1 *Be it enacted by the Senate and House of Representa-*

1 **SEC. 2. FINDINGS.**

2 Congress makes the following findings:

3 (1) Academically gifted and talented students
 4 make up an estimated 6 to 10 percent of the pre-
 5 kindergarten through grade 12 student population,
 6 totaling between 3,000,000 and 6,000,000 students.

7 (2) There is a growing gap at the highest levels
 8 of achievement between the performance of sub-
 9 groups of students, particularly between the per-
 10 formance of students who are African-American or
 11 Hispanic and the performance of White students, on

1 statewide assessments and on the National Assess-
2 ment of Educational Progress.

3 (3) Students with gifts and talents, and high-
4 ability students who have not been formally identi-
5 fied for gifted education services, require modifica-
6 tions to the general education curriculum to fully
7 meet their potential.

8 (4) Effective assessment and instruction of stu-
9 dents with gifts and talents requires educators to
10 have specialized knowledge and skills.

11 (5) Ninety percent of teachers nationwide want
12 more professional development focused on the skills
13 necessary for teaching advanced students.

14 (6) Interventions and strategies that have been
15 demonstrated to be successful with gifted and tal-
16 ented students can be modified to improve the
17 achievement of all students.

18 (7) The availability of gifted education pro-
19 grams and services to students who require such
20 services is unequal and often relies solely on local re-
21 sources and leadership, leaving many high-ability
22 students from rural areas or who are English lan-
23 guage learners or Hispanic, African-American, or
24 Native American, among others, without access to
25 appropriate services.

1 (8) There are an estimated 360,000 students in
2 the United States who are both gifted and have a
3 disability. These “twice exceptional” children present
4 special challenges because their disability often
5 masks their academic potential or their academic
6 strengths may mask their disability, resulting in a
7 lack of services and supports for this student popu-
8 lation.

9 (9) The development and dissemination of re-
10 search and national data on gifted and talented stu-
11 dents is necessary to—

12 (A) guide evidence-based classroom prac-
13 tices vital to meeting the unique needs of this
14 population of students; and

15 (B) contribute to the decisionmaking of
16 educators, families, and policymakers.

17 **SEC. 3. REFERENCES.**

18 Except as otherwise expressly provided, whenever in
19 this Act an amendment or repeal is expressed in terms
20 of an amendment to, or repeal of, a section or other provi-
21 sion, the reference shall be considered to be made to a
22 section or other provision of the Elementary and Sec-
23 ondary Education Act (20 U.S.C. 6301 et seq.).
