

117TH CONGRESS
1ST SESSION

H. R. 3848

To establish the National Commission on Critical Supply Chains, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JUNE 11, 2021

Mr. RYAN (for himself and Mr. POSEY) introduced the following bill; which was referred to the Committee on Energy and Commerce

A BILL

To establish the National Commission on Critical Supply Chains, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Critical Supply Chains
5 Commission Act”.

6 **SEC. 2. FINDINGS; SENSE OF CONGRESS.**

7 (a) FINDINGS.—Congress finds the following:

8 (1) Many Americans were shocked to find that
9 the United States was unable to find or produce
10 enough face masks, ventilators, hand sanitizer, test-

1 ing kits, hospital beds, sedatives, and other medical
2 necessities in response to the COVID–19 crisis due
3 to limitations in the manufacturing supply chain and
4 our dependence on foreign suppliers.

5 (2) Shortages of medical supplies and equip-
6 ment are just one example of the risks we face due
7 to the United States’ reliance on other countries for
8 making many of our critical products. The United
9 States also relies on other countries for—

10 (A) technologies involved with renewable
11 energies and car battery manufacturing;

12 (B) rare earth materials that are essential
13 to many high-technology products, including cell
14 phones, satellites, and computers;

15 (C) fabricating the most precise integrated
16 circuits and microchips that are needed for
17 complex electronics used in weapon systems,
18 space systems, automobiles, and a variety of
19 consumer products;

20 (D) production of advanced machine tools
21 and production equipment that U.S. factories
22 need to manufacture their products;

23 (E) delivery of precision scientific equip-
24 ment needed to produce breakthroughs in nano-

1 technology, medicine, and future batteries for
2 electric vehicles;

3 (F) manufacturing of clothing and other
4 textiles;

5 (G) production and distribution of food
6 and agricultural goods; and

7 (H) other critical products where substan-
8 tial harm would come to U.S. economic secu-
9 rity, national defense, or way of life if the sup-
10 ply chains were compromised or no longer avail-
11 able.

12 (3) The American supply chain is the founda-
13 tion of our Nation's economic competitiveness and is
14 the delivery system that moves products to con-
15 sumers in every State across the Nation.

16 (4) While U.S. manufacturers and domestic
17 suppliers have substantial resources, some domestic
18 capabilities and expertise have eroded due to reliance
19 on the global supply chain.

20 (5) Dependable and high-quality suppliers are
21 crucial assets to any manufacturing company since
22 manufacturers must get the right products to the
23 right place at the right time to be most successful.

24 (6) A secure and stable American supply chain
25 is a necessary component of a prosperous manufac-

1 turing sector that contributes two trillion dollars an-
2 nually to the U.S. economy.

3 (7) United States manufacturers are a major
4 source of high quality employment in the U.S. at
5 roughly 9 percent of the workforce.

6 (8) United States manufacturers are a major
7 driver of innovation, responsible for more than two-
8 thirds of private sector research and development,
9 receiving more than 90 percent of new patents.

10 (9) United States manufacturers are essential
11 to ensuring our national defense and homeland secu-
12 rity, as they provide the tools, equipment, systems,
13 and protective gear for our military and first re-
14 sponders.

15 (10) Manufacturers must consider supply chain
16 risks and potential disruptions in their business deci-
17 sions, though many times supplier selection is driven
18 by fixed production costs and other primary factors.

19 (11) A more robust and resilient American sup-
20 ply chain is integral to the health and well-being of
21 our economy and of businesses across every State,
22 and improvements in the supply chain will drive af-
23 fordability, sustainability, and availability of prod-
24 ucts for our Nation.

1 (b) SENSE OF CONGRESS.—It is the sense of Con-
2 gress that—

3 (1) a national commission on critical supply
4 chains will benefit the United States in several im-
5 portant ways;

6 (2) such a commission will provide expert
7 knowledge, guidance, and recommendations to Con-
8 gress on the complex and strategically important
9 issues related to bolstering American supply chains,
10 which will help Congress find common ground to ad-
11 vance supply chain policies and approaches that ben-
12 efit our Nation both today and far into the future;

13 (3) such a commission will provide rec-
14 ommendations to fix the shortcomings exposed in
15 our existing national manufacturing strategy, so
16 that we are prepared for the next crisis—whether it
17 is due to a pandemic, a war, natural disaster, or
18 something else—and that these strategic directions
19 will catalyze a much-needed update to our national
20 manufacturing strategy for revitalizing the U.S.
21 manufacturing sector and increasing our economic
22 growth;

23 (4) such a commission will establish the basis
24 for strengthening the security of, and adding resil-
25 iency to, an eroded American supply chain system,

1 so that U.S. economic security, national defense, and
2 way of life are not harmed when natural disasters or
3 other events disrupt the supply of critical ingredi-
4 ents, components, or products from a specific source
5 or region;

6 (5) such a commission will trigger new domestic
7 manufacturing jobs as a result of the growth and in-
8 creased robustness in the domestic supply chain and
9 the manufacturing sector, and such domestic
10 sourcing will also improve the security of intellectual
11 property, reduce environmental impact and transpor-
12 tation costs due to fewer parts traveling overseas,
13 and encourage economic clusters for supporting op-
14 erations to be located near manufacturing facilities;
15 and

16 (6) such a commission will improve the Nation’s
17 national defense and homeland security by reducing
18 vulnerabilities and risks due to excessive reliance on
19 foreign sources of critical materials or components.

20 **SEC. 3. NATIONAL COMMISSION ON CRITICAL SUPPLY**
21 **CHAINS.**

22 (a) **ESTABLISHMENT.**—Congress shall establish a
23 National Commission on Critical Supply Chains (referred
24 to in this section as the “Commission”).

1 (b) PURPOSES.—The purposes of the Commission
2 shall be to—

3 (1) convene an independent entity that brings
4 together national experts in a highly visible forum to
5 conduct a systematic study and give guidance to
6 Congress on the complex and strategically important
7 issues related to rebuilding critical American supply
8 chains;

9 (2) identify the critical supply chains in which
10 the United States is dependent on materials, prod-
11 ucts, equipment, or services from foreign countries
12 and in which substantial harm would come to U.S.
13 economic security, national defense, or way of life if
14 those supply chains were compromised or no longer
15 available;

16 (3) investigate in depth and report on existing
17 dependencies, limitations, and risks to the United
18 States for each of these critical supply chains, in-
19 cluding considerations for medical supplies, equip-
20 ment, and medications; rare earth materials; preci-
21 sion-integrated circuits and microchips; machine
22 tools and production equipment; defense components
23 and homeland security capabilities; scientific equip-
24 ment needed for advanced technology research and

1 development; clothing and textiles; and food and ag-
2 ricultural products;

3 (4) assess and provide guidance on key ques-
4 tions, including—

5 (A) which driving forces are pushing U.S.
6 companies to offshore their procurement or
7 their manufacturing operations;

8 (B) how the United States can predict and
9 prevent future supply chain disruptions;

10 (C) what the United States can do to re-
11 duce future vulnerabilities and risks;

12 (D) whether the United States can make
13 the American supply chain resilient enough to
14 protect necessary capabilities and resources;

15 (E) which manufacturing activities should
16 be performed strictly within the United States
17 to ensure economic and national security;

18 (F) what actions should be taken by the
19 United States to increase domestic manufac-
20 turing to meet critical supply chain needs and
21 improve its terms of trade; and

22 (G) what would be the effects of a new na-
23 tional manufacturing strategy on employment,
24 growth, innovation, and national security; and

1 (5) develop and propose specific recommenda-
2 tions, submit a biannual comprehensive report (and
3 intermediate updates as necessary to maintain time-
4 ly and relevant information), and provide Congres-
5 sional oversight to Congress to be used as a resource
6 for legislative actions to mitigate the risks of future
7 American supply chain disruptions.
