

118TH CONGRESS
1ST SESSION

H. R. 4953

To reduce the health risks of heat by establishing the National Integrated Heat Health Information System within the National Oceanic and Atmospheric Administration and the National Integrated Heat Health Information System Interagency Committee to improve extreme heat preparedness, planning, and response, requiring a study, and establishing financial assistance programs to address heat effects, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

JULY 27, 2023

Ms. BONAMICI (for herself, Ms. STRICKLAND, Mr. GALLEGUO, Ms. BARRAGÁN, Mr. BLUMENAUER, Mr. ESPAILLAT, Mr. NADLER, Mrs. WATSON COLEMAN, Ms. McCLELLAN, Ms. NORTON, Ms. CASTOR of Florida, Ms. LEE of California, Ms. ADAMS, Mr. SCOTT of Virginia, Ms. PETTERSEN, Mr. MULLIN, Mr. KHANNA, Ms. TITUS, Mr. RUIZ, Ms. MATSUI, Ms. SALINAS, Mr. LEVIN, and Mr. CÁRDENAS) introduced the following bill; which was referred to the Committee on Energy and Commerce, and in addition to the Committee on Science, Space, and Technology, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To reduce the health risks of heat by establishing the National Integrated Heat Health Information System within the National Oceanic and Atmospheric Administration and the National Integrated Heat Health Information System Interagency Committee to improve extreme heat preparedness, planning, and response, requiring a study, and establishing financial assistance programs to address heat effects, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Preventing Health
5 Emergencies And Temperature-related Illness and Deaths
6 Act of 2023” or the “Preventing HEAT Illness and
7 Deaths Act of 2023”.

8 **SEC. 2. DEFINITIONS.**

9 In this Act:

10 (1) COMMUNITY WITH ENVIRONMENTAL JUS-
11 TICE CONCERN.—The term “community with envi-
12 ronmental justice concerns” means a community
13 with significant representation of communities of
14 color, low-income communities, or Tribal and indige-
15 nous communities, that experiences, or is at risk of
16 experiencing, higher or more adverse human health
17 or environmental effects, as compared to other com-
18 munities.

19 (2) EXTREME HEAT.—The term “extreme
20 heat” means heat that substantially exceeds local cli-
21 matological norms in terms of any combination of
22 the following:

- 23 (A) Duration.
24 (B) Intensity.
25 (C) Season length.

(D) Frequency.

(4) HEAT EVENT.—The term “heat event” means an occurrence of increased heat that may have heat-health implications.

10 (5) HEAT-HEALTH.—The term “heat-health”
11 means health effects to humans from heat, during or
12 outside of heat events, including from vulnerability
13 and exposure, or the risk of such effects.

14 (6) PLANNING.—The term “planning” means
15 activities performed across timescales (including
16 days, weeks, months, years, and decades) with sce-
17 nario-based, probabilistic or deterministic informa-
18 tion to identify and take actions to proactively miti-
19 gate heat-health risks from increased frequency, du-
20 ration, and intensity of heat waves and increased
21 ambient temperature.

22 (7) PREPAREDNESS.—The term “preparedness”
23 means activities performed across timescales (includ-
24 ing days, weeks, months, years, and decades) with
25 probabilistic or deterministic information to manage

1 risk in advance of a heat event and increased ambi-
2 ent temperature.

3 (8) TRIBAL GOVERNMENT.—The term “Tribal
4 government” means the recognized governing body
5 of any Indian or Alaska Native tribe, band, nation,
6 pueblo, village, community, component band, or com-
7 ponent reservation, individually identified (including
8 parenthetically) in the list published most recently as
9 of the date of enactment of this Act pursuant to sec-
10 tion 104 of the Federally Recognized Indian Tribe
11 List Act of 1994 (25 U.S.C. 5131).

12 (9) URBAN HEAT ISLAND.—The term “urban
13 heat island” means the phenomenon observed in ur-
14 banized areas in which heat is more extreme than in
15 the surrounding exurban areas and heat is hetero-
16 geneously distributed within urbanized areas, due to
17 factors including—

- 18 (A) low albedo and impervious surfaces;
19 (B) low vegetation coverage; and
20 (C) waste heat produced in urban areas.

21 **SEC. 3. FINDINGS.**

22 Congress makes the following findings:

23 (1) Extreme heat events have been the leading
24 cause of weather-related death in the United States
25 over the last 30 years, according to the Centers for

1 Disease Control and Prevention and the National
2 Weather Service.

3 (2) The fourth National Climate Assessment,
4 mandated by the Global Change Research Act of
5 1990 (15 U.S.C. 2921 et seq.), finds that during the
6 next few decades, annual average temperature over
7 the contiguous United States is projected to increase
8 by a further 2.2°F relative to current temperatures,
9 regardless of future scenarios. The National Climate
10 Assessment projects that the frequency and intensity
11 of extreme heat events will increase in the future as
12 global temperature increases.

13 (3) Exposure to extreme heat can cause acute
14 heat-related illnesses, such as heat stroke, which al-
15 ready result in more than 65,000 emergency room
16 visits each year and exacerbate respiratory and car-
17 diovascular illnesses.

18 (4) Heat poses the greatest health risks for
19 adults older than 65 years of age, pregnant people,
20 young children, low-income communities, urban com-
21 munities, communities with low air conditioning
22 prevalence, socially isolated individuals, people with
23 mental or physical disabilities, people with under-
24 lying medical conditions, agricultural or other out-
25 door workers, workers without sufficient access to

1 cooling, athletes, incarcerated individuals, people ex-
2 periencing homelessness, and military personnel.

3 (5) Extreme heat is significantly associated
4 with serious adverse pregnancy outcomes across the
5 United States. Those adverse pregnancy outcomes
6 disproportionately impact Black mothers.

7 (6) Heat exposure is an issue of environmental
8 justice, as people living in low-income communities,
9 communities of color, and Tribal nations face a
10 number of interacting factors that render them more
11 vulnerable to extreme heat.

12 (7) The impacts of heat on human health are
13 more severe in urban areas where land surface prop-
14 erties create an urban heat island, particularly in
15 neighborhoods with limited availability of or access
16 to green spaces, shade, and tree cover, due to higher
17 density of building structures and more vehicular
18 traffic.

19 (8) Limited availability of tree cover and higher
20 temperatures are correlated with low-income neigh-
21 borhoods in urban areas. In Richmond, Virginia,
22 Baltimore, Maryland, and Washington, DC, re-
23 searchers found that risk of exposure to extreme
24 heat is disproportionately distributed to communities

1 of color in patterns associated with segregation and
2 redlining.

3 (9) Researchers have found that few commu-
4 nities in the United States have sufficient climate
5 and health information, guidance, and resources for
6 heat planning, preparedness, and response.

7 (10) The risks associated with extreme heat
8 have complex interactions and impacts, and the
9 management of those risks requires a
10 transdisciplinary approach.

11 (11) Regions, communities, and populations
12 that face the greatest health consequences of ex-
13 treme heat often may experience the lowest heat risk
14 perceptions, have limited incentives, or have access
15 to the fewest resources for responding to extreme
16 heat, and as such, may be less likely to take pre-
17 cautions.

18 (12) Research on the impacts of extreme heat
19 on human health and the effectiveness of solutions
20 under varying climate, social, and other contexts is
21 stymied by a lack of access to reliable, timely health
22 observations and surveillance due to proprietary data
23 rights, expense, privacy and security concerns, incon-
24 sistent reporting of health outcomes and contribu-
25 tory factors, poor data integration and interoper-

1 ability, few incentives and little systematic coordina-
2 tion to address those problems, and a lack of ade-
3 quate climate observation, modeling, and assessment
4 in rural, urban, indoor, and occupational settings.

5 (13) Integrated climate and health research and
6 information, when developed in a collaborative,
7 transdisciplinary manner, can inform long- and me-
8 dium-range scenario-based planning and decision
9 making to protect vulnerable communities and popu-
10 lations from extreme heat, reduce exposure to ex-
11 treme heat, and address factors that increase vulner-
12 ability.

13 (14) Increased heat can have cascading and
14 compounding impacts across and among sectors in-
15 cluding energy, food supply and quality, transpor-
16 tation, housing, infrastructure, hospital and
17 healthcare delivery, and education, all of which af-
18 fect health and well-being.

19 (15) Heat action plans and early warning sys-
20 tems can reduce heat-related morbidity and mor-
21 tality by clearly identifying roles and responsibilities
22 as well as evidence-based actions and thresholds to
23 enhance preparedness, and by promoting behavior
24 changes and actions taken by local governments,
25 communities, and individuals through awareness and

increased risk perception among those most vulnerable to the health impacts of heat.

3 SEC. 4. NATIONAL INTEGRATED HEAT HEALTH INFORMATION SYSTEM INTERAGENCY COMMITTEE.

5 (a) ESTABLISHMENT OF COMMITTEE.—There is es-
6 tablished within the Office of Science and Technology Pol-
7 icy an interagency committee, to be known as the “Na-
8 tional Integrated Heat Health Information System Inter-
9 agency Committee” (in this section referred to as the
10 “Committee”).

11 (b) PURPOSE.—The Committee shall coordinate,
12 plan, and direct agencies represented on the Committee
13 to execute, as appropriate, activities across such agencies
14 to ensure a united Federal approach to reducing health
15 risks from heat across timescales (including days, weeks,
16 months, years, and decades).

17 (c) MEMBERSHIP.—

18 (1) IN GENERAL.—In order to carry out and
19 achieve the purpose described in subsection (b), the
20 Committee shall include the following:

(A) The Director of the National Integrated Heat Health Information System.

(B) Not fewer than 1 representative from each of the following:

(i) From the Department of Commerce, the following:

(aa) The National Weather Service.

(bb) The Office of Oceanic and Atmospheric Research.

(cc) The National Environmental Satellite, Data, and Information Service.

15 (III) The Bureau of the Census.

22 (II) The Office of the Assistant
23 Secretary of Health and Human Serv-
24 ices for Preparedness and Response.

(III) The Substance Abuse and Mental Health Services Administration.

(IV) The National Institutes of Health.

(V) The Indian Health Service.

(I) The Bureau of Indian Affairs.

(II) The Bureau of Land Management.

(III) The National Park Service.

(iv) From the Environmental Protection Agency, the following:

(I) The Office of Environmental Justice.

(II) The Office of Air and Radiation, if the Administrator of the Environmental Protection Agency determines appropriate.

(III) The Office of Research and Development, if the Administrator determines appropriate.

(IV) The Office of International and Tribal Affairs.

(v) The Federal Emergency Management Agency.

3 (vi) The Department of Defense.

4 (vii) The Department of Agriculture.

(viii) The Department of Housing and Urban Development.

(ix) The Department of Transportation

9 (x) The Department of Energy.

10 (xi) The Department of Labor, includ-
11 ing the Occupational Safety and Health
12 Administration.

13 (xii) The Department of Veteran Af-
14 fairs

1 science, public health hazard preparedness and re-
2 sponse, or mental health services.

3 (3) CO-CHAIRS.—

4 (A) IN GENERAL.—The members of the
5 Committee shall select 2 individuals from
6 among such members to serve as co-chairs of
7 the Committee, subject to the approval of the
8 Director of the Office of Science and Tech-
9 nology Policy.

10 (B) SELECTION.—

11 (i) INITIAL SELECTION.—Of the co-
12 chairs first selected, one co-chair shall be
13 from the National Oceanic and Atmos-
14 pheric Administration, and one co-chair
15 shall be from the Centers for Disease Con-
16 trol and Prevention.

17 (ii) SUBSEQUENT SELECTION.—Sub-
18 sequent co-chairs shall be selected from
19 among the members of the Committee.

20 (C) TERMS.—Each co-chair shall serve for
21 a term of not more than 5 years.

22 (D) RESPONSIBILITIES OF CO-CHAIRS.—
23 The co-chairs of the Committee shall work with
24 the Director of the National Integrated Heat
25 Health Information System—

(i) to determine the agenda of the Committee, in consultation with other members of the Committee;

(ii) to direct the work of the Committee; and

(iii) to convene meetings of the Committee not less frequently than once each fiscal quarter.

9 (d) RESPONSIBILITIES OF COMMITTEE.—The Com-
10 mittee shall promote an integrated, Federal Government-
11 wide approach to reducing health risks and impacts of
12 heat, including by—

(3) building capacity and partnerships with Federal and non-Federal entities.

20 (e) STRATEGIC PLAN.—

1 cluding how the Committee will improve coordination
2 and integration of interagency Federal actions to ad-
3 dress health risks of heat, including—

4 (A) a strategy for improving and coordi-
5 nating existing Federal data collection and data
6 management to include sharing of data and sta-
7 tistics on heat-related illnesses and mortalities
8 and other impacts to inform heat-related activi-
9 ties;

10 (B) a strategy for improving and coordi-
11 nating Federal activities to understand user
12 gaps and needs, conduct research, foster inno-
13 vative solutions, and provide actionable infor-
14 mation and services; and

15 (C) mechanisms for financing heat pre-
16 paredness within such agencies as the Com-
17 mittee considers appropriate.

18 (2) IMPLEMENTATION PLANS.—The head of an
19 agency represented on the Committee may imple-
20 ment the portions of the strategic plan required by
21 paragraph (1) that are relevant to that agency by
22 developing and implementing a multi-year implemen-
23 tation plan.

24 (3) UPDATES.—Not later than 5 years after the
25 submission of the strategic plan required by para-

1 graph (1), the Committee shall submit to Congress
2 an update of the plan, which shall include progress
3 made toward goals outlined in the plan and new pri-
4 orities that emerge.

5 (f) ADMINISTRATIVE SUPPORT.—The Administrator
6 of the National Oceanic and Atmospheric Administration
7 shall provide technical and administrative support to the
8 Committee, using amounts authorized to be appropriated
9 to the Administration.

10 (g) CONSULTATION.—In carrying out the responsibil-
11 ities of the Committee, the Committee shall consult with
12 relevant regional, State, Tribal, and local governments,
13 international organizations and partners, research institu-
14 tions, nongovernmental organizations and associations,
15 and medical experts with expertise in emergency response,
16 environmental health, economic or business development,
17 or community engagement.

18 **SEC. 5. NATIONAL INTEGRATED HEAT HEALTH INFORMA-**
19 **TION SYSTEM.**

20 (a) ESTABLISHMENT.—The Under Secretary of Com-
21 merce for Oceans and Atmosphere shall establish within
22 the National Oceanic and Atmospheric Administration a
23 system, to be known as the “National Integrated Heat
24 Health Information System” (NIHHIS) (in this section
25 referred to as the “System”).

1 (b) PURPOSE.—The purpose of the System is to im-
2 prove the capacity of weather, subseasonal, and seasonal
3 forecasts for the United States to allow the Federal Gov-
4 ernment and stakeholders to plan, prepare for, adapt to,
5 and mitigate health risks of extreme heat across multiple
6 timescales.

7 (c) DIRECTOR.—The System shall be headed by a Di-
8 rector.

9 (d) RESPONSIBILITIES.—In carrying out the purpose
10 described in subsection (b), the Director shall—

11 (1) develop and sustain robust relationships
12 with Federal and non-Federal partners and decision-
13 makers—

14 (A) to respond to the demand for action-
15 able weather- and climate-related information
16 that reduces health risks on multiple timescales;

17 (B) to conduct research and scientific in-
18 novation; and

19 (C) to develop and deliver timely and ac-
20 cessible decision support services, solutions,
21 tools, and information to inform planning, pre-
22 paredness, and risk-reducing actions across
23 timescales;

24 (2) coordinate and collaborate with the inter-
25 national community and global partners to conduct

1 research and learn from, leverage, and contribute to
2 global knowledge as it pertains to predicting and
3 preventing the impacts of increased heat;

4 (3) enhance observations, surveillance, monitoring, and analysis necessary for the activities de-
5 scribed in paragraphs (1) and (2); and

6 (4) communicate, educate, and build awareness
7 regarding the risks and impacts of increased heat
8 and extreme heat events to communities, educational
9 and economic sectors, Tribal governments, and other
10 relevant stakeholders.

11 (e) DATA MANAGEMENT.—

12 (1) AVAILABILITY.—The Director shall coordi-
13 nate with interagency partners to ensure that data
14 and metadata associated with the System is fully
15 and openly available, within the legal right to redis-
16 tribute, in accordance with chapter 31 of title 44,
17 United States Code (commonly known as the “Fed-
18 eral Records Act of 1950”), and the Federal Evi-
19 dence-Based Policymaking Act of 2018 (Public Law
20 115–435; 132 Stat. 5529) and the amendments
21 made by that Act, to maximize use of such data to
22 support the goals of the System.

23 (2) NATIONAL CENTERS FOR ENVIRONMENTAL
24 INFORMATION.—The Under Secretary of Commerce

1 for Oceans and Atmosphere shall manage, maintain,
2 and steward archival data and metadata associated
3 with the System within the National Centers for En-
4 vironmental Information.

5 (f) RESEARCH PROGRAM.—The Director shall de-
6 velop and implement a climate and health research grant
7 program, in coordination with the financial assistance pro-
8 gram under section 7 and other Federal programs—

9 (1) to improve understanding of—

10 (A) the climate epidemiology and social,
11 behavioral, and economic drivers of heat-health
12 vulnerability and risk;

13 (B) the drivers of climate variability, pre-
14 dictability, and changes in extreme heat; and

15 (C) the impacts of extreme heat, compound
16 hazards, and cascading impacts across
17 timescales;

18 (2) to investigate and evaluate the effectiveness
19 of risk management actions, interventions, policies,
20 standards, codes, and guidelines; and

21 (3) to address other topics as appropriate, in-
22 cluding topics outlined in the strategic plan required
23 by section 4(e)(1) and the financial assistance pro-
24 gram under section 7.

1 (g) ADDITIONAL ACTIVITIES.—The Director shall
2 carry out such other activities as the Committee considers
3 appropriate.

4 **SEC. 6. STUDY ON EXTREME HEAT INFORMATION AND RE-**

5 **SPONSE.**

6 (a) STUDY.—

7 (1) IN GENERAL.—Not later than 120 days
8 after the date of the enactment of this Act, the
9 Under Secretary of Commerce for Oceans and At-
10 mosphere, in consultation with the National Inte-
11 grated Heat Health Information System Interagency
12 Committee and the individuals and entities described
13 in section 4(g), shall seek to enter into an agreement
14 with the National Academies of Science, Engineer-
15 ing, and Medicine to conduct a study on extreme
16 heat information and response, to be completed not
17 later than 3 years after such date of enactment.

18 (2) ELEMENTS.—The study described in para-
19 graph (1) shall—

20 (A) identify policy and research gaps,
21 which may include—

22 (i) regions of the United States with
23 the largest gaps between awareness, pre-
24 paredness, and capacity to address extreme
25 heat; and

(ii) heat-related gaps in data, such as—

(I) the number of schools, prisons, and other public facilities that lack air conditioning;

6 (II) the demographic breakdown
7 of people affected by heat events, in-
8 cluding by race, age, gender, occupa-
9 tion, and income;

10 (III) medical coding in health
11 care facilities (such as hospitals,
12 emergency rooms, and health centers)
13 that indicate heat-related illnesses
14 (such as kidney failure, dehydration,
15 and fainting spells); and

16 (IV) with respect to public policy
17 at the State and community level that
18 enhance vulnerabilities to extreme
19 heat (such as outdoor working condi-
20 tions and thresholds to protect work-
21 ers, animals, and others susceptible to
22 heat-related illness);

23 (B) provide recommendations for address-
24 ing gaps with respect to policy, research, oper-
25 ations, communications, and data, including the

1 gaps identified under subparagraph (A), affecting
2 heat-health planning, preparedness, response,
3 resilience, adaptation, and environmental
4 justice and equity;

5 (C) provide such other recommendations as
6 the Director considers appropriate, which may
7 include strategies for—

8 (i) communicating warnings to and
9 providing impact-based decision support to
10 promote preparedness actions and resilience
11 of populations vulnerable to extreme
12 heat;

13 (ii) understanding compound and cascading
14 risks, and implementing alternative
15 heat-health risk reduction interventions to
16 manage those risks collectively, such as reducing
17 risk of the transmission of infectious diseases
18 during heat waves by creating outdoor cooling
19 locations or increasing ventilation and filtration
20 in indoor cooling centers;

22 (iii) promoting community resilience
23 to heat events and incorporating principles
24 of environmental justice in community response
25 to heat waves;

(iv) addressing the impacts of extreme

heat on energy cost, affordability, and reliability for residential and commercial infrastructure (such as weatherization, energy costs, electric power systems, and water supply and treatment systems); and

(v) establishing labor and other stand-

ards for workers and heat; and

(D) consider such other subjects as the

Committee considers appropriate, which may in-

clude—

(i) the feasibility of enhancing and

standardizing existing nationwide data col-

lection on heat-related illnesses and mortalities to improve and ensure consistent

collection of national-level heat illness data

across all 50 States, territories, and local jurisdictions of the United States.

(ii) mechanisms for financing heat

carelessness, and

(iii) the effectiveness of county or local-level heat awareness and communica-

tion approaches, heat action, and tools, preparedness plans or mitigation

8 (b) REPORT.—Not later than 90 days after com-
9 pleting the study described in subsection (a)(1), the Com-
10 mittee shall—

15 (2) submit the report to—

20 (C) the Committee on Science, Space, and
21 Technology of the House of Representatives:

24 (E) the Committee on Education and the
25 Workforce of the House of Representatives.

1 SEC. 7. FINANCIAL ASSISTANCE FOR RESILIENCE IN AD-

2 DRESSING EXTREME HEAT AND HEALTH

3 RISKS.

4 (a) IN GENERAL.—

5 (1) ESTABLISHMENT.—Not later than 1 year
6 after the date of the enactment of this Act, the Di-
7 rector of the National Integrated Heat Health Infor-
8 mation System may, in coordination with the Na-
9 tional Integrated Heat Health Information System
10 Interagency Committee, establish and administer a
11 community heat resilience program to provide finan-
12 cial assistance to eligible entities to carry out
13 projects described in subsection (e) to ameliorate
14 human health impacts of extreme heat events.

15 (2) REVISION.—Upon completion of the stra-
16 tegic plan required by section 4(e)(1), the Com-
17 mittee may revise the community heat resilience pro-
18 gram to ensure the program aligns with the strategic
19 plan and is administered in accordance with the
20 plan.

21 (b) PURPOSE.—The purpose of the financial assist-
22 ance provided under this section is to improve community
23 resilience to heat and heat-health impacts and further sci-
24 entific research to address adaptation gaps and priorities.

1 (c) FORMS OF ASSISTANCE.—Financial assistance
2 provided under this section may be in the form of prizes,
3 contracts, grants, or cooperative agreements.

4 (d) ELIGIBLE ENTITIES.—Entities eligible to receive
5 financial assistance under this section to carry out
6 projects described in subsection (e) include—

- 7 (1) nonprofit entities;
- 8 (2) States;
- 9 (3) Tribal governments;
- 10 (4) local governments;
- 11 (5) local workforce development boards; and
- 12 (6) academic institutions.

13 (e) ELIGIBLE PROJECTS.—Projects described in this
14 subsection include the following:

- 15 (1) Projects to reduce heat-health risks, includ-
16 ing sustainable heat reduction and mitigation solu-
17 tions such as for cool roofs, cool pavements, urban
18 forestry or tree plantings and maintenance, the pro-
19 vision of shade, cooling and resilience centers, retro-
20 fitting buildings for cooling, improving the resilience
21 of the power grid to ensure reliable air conditioning,
22 energy efficiency, acquisitions or upgrades of filtra-
23 tion systems or high-efficiency air conditioning sys-
24 tems, and strategies to improve community level re-
25 sponse before and during a heat event.

- 1 (2) Training programs to support the development and integration of education and training programs for identifying and addressing risks associated with climate change for vulnerable individuals.
- 5 (3) Projects focusing on being responsive to heat-related needs from communities heard from engagements at different geographic scales (national to regional to local) including—
- 9 (A) to expand public awareness of heat risks;
- 11 (B) to conduct community-based climate and health observational campaigns;
- 13 (C) to conduct scientific research to assess gaps and priorities regarding the risks of extreme heat in communities;
- 16 (D) to communicate risks and warnings to isolated communities;
- 18 (E) to support the establishment of workplace policies and practices to reduce the risk of extreme heat illness among workers;
- 21 (F) to educate such communities about how to respond to extreme heat events; and
- 23 (G) to establish local, city, and county heat planning and heat-related emergency action plans.

1 (4) Other projects that the Director determines
2 will achieve a significant reduction in heat exposure
3 or increased resilience to increased heat or extreme
4 heat events.

5 (f) PRIORITIES.—In selecting eligible entities to re-
6 ceive financial assistance under this section, the Director
7 shall prioritize entities that will carry out projects that
8 provide benefits for historically disadvantaged commu-
9 nities and communities with significant heat disparities
10 associated with race, ethnicity, or income.

11 (g) DISTRIBUTION OF ASSISTANCE.—

12 (1) COMMUNITIES WITH ENVIRONMENTAL JUS-
13 TICE CONCERN AND LOW INCOME COMMUNITIES.—
14 Not less than 40 percent of the amount of financial
15 assistance provided under this section in any fiscal
16 year shall be provided to eligible entities to imple-
17 ment projects described in subsection (e) in commu-
18 nities with environmental justice concerns or low-in-
19 come communities.

20 (2) EQUITABLE DISTRIBUTION.—The Director
21 shall seek to equitably distribute financial assistance
22 provided under this section based on geographic lo-
23 cation or such other factors as the Director deter-
24 mines appropriate.

1 **SEC. 8. AUTHORIZATION OF APPROPRIATIONS.**

2 (a) NATIONAL INTEGRATED HEAT HEALTH INFOR-
3 MATION SYSTEM INTERAGENCY COMMITTEE; NATIONAL
4 INTEGRATED HEAT HEALTH INFORMATION SYSTEM;
5 STUDY ON EXTREME HEAT INFORMATION AND RE-
6 SPONSE.—There is authorized to be appropriated to the
7 National Oceanic and Atmospheric Administration to
8 carry out sections 4 and 5, including for any administra-
9 tive costs for the National Integrated Heat Health Infor-
10 mation System Interagency Committee and the National
11 Integrated Heat Health Information System, the fol-
12 lowing:

- 13 (1) For fiscal year 2024, \$20,000,000.
14 (2) For fiscal year 2025, \$20,000,000.
