chief
14 pharmacist that the wastes have been disposed of in accordance with a product stewardship plan
15 shall satisfy the responsibility of the prescribing pharmacist hereunder.

16 (d) For the purposes of this section, extremely hazardous excretions shall mean any
17 excretion from a patient on a regimen of chemotherapy agents that are antineoplastic or cytotoxic,
18 and which may be excreted during the period of administration or the time period referenced in
19 subsection (c)(2) of this section, including, but not limited to, drugs listed in the NIOSH list of
20 antineoplastic and other hazardous drugs, as the same may be updated or amended from time to
21 time.

22 SECTION 5. Chapter 27-20 of the General Laws entitled "Health Maintenance
23 Organizations" is hereby amended by adding thereto the following section:

24 **27-20-73. Cancer patient safety and environmental protection.**

25 (a) Chemotherapy precautions following treatment. All physicians, pharmacists, or other
26 health care professionals licensed in the state of Rhode Island authorized to prescribe and/or
27 administer chemotherapy treatment shall:

28 (1) Provide written notice from the prescribing pharmacist to each patient undergoing such
29 treatment as to the hazards posed to patients and their families of extremely hazardous excretions,
30 including, but not limited to, urine, vomit, and feces, for a period following treatment as generally
31 determined by the food and drug administration label accompanying said chemotherapy drug or
32 drugs. To the extent such notices are generally consistent with those now provided for patients
33 undergoing treatment with radioactive drugs, or consistent with the recommendations of the World
34 Health Organization with regard to cytotoxic drugs, or otherwise consistent with similar standards

1 that may be approved by the department of environmental management in the context of a product
2 stewardship plan adopted pursuant to chapter 19.16 of title 23, then the prescribing pharmacist will
3 not be held liable for the form of such notice;

4 (2) Participate in an approved product stewardship program for the collection, safe and
5 proper disposal of extremely hazardous wastes, including cytotoxic drugs and related byproducts
6 and wastes adopted pursuant to chapter 19.16 of title 23 in order that providers and patients can
7 safely collect and contain extremely hazardous excretions for a period of time as determined by the
8 United States Food and Drug Administration ("FDA") and referenced on the relevant FDA
9 prescription insert(s).

10 (b) Cytotoxic drug producers shall provide for the costs of managing and safely disposing
11 of the health care waste identified in this section in accordance with chapter 19.16 of title 23.

12 (c) Receipt of notice from the party administering chemotherapy drugs or their agent
13 responsible for proper disposal of the hazardous wastes by the prescribing pharmacist or chief
14 pharmacist that the wastes have been disposed of in accordance with a product stewardship plan
15 shall satisfy the responsibility of the prescribing pharmacist hereunder.

16 (d) For the purposes of this section, extremely hazardous excretions shall mean any
17 excretion from a patient on a regimen of chemotherapy agents that are antineoplastic or cytotoxic,
18 and which may be excreted during the period of administration or the time period referenced in
19 subsection (c)(2) of this section, including, but not limited to, drugs listed in the NIOSH list of
20 antineoplastic and other hazardous drugs, as the same may be updated or amended from time to
21 time.

22 SECTION 6. Chapter 27-41 of the General Laws entitled "Health Maintenance
23 Organizations" is hereby amended by adding thereto the following section:

24 **27-41-90. Cancer patient safety and environmental protection.**

25 (a) Chemotherapy precautions following treatment. All physicians, pharmacists, or other
26 health care professionals licensed in the state of Rhode Island authorized to prescribe and/or
27 administer chemotherapy treatment shall:

28 (1) Provide written notice from the prescribing pharmacist to each patient undergoing such
29 treatment as to the hazards posed to patients and their families of extremely hazardous excretions,
30 including, but not limited to, urine, vomit, and feces, for a period following treatment as generally
31 determined by the food and drug administration label accompanying said chemotherapy drug or
32 drugs. To the extent such notices are generally consistent with those now provided for patients
33 undergoing treatment with radioactive drugs, or consistent with the recommendations of the World
34 Health Organization with regard to cytotoxic drugs, or otherwise consistent with similar standards

1 that may be approved by the department of environmental management in the context of a product
2 stewardship plan adopted pursuant to chapter 19.16 of title 23, then the prescribing pharmacist will
3 not be held liable for the form of such notice;

4 (2) Participate in an approved product stewardship program for the collection, safe and
5 proper disposal of extremely hazardous wastes, including cytotoxic drugs and related byproducts
6 and wastes adopted pursuant to chapter 19.16 of title 23 in order that providers and patients can
7 safely collect and contain extremely hazardous excretions for a period of time as determined by the
8 United States Food and Drug Administration ("FDA") and referenced on the relevant FDA
9 prescription insert(s).

10 (b) Cytotoxic drug producers shall provide for the costs of managing and safely disposing
11 of the health care waste identified in this section in accordance with chapter 19.16 of title 23.

12 (c) Receipt of notice from the party administering chemotherapy drugs or their agent
13 responsible for proper disposal of the hazardous wastes by the prescribing pharmacist or chief
14 pharmacist that the wastes have been disposed of in accordance with a product stewardship plan
15 shall satisfy the responsibility of the prescribing pharmacist hereunder.

16 (d) For the purposes of this section, extremely hazardous excretions shall mean any
17 excretion from a patient on a regimen of chemotherapy agents that are antineoplastic or cytotoxic,
18 and which may be excreted during the period of administration or the time period referenced in
19 subsection (c)(2) of this section, including, but not limited to, drugs listed in the NIOSH list of
20 antineoplastic and other hazardous drugs, as the same may be updated or amended from time to
21 time.

22 SECTION 7. Title 23 of the General Laws entitled "HEALTH AND SAFETY" is hereby
23 amended by adding thereto the following chapter:

24 Declaration of findings.

25 (1) It is acknowledged by medical experts that bodily wastes of patients undergoing
26 chemotherapy treatment may contain levels of chemicals that are toxic, carcinogenic, mutagenic or
27 teratogenic for a certain period of time, to such an extent that The World Health Organization
28 defines genotoxic waste as chemotherapy drug waste including urine, feces and vomit from
29 patients, which may contain potentially hazardous amounts of the administered cytostatic drugs or
30 of their metabolites, and which should be considered genotoxic for at least forty-eight (48) hours
31 and sometimes up to one week after drug administration. According to the World Health
32 Organization ten percent (10 %) of known carcinogens are chemicals used to cure cancer.

33 (2) While, according to the American Society of Clinical Oncology, the cost of one
34 additional cancer patient resulting from the exposure to these harmful chemicals is approximately

1 one hundred seventy thousand dollars (\$170,000) per treatment year, the cost of the implementation
2 of cytotoxic chemical safety protocols is estimated to be less than two percent (2%) of that cost.

3 (3) The World Health Organization further states that any discharge of genotoxic waste
4 into the environment could have disastrous ecological consequences. The World Health
5 Organization places the responsibility for genotoxic waste on the chief pharmacist and further states
6 that the chief pharmacist also has the special responsibility of ensuring that genotoxic products are
7 used safely, and that genotoxic waste is managed safely.

8 (4) The European Commission, Executive Agency for Health and Consumers undertook a
9 comprehensive "Study on the environmental risks of medicinal products" which was released in
10 June of 2014, drafted by BIO Intelligence Service, a division of Deloitte Consulting LLP, reviewing
11 the prevalence of contaminants in drinking water and noting the extreme dangers arising from
12 improper disposal of cytotoxic chemotherapy drugs.

13 (5) Dr. Christian G. Daughton, former chief of environmental chemistry for the United
14 States Environmental Protection Agency, notes in a paper entitled "Eco-directed sustainable
15 prescribing: feasibility for reducing water contamination by drugs" published in the journal
16 "Science of the Total Environment" on June 3, 2014, that generally, the best practice for lowering
17 the level of drugs in our environment is reduction of dosages, but that "[c]ertain drug classes
18 (especially cytotoxic chemotherapeutics) may not be amenable to this approach; the best control
19 measure for such highly toxic drugs may simply be the prevention of urine and feces from entering
20 sewers."

21 (6) The federal Occupational Safety and Health Administration ("OSHA") is the main
22 federal agency charged with the enforcement of safety and health legislation. OSHA, in concert
23 with the National Institute for Occupational Safety and Health ("NIOSH") and the Joint
24 Commission on Healthcare, an independent, not-for-profit organization that accredits and certifies
25 more than twenty thousand (20,000) health care organizations and programs in the United States,
26 stated in a 2011 letter to every hospital in the country that "[e]very day in healthcare settings across
27 America, workers are exposed to hundreds of powerful drugs used for cancer chemotherapy,
28 antiviral treatments, hormone regimens and other therapies. While these drugs are used to relieve
29 and heal patients, many of them present serious hazards to the health and safety of your workers.
30 Some of these drugs have been known to cause cancer, reproductive and developmental problems,
31 allergic reactions, and other adverse effects that can be irreversible even after low-level exposures."

32 (7) Further, because of the risk of ongoing exposure to these extremely hazardous excreted
33 drugs, the American Cancer Society has published a comprehensive list of safety precautions
34 regarding the in-home personal hygiene for individuals undergoing chemotherapy and their

1 families.

2 (8) Therefore, for the protection of both the public health and the environment, the general
3 assembly shall require that standards are set forth pursuant to this section to address this serious
4 health and safety issue.

5 CHAPTER 19.17

6 SAFE CYTOTOXIC WASTE DISPOSAL ACT

7 **23-19.17-1. Short title.**

8 This section shall be known and may be cited as the "Safe Cytotoxic Waste Disposal Act."

9 **23-19.17-2. Definitions.**

10 As used in this chapter:

11 (1) "Cytotoxic drugs" means any drug defined by the department as extremely hazardous
12 waste or any waste byproduct or substance containing such a drug.

13 (2) "Department" means the Rhode Island department of environmental management.

14 (3) "Drug wholesaler" means a business that sells or distributes cytotoxic drugs for resale
15 to an entity other than a consumer.

16 (4) "Entity" means a person other than an individual.

17 (5) "Mail-back program" means a system whereby residential generators of wastes from
18 cytotoxic drugs obtain prepaid and pre-addressed shipping containers in which to place wastes for
19 shipment to an entity that will dispose of them safely and legally.

20 (6) "Person" means an individual, firm, sole proprietorship, corporation, limited liability
21 corporation, general partnership, limited partnership, limited liability partnership, association,
22 cooperative, or other legal entity, however organized.

23 (7) "Plan" or "product stewardship plan" means a product stewardship plan required under
24 this chapter that describes the manner in which a product stewardship program will be provided.

25 (8) "Producer" shall be determined, with regard to a cytotoxic drug that is sold, offered for
26 sale, or distributed in Rhode Island as meaning one of the following:

27 (i) The person who manufactures a cytotoxic drug and who sells, offers for sale, or
28 distributes that cytotoxic drug in Rhode Island under that person's own name or brand.

29 (ii) If there is no person who sells, offers for sale, or distributes the cytotoxic drug in Rhode
30 Island under the person's own name or brand, the producer of the cytotoxic drug is the owner or
31 licensee of a trademark or brand under which the cytotoxic drug is sold or distributed in Rhode
32 Island, whether or not the trademark is registered.

33 (iii) If there is no person who is a producer of the cytotoxic drug pursuant to subsections
34 (8)(i) and (8)(ii) of this section, the producer of that cytotoxic drug is the person who brings the

1 cytotoxic drug into Rhode Island for sale or distribution. "Producer" does not include:

2 (A) A retailer that puts its store label on a cytotoxic drug; or

3 (B) A pharmacist who dispenses prescription drugs to, or compounds a prescribed
4 individual drug product for a consumer.

5 (9) "Product stewardship program" or "program" means a program financed and operated
6 by producers to collect, transport, and dispose of cytotoxic drugs.

7 (10) "Residential generators" means residential or other locations outside a hospital facility
8 where cytotoxic drugs are or may be excreted, unused, unwanted, disposed of, or abandoned.

9 (11) "Stewardship organization" means an organization designated by a producer or a
10 group of producers to act as an agent on behalf of each producer to operate a product stewardship
11 program.

12 **23-19.17-3. Product stewardship program.**

13 (a) Requirement for sale. This chapter shall apply only to a producer whose cytotoxic drug
14 is sold or distributed in Rhode Island and shall be administered and implemented by the Rhode
15 Island department of environmental management. Each producer must:

16 (1) Operate, individually or jointly with other producers, a product stewardship program
17 approved by the department; or

18 (2) Enter into an agreement with a stewardship organization to operate, on the producer's
19 behalf, a product stewardship program approved by the department.

20 (b) Product stewardship program costs.

21 (1) A producer, group of producers, or stewardship organization must pay all
22 administrative and operational fees associated with their product stewardship program, including
23 the cost of collecting, transporting, and disposing of cytotoxic drugs collected from residential
24 generators and the proper disposal of packaging collected with the cytotoxic drugs.

25 (2) A producer, group of producers, or stewardship organization must pay for all fees
26 associated with their specific product stewardship program and product stewardship plan.

27 (3) No person or producer may charge a specific point-of-sale fee to consumers to recoup
28 the costs of their product stewardship program, nor may they charge a specific point-of-collection
29 fee at the time the unwanted products are collected from residential generators or delivered for
30 disposal.

31 (4) A producer, group of producers, or stewardship organization must pay all costs incurred
32 by the state of Rhode Island, including, but not limited to, the department in the administration and
33 enforcement of their product stewardship program. Exclusive of fines and penalties, the state shall
34 only recover its actual costs of administration and enforcement under this chapter and shall not

1 charge any amounts under this chapter in excess of its actual administrative and enforcement costs.

2 **23-19.17-4. Product stewardship plans.**

3 (a) Plan content. Each product stewardship program shall have a product stewardship plan
4 that contains each of the following:

5 (1) Certification that the product stewardship program will accept all cytotoxic drugs
6 regardless of who produced them, unless excused from this requirement by the department as part
7 of the approval of the plan;

8 (2) Contact information for the individual and the entity submitting the plan and for each
9 of the producers participating in the product stewardship program;

10 (3) A description of the methods by which cytotoxic drugs from residential generators will
11 be collected in Rhode Island and an explanation of how the collection system will be convenient
12 and adequate to serve the needs of Rhode Island residents;

13 (4) A description of how the product stewardship plan will provide collection services for
14 cytotoxic drugs for all patients in Rhode Island that are convenient and adequate to meet the needs
15 of patients and caregivers, including the option for all patients to utilize a mail-back program;

16 (5) The timing and method of delivery to patients of shipping containers for a mail-back
17 program;

18 (6) A list containing the name, location, permit status, and record of any penalties,
19 violations, or regulatory orders received in the previous five (5) years by each person that will be
20 involved in transporting cytotoxic drugs and each disposal facility proposed to participate in the
21 product stewardship program;

22 (7) A description of how the cytotoxic drugs will be safely and securely tracked and
23 handled from collection through final disposal and the policies and procedures to be followed to
24 ensure security;

25 (8) A description of the public education and outreach activities to patients, caregivers, and
26 health care professionals, and how their effectiveness will be evaluated;

27 (9) A description of education and outreach efforts to law enforcement, public safety,
28 transportation officials and other personnel regarding the findings and requirements of this chapter,
29 and the process for safe handling and disposal of cytotoxic drugs and related wastes or byproducts
30 they may encounter;

31 (10) A description of how the scope and extent of the product stewardship program can
32 reasonably be expected to identify and address each instance in which a cytotoxic drug is prescribed
33 in Rhode Island;

34 (11) A starting date when collection of cytotoxic drugs will begin and, in the case of a

1 program utilizing a stewardship organization, the contracted term of engagement of that
2 stewardship organization; and

3 (12) If more than one producer will be involved in a proposed product stewardship
4 program, then the product stewardship plan for that program must include a fair and reasonable
5 manner for allocating the costs of the program among the participants in that program, in order that
6 the portion of costs paid by each producer is reasonably related to the amount of cytotoxic drugs
7 that producer sells in the state of Rhode Island.

8 (b) Department review, approval and updates:

9 (1) Nothing herein shall prevent an existing producer, group of producers, or stewardship
10 organization from collecting cytotoxic drugs and related waste and byproducts prior to the effective
11 date of this chapter.

12 (2) Product stewardship plans must be submitted to the department for approval. The initial
13 plans must be submitted by December 1, 2020.

14 (3) Within sixty (60) days after receipt of a product stewardship plan, the department shall
15 conduct a public hearing and determine whether the plan complies with the requirements of this
16 chapter and of any regulations adopted pursuant to this chapter.

17 (i) The department may reject a plan within thirty (30) days of receipt without conducting
18 a public hearing.

19 (ii) As part of its approval, the department may set reasonable performance goals for the
20 program.

21 (iii) If the department approves a plan, it shall notify the applicant of its approval in writing.

22 (iv) If the department rejects a plan, it shall notify the applicant in writing of its reasons for
23 rejecting the plan.

24 (4) An applicant whose plan has been rejected by the department must submit a revised
25 plan to the department within sixty (60) days after receiving notice of the rejection.

26 (5) If the department rejects a revised product stewardship plan or any other subsequently
27 revised plan, the producer(s) at issue shall be out of compliance with this chapter and are subject
28 to the enforcement provisions contained in this chapter.

29 (c) At least every three (3) years, a producer, group of producers or stewardship
30 organization operating a product stewardship program shall update its product stewardship plan
31 and submit the updated plan to the department for review and approval.

32 (d) A producer who begins to offer a cytotoxic drug for sale in the state of Rhode Island
33 after July 1, 2021, must submit a product stewardship plan to the department or provide evidence
34 of having joined an existing approved product stewardship program prior to the producer's initial

1 offer for sale of a cytotoxic drug.

2 (e) Any proposed changes to a product stewardship plan must be submitted in writing to
3 the department and approved by the department in writing prior to implementation of any change.

4 **23-19.17-5. Disposal of cytotoxic wastes.**

5 (a) Compliance with applicable law. Each product stewardship program must comply with
6 all local, state, and federal laws and regulations applicable to its operations, including laws and
7 regulations governing the disposal of extremely hazardous wastes and their byproducts.

8 (b) Protocols for packaging and transport of cytotoxic drugs and related wastes from
9 residential generators must address the destruction of pathogens and cytotoxins and the conversion
10 of wastes to a non-liquid form prior to shipping or transport.

11 (c) Cytotoxic drugs and related wastes shall not be incinerated.

12 (d) Prior to shipment or transport from the location of the residential generator, the
13 cytotoxic drugs, related wastes (including, but not limited to, protective equipment, medical
14 supplies, clothing, bedding) and other contaminated materials must be contained to prevent
15 exposure by handlers of the waste during shipment or transport.

16 **23-19.17-6. Reporting.**

17 (a) On or before July 1, 2021, (or at a later date as adopted in writing by the department)
18 and in each subsequent year, every producer, group of producers, or stewardship organization
19 operating a product stewardship program must prepare and submit to the department an annual
20 written report describing the program's activities during the previous reporting period. The report
21 must include the following:

22 (1) A list of producers participating in the product stewardship program;

23 (2) The quantity of cytotoxic drugs collected from residential generators;

24 (3) The name and location of disposal facilities at which cytotoxic drugs were disposed of
25 and the quantities disposed of at each facility;

26 (4) Whether policies and procedures for collecting, transporting, and disposing of cytotoxic
27 drugs, as established in the plan, were followed during the reporting period and a description of
28 any noncompliance;

29 (5) Whether any safety or security problems occurred during collection, transportation, or
30 disposal of cytotoxic drugs during the reporting period and, if so, what changes have or will be
31 made to policies, procedures, or tracking mechanisms to alleviate the problem and to improve
32 safety and security;

33 (6) A description of public education and outreach activities implemented during the
34 reporting period, including the methodology used to evaluate the outreach and program activities;

1 (7) How the product stewardship program complied with all other elements in the product
2 stewardship plan approved by the department, including its degree of success in meeting any
3 performance goals set by the department as part of its approval of the program; and

4 (8) Any other information that the department may reasonably require.

5 (b) For the purposes of this section, "reporting period" means the period beginning January
6 1 and ending December 31 of the same calendar year.

7 (c) The department shall provide on its website a list of all producers participating in
8 product stewardship programs approved by the department and a list of all producers the
9 department has identified as noncompliant with this chapter or any regulations adopted pursuant to
10 this chapter.

11 **23-19.17-7. Rules, regulations and fees.**

12 The director of the department of environmental management may, after a noticed public
13 hearing, promulgate rules and regulations as necessary to implement, administer, and enforce this
14 chapter. The rules and regulations shall include a schedule of fees to be charged to the producers
15 to cover all of the state of Rhode Island's costs of administering and enforcing this chapter.

16 **23-19.17-8. Enforcement by the department.**

17 (a) The department of environmental management shall administer the penalty provisions
18 of this chapter.

19 (b) The department of environmental management may issue an administrative citation to
20 a producer for violation of this chapter or any rule or regulation adopted pursuant to this chapter.
21 The department shall first send a written warning to the producer as well as a copy of this chapter
22 and any rules and regulations adopted pursuant to this chapter. The producer shall have thirty (30)
23 days after receipt of the warning to comply and correct any violations.

24 (c) If the producer fails to comply and correct any violations, the department may impose
25 administrative fines for violations of this chapter or of any rules or regulations adopted pursuant to
26 this chapter. Each day shall constitute a separate violation for those purposes.

27 (d) Any person in violation of this chapter or any rule or regulation adopted pursuant to
28 this chapter shall be liable to the state of Rhode Island for a civil penalty in an amount not to exceed
29 one thousand dollars (\$1,000) per day, per violation. Each day in which the violation continues
30 shall constitute a separate and distinct violation.

31 (e) In determining the appropriate penalties, the department of environmental management
32 shall consider the extent of harm caused by the violation, the nature and persistence of the violation,
33 the frequency of past violations, any action taken to mitigate the violation, and the financial burden
34 to the violator.

1 (f) Any producer receiving an administrative citation under this chapter or any rule or
2 regulation adopted pursuant to this chapter may file an appeal within twenty-one (21) calendar days
3 from the date the administrative citation was issued. The administrative citation is deemed issued
4 on the day it is sent by first class mail or personal service. The administrative citation shall state
5 the date of issuance. If the deadline falls on a weekend or state holiday, then the deadline shall be
6 extended until the next regular business day. The request to appeal must:

7 (1) Be in writing;

8 (2) Be accompanied by a deposit of the total fine and any fees noted on the administrative
9 citation;

10 (3) Specify the basis for the appeal in detail;

11 (4) Be postmarked within twenty-one (21) days from the date the administrative citation
12 was issued; and

13 (5) Be sent to the address as set forth on the administrative citation.

14 (g) The written request to appeal will be reviewed and, if found to be complete, a date, time
15 and place shall be set for a hearing before a hearing officer designated by the director of the
16 department of environmental management. Written notice of the time and place for the hearing will
17 be served by first class mail or personal service at least twenty one (21) days prior to the date of
18 the hearing to the producer appealing the citation. Service by first class mail, postage prepaid shall
19 be effective on the date of mailing.

20 (h) Failure of any producer to file an appeal in accordance with the provisions of this
21 section shall constitute waiver of that producer's rights to administrative determination of the merits
22 of the administrative citation and the amount of the fine and any fees and shall constitute a failure
23 by that producer to exhaust administrative remedies.

24 (i) The producer requesting the appeal may request the director of the department of
25 environmental management to recuse a hearing officer for reasons of actual prejudice against the
26 party's cause. The hearing officer shall conduct an orderly, fair hearing and accept evidence
27 pursuant to chapter 32 of title 45 (the "administrative procedures act") as follows:

28 (1) A valid administrative citation shall be prima facie evidence of the violation;

29 (2) Testimony shall be by declaration under penalty of perjury except to the extent the
30 hearing officer permits or requires live testimony concerning the violation.

31 (3) The hearing officer may reduce, waive or conditionally reduce the fines and any fees
32 stated in the administrative citation. The hearing officer may impose deadlines or a schedule for
33 payment of the fine and any fees due in excess of the deposit.

34 (4) The hearing officer shall make findings based on the record of the hearing and make a

1 written decision based on the findings entitled "hearing officer decision" (HOD). The HOD shall
2 be served by first class mail on the producer appealing and the department. The HOD affirming or
3 dismissing the administrative citation is final, unless a timely notice of appeal is filed for hearing
4 by the superior court.

5 **23-19.17-9. Appeal to superior court.**

6 (a) An appeal may be filed with the superior court within ten (10) calendar days after the
7 date of service of the hearing officer decision.

8 (b) The appeal may be taken by any producer or the department within said ten (10) day
9 period, by filing with the clerk of the superior court a notice of appeal specifying the grounds for
10 the appeal.

11 (c) Upon receiving an appeal, the department shall immediately arrange for an
12 administrative record to be made available to the superior court of all of the documents constituting
13 the record upon which the hearing officer's decision was based.

14 (d) The superior court may hear additional evidence in its sole discretion and may sustain,
15 modify or overrule any order brought before it on appeal.

16 **23-19.17-10. Enforcement by attorney general.**

17 (a) Upon the failure of any producer to comply with any requirement of this chapter and
18 any rule or regulation adopted pursuant to this chapter, the department of attorney general may
19 petition any court having jurisdiction for injunctive relief, payment of civil penalties and any other
20 appropriate remedy, including restraining such person from continuing any prohibited activity and
21 compelling compliance with lawful requirements; provided, however, this subsection does not
22 permit the department, the state of Rhode Island, or any court of competent jurisdiction to restrain
23 the sale of any cytotoxic drug in Rhode Island.

24 (b) Any person who knowingly and willfully violates the requirements of this chapter or
25 any rule or regulation adopted pursuant to this chapter is guilty of a misdemeanor and may be
26 prosecuted by the department of attorney general. A conviction for a misdemeanor violation shall
27 be punishable by a fine of not less than fifty dollars (\$50.00) and not more than five hundred dollars
28 (\$500) per day, per violation, or by imprisonment for a period not to exceed six (6) months or both.

29 **23-19.17-11. Construction and severability.**

30 (a) Conflict with state or federal law. This chapter shall be construed in order to not conflict
31 with applicable federal or state laws, rules or regulations.

32 (b) Severability. If any of the provisions of this chapter or the application thereof to any
33 person or circumstance is held invalid, the remainder of those provisions, including the application
34 of any part or provisions to persons or circumstances other than those to whom it is held invalid

1 [shall not be affected thereby and shall continue in full force and effect.](#)

2 SECTION 8. This act shall take effect upon passage.

LC004765
=====

EXPLANATION
BY THE LEGISLATIVE COUNCIL
OF

A N A C T

RELATING TO INSURANCE -- ACCIDENT AND SICKNESS INSURANCE POLICIES

1 This act would establish a program related to the disposal of extremely hazardous wastes
2 generated by the use of toxic, carcinogenic, mutagenic, or teratogenic chemotherapy drugs to be
3 implemented by pharmacists, physicians, health care providers, and insurers in this state. Further
4 this act would provide for a drug stewardship program to address procedures and industry financing
5 of the proper disposal of these extremely hazardous wastes.

6 This act would take effect upon passage.
