A BILL

To increase access to pre-exposure prophylaxis to reduce
the transmission of HIV.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

1 **SECTION 1. SHORT TITLE.**

2 This Act may be cited as the “PrEP Access and Cov-
3 erage Act”.

4 **SEC. 2. FINDINGS; SENSE OF CONGRESS.**

5 (a) FINDINGS.—Congress finds as follows:

6 (1) The Centers for Disease Control and Pre-
7 vention estimates that approximately 1,100,000 peo-
8 ple in the United States are living with HIV.

9 (2) In 2019, there were 36,398 new diagnoses
10 of HIV in the United States.

11 (3) HIV disproportionately impacts gay and bi-
12 sexual men, transgender women, and, in particular,
13 people of color. For example, in 2019, approximately
14 66 percent of new HIV diagnoses were among gay
15 and bisexual men, 42 percent of new HIV diagnoses
16 were among Black people, and 22 percent of new
17 HIV diagnoses were among Latinx people. Recent
18 studies suggest that transgender women are up to
19 49 times more likely to be diagnosed with HIV than
20 the general population. Members of communities at
21 the intersections of these groups are most heavily
22 impacted.

23 (4) Pre-exposure prophylaxis (referred to in this
24 section as “PrEP”) is a daily antiretroviral medica-
25 tion that helps prevent individuals from acquiring
26 HIV. Daily PrEP use reduces the risk of getting

1 HIV from sex by about 99 percent. It reduces the
2 risk of getting HIV from injection drug use by at
3 least 74 percent.

4 (5) Many individuals at risk of exposure to HIV
5 do not use PrEP. Of the approximately 1,100,000
6 people in the United States who could benefit from
7 PrEP, only 23 percent, or nearly 285,000 individ-
8 uals, filled prescriptions for the drug in 2019.

9 (6) PrEP usage is inconsistent across racial
10 and gender lines. In 2019, only 8 percent of Black/
11 African American and 14 percent of Hispanic/Latinx
12 persons who were eligible for PrEP were prescribed
13 it, compared to 63 percent of White persons. Addi-
14 tionally, slightly less than 10 percent of women eligi-
15 ble for PrEP received a prescription in 2019.

16 (7) There are currently 2 brand name drugs
17 and 1 generic drug approved by the Food and Drug
18 Administration for the use of PrEP on a daily basis.
19 Other types of HIV prevention treatments, including
20 a long-acting injectable, which is currently under
21 FDA review, and long-acting oral pills, implants,
22 and vaginal rings are in the research pipeline. These
23 new innovations can increase widespread use of
24 PrEP along with adherence, which can speed the

1 Nation’s goal to end HIV and address inequities in
2 health care.

3 (8) Section 2713 of the Public Health Service
4 Act (42 U.S.C. 300gg–13) requires most private
5 health insurance plans to cover preventive services
6 without cost-sharing, including such services with a
7 rating of “A” or “B” under recommendations of the
8 United States Preventive Services Task Force. On
9 June 11, 2019, the United States Preventive Serv-
10 ices Task Force issued a final recommendation giv-
11 ing an “A” grade for PrEP for individuals at high
12 risk of HIV; non-grandfathered private health insur-
13 ance plans have to cover PrEP for such individuals
14 without cost-sharing effective January 2021.

15 (9) Joint guidance issued by the Department of
16 Labor, the Department of Health and Human Serv-
17 ices, and the Department of the Treasury on July
18 19, 2021, clarifies that ancillary services necessary
19 to maintain the PrEP regime, including subsequent
20 provider visits, clinical testing, and other services, is
21 required to be covered by health insurers without
22 cost-sharing.

23 (10) Permanently expanding access to cost-free
24 PrEP and ancillary services for all individuals, in-
25 cluding individuals who do not have health insur-

1 ance, through legislation, is a critical step towards
2 eliminating HIV transmission.

3 (11) Post-exposure prophylaxis (referred to in
4 this section as “PEP”) is a daily antiretroviral
5 treatment which, when initiated promptly after a
6 sexual or other exposure to blood or body fluids that
7 is associated with a high risk of HIV transmission,
8 is highly effective at preventing HIV infection.

9 (12) The Centers for Disease Control and Pre-
10 vention recommends PEP for an individual who has
11 experienced a high-risk exposure incident, provided
12 that the individual tests HIV-negative, initiates such
13 treatment no later than 72 hours after exposure,
14 and continues the treatment for 28 days.

15 (13) Despite PEP’s proven effectiveness in pre-
16 venting HIV infection after high-risk sexual expo-
17 sures, awareness of PEP is low among individuals
18 who would benefit from the treatment. Studies sug-
19 gest that awareness of PEP and of the importance
20 of its prompt initiation is particularly low among
21 young gay and bisexual men of color, transgender
22 persons, and women of all gender identities.

23 (14) Adequate knowledge of guidelines issued
24 by the Centers for Disease Control and Prevention
25 for assessing indications for PEP and for initiating

1 and sustaining PEP are low among health care pro-
2 viders and staff. Because PEP is an emergency
3 intervention, insufficient knowledge among providers
4 and staff in hospital emergency rooms, urgent care
5 centers, community health centers, and primary care
6 physicians is of particular concern.

7 (15) Private and public health insurance plans
8 and programs frequently impose requirements for
9 coverage of PEP, including pre-authorization re-
10 quirements and requirements to obtain the medica-
11 tions through designated specialty pharmacies and
12 mail-order programs that pose significant obstacles
13 to timely initiation of treatment.

14 (16) Insurance deductibles and co-payments for
15 PEP medications create significant barriers to PEP
16 utilization by many individuals who have experienced
17 high-risk incidents.

18 (b) SENSE OF CONGRESS.—It is the sense of Con-
19 gress that the Department of Labor, the Department of
20 Health and Human Services, and the Department of the
21 Treasury should ensure compliance with the requirements
22 described in paragraphs (8) and (9) of subsection (a).

23 **SEC. 3. COVERAGE OF HIV TESTING AND PREVENTION**
