IN THE HOUSE OF REPRESENTATIVES

Mr. SHERMAN introduced the following bill; which was referred to the Committee on Foreign Affairs, and in addition to the Committees on Intelligence (Permanent Select), and Armed Services, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To establish a United States Global Health Commission and a United States Global Health Attaché Program, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Global Health Act”.

5 **SEC. 2. FINDINGS; SENSE OF CONGRESS; AND PURPOSES.**

6 (a) FINDINGS.—Congress makes the following find-
7 ings:

1 (1) Of all foreign assistance provided by the
2 United States, global health appropriations are sec-
3 ond only to security assistance.

4 (2) Several Federal agencies and departments
5 execute global health activities, including the United
6 States Agency for International Development, the
7 Department of Health and Human Services, the De-
8 partment of Defense, the Department of Agriculture,
9 and the Department of State.

10 (3) Global health assistance provided by the
11 United States supports—

12 (A) activities carried out by numerous pri-
13 vate, corporate, and nongovernmental organiza-
14 tions worldwide; and

15 (B) multilateral organizations, such as the
16 Global Fund to Fight AIDS, Tuberculosis, and
17 Malaria and the World Health Organization.

18 (4) The United States provides foreign assist-
19 ance to achieve national security, commercial, and
20 humanitarian objectives while demonstrating global
21 leadership.

22 (5) All United States funded foreign assistance
23 programs, regardless of the implementing agency,
24 support the objectives referred to in paragraph (4),

1 but the manner in which the programs achieve the
2 objectives varies widely.

3 (6) The approach for global health assistance
4 provided by the United States is largely program-
5 based or disease-based and often does not allow
6 agencies to work across the health system or on
7 issues of greatest concern to the host country.

8 (7) Such an approach hampers long-term sta-
9 bility, diplomacy with key partnerships, and sustain-
10 able capacity building.

11 (b) SENSE OF CONGRESS.—It is the sense of Con-
12 gress that—

13 (1) each global health implementing agency
14 should establish a program for the development of a
15 cadre of health advisors who can serve as United
16 States global health attachés;

17 (2) country or regional health teams and health
18 development partners working groups should be es-
19 tablished in all countries with significant United
20 States health investments; and

21 (3) all global health activities supported by the
22 United States Government should be implemented in
23 a coordinated manner.

24 (c) PURPOSES.—The purposes of this Act are—

1 (1) to establish a governmental framework and
2 national policy, priorities, and goals that ensure
3 interagency coordination for global health assistance
4 with the overall diplomacy, development, and defense
5 efforts of the United States Government;

6 (2) to establish the Senior United States Global
7 Health Advisor and the United States Global Health
8 Commission at the level of the National Security
9 Council to harmonize the global health goals and
10 priorities of the United States and promote inter-
11 agency coordination for global health assistance with
12 the overall efforts of the United States Government;

13 (3) to establish an Interagency Global Health
14 Committee to implement the Unified Global Health
15 Strategy and develop policies and frameworks to im-
16 prove coordination and outcomes; and

17 (4) to establish the United States Global Health
18 Attaché Program to field global health attachés as
19 key interlocutors who coordinate the country or re-
20 gional health team and ensure effective health as-
21 sessment, planning, integration, and implementation
22 across all agencies in support of the interests of the
23 United States.
