6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Although the United States poverty rate has
 9 had a slight decline to 13.5 percent in 2015, poverty
 10 remains a social issue for our Nation, especially for
 11 communities of color and women and children who
 12 continue to experience higher than average poverty
 13 rates. Homeowners and those seeking to become
 14 homeowners continue to face challenges with high
 15 mortgage delinquency, mortgage loan interest rates,
 16 and threats of foreclosure. Joblessness and economic

1 insecurity contribute to the incidence of mental ill-
2 ness, family violence, suicide, substance abuse,
3 crime, and diminished capacity for health, family,
4 and community functioning.

5 (2) Social workers form society's social safety
6 net. Social workers provide assistance, guidance, and
7 resources to individuals, families, and communities
8 in poverty. Additionally, they understand the dev-
9 astating costs and consequences of poverty and un-
10 employment on our society and provide direct serv-
11 ices in order to prevent and abate economic inequal-
12 ity.

13 (3) The Bureau of Labor Statistics projects
14 that the social work profession will grow at an
15 above-average rate through the year 2024, with a 12
16 percent growth rate overall and a 19 percent pro-
17 jected growth rate for health care social workers.
18 This increase is faster than the 7 percent average
19 for all occupations, demonstrating a substantial need
20 for social workers in our Nation.

21 (4) Social work salaries, on average, are among
22 the lowest for all occupations in the United States
23 and for those with master's level education in par-
24 ticular. According to the Bureau of Labor Statistics,

1 the median annual income for social workers in
2 2015 was \$45,900.

3 (5) The report titled “2014 Statistics on Social
4 Work Education in the United States” by the Coun-
5 cil on Social Work Education stated that 78.7 per-
6 cent of students graduating from Master of Social
7 Work programs incurred debt to earn their graduate
8 degree. The average debt for a Master of Social
9 Work degree was approximately \$40,616.

10 (6) Social workers often deal with the most vul-
11 nerable clients in emotional or traumatic situations,
12 and face possible danger as a result. The National
13 Association of Social Workers Center for Workforce
14 Studies found that 44 percent of survey respondents
15 faced personal safety issues on the job. In 2015, the
16 Occupational Safety and Health Administration re-
17 ported that 75 percent of workplace assaults that oc-
18 curred between 2011 and 2013 took place in the
19 health care and social services industries.

20 (7) The Alzheimer’s Association of America
21 states that 5.4 million Americans, or 1 in every 9 in-
22 dividuals over the age of 65, have Alzheimer’s dis-
23 ease. Social workers in gerontology settings work
24 with older adults, including those with dementia, to
25 support their physiological, psychological, and social

1 needs through mental health therapy, caregiver and
2 family counseling, health education, program coordi-
3 nation, and case management.

4 (8) The Children’s Defense Fund states that
5 every 47 seconds a child is confirmed as abused or
6 neglected and every 5½ hours a child is killed from
7 abuse or neglect. The Administration for Children
8 and Families of the Department of Health and
9 Human Services states that 415,000 children were
10 in the United States foster care system in 2014.
11 Most children placed in foster care are placed due to
12 parental abuse or neglect. Research shows that pro-
13 fessional social workers employed in child welfare
14 agencies are more likely to find permanent homes
15 for children who have been in foster care for 2 or
16 more years. Unfortunately, less than 40 percent of
17 child welfare workers are professional social workers.

18 (9) The Substance Abuse and Mental Health
19 Services Administration of the Department of
20 Health and Human Services estimates that 43.6 mil-
21 lion individuals (nearly 1 in 5 or 18.1 percent) in
22 the United States age 18 or older experienced a
23 diagnosable mental illness in 2014. Additionally, at
24 least 3 million (1 in 10 or 12.5 percent) youth be-
25 tween the ages of 12 and 17 experienced at least one

1 major depressive episode in the past year. Social
2 workers provide the majority of mental health coun-
3 seling services in the United States, and are often
4 the only providers of such services in rural areas.

5 (10) Social workers working with veterans and
6 their families provide services that include case man-
7 agement, crisis interventions, mental health inter-
8 ventions, housing and financial counseling, high-risk
9 screening, and advocacy. The Department of Vet-
10 erans Affairs, which is the largest employer of social
11 workers in the Nation, employs over 12,000 social
12 workers who serve an estimated 21.8 million vet-
13 erans in the United States. A once-declining veteran
14 population is now surging and is in dire need of
15 mental health treatment to address issues such as
16 post-traumatic stress disorder, depression, drug and
17 alcohol addiction, and suicidal tendencies.

18 (11) The American Cancer Society estimates
19 that there will be 1,668,780 new cases of cancer and
20 600,920 cancer deaths, or 1,646 deaths a day, in
21 2017 alone. The Centers for Disease Control and
22 Prevention report that there are over 1,200,000 peo-
23 ple living with HIV/AIDS in the United States, with
24 approximately 39,513 new cases diagnosed in 2015.
25 In 2013, 1,600,000 to 1,700,000 people received

1 care from the Nation's hospice providers. Health
2 care and medical social workers practice in areas re-
3 lated to all of these circumstances and provide out-
4 reach for prevention and health promotion, help in-
5 dividuals and their families adapt to their health
6 conditions, connect patients and family caregivers
7 with community services and supports, provide grief
8 counseling, and act as a liaison between individuals
9 and their medical team, helping patients make in-
10 formed decisions about their care.

11 (12) The Children's Defense Fund notes that
12 every 2 seconds a public school student is suspended
13 and that every 9 seconds a high school student drops
14 out. The National Center for Education Statistics
15 states that in 2014 the national dropout rate for
16 high school students was 6.5 percent. Some vulner-
17 able communities have dropout rates of 50 percent
18 or higher. Social workers in school settings help stu-
19 dents avoid dropping out through early identifica-
20 tion, prevention, intervention, counseling, and sup-
21 port services.

22 (13) According to the Department of Justice,
23 every year more than 650,000 ex-offenders are re-
24 leased from Federal and State prisons. Social work-
25 ers employed in the correctional system address dis-

1 proportionate minority incarceration rates, provide
2 treatment for mental health problems and drug and
3 alcohol addiction, and work within, as well as out-
4 side of, prisons to reduce recidivism and increase
5 positive community reentry.
