1 (c) FINDINGS.—The Congress finds the following:

2 (1) The Safe Drinking Water Act has not been
3 substantially amended in more than 20 years, during
4 which time the challenges facing drinking water sys-
5 tems and customers have increased dramatically.

6 (2) Climate change, aging infrastructure, lead
7 contamination, and emerging contaminants threaten
8 the public health and economic viability of cities and
9 towns nationwide.

10 (3) The drinking water standard-setting provi-
11 sions put in place in 1996 have proven unworkable,
12 preventing the Federal Government from regulating
13 dangerous contaminants, including perchlorate,
14 strontium, and volatile organic compounds.

15 (4) Compliance and enforcement with existing
16 drinking water standards has fallen far short of
17 what is needed and expected.

18 (5) Increased drinking water investment is
19 needed to address a crisis in failing infrastructure.
