

114TH CONGRESS
1ST SESSION

H. RES. 106

Supporting quality of life for prostate cancer patients.

IN THE HOUSE OF REPRESENTATIVES

FEBRUARY 11, 2015

Mr. PAULSEN (for himself, Mr. PAYNE, Mr. FRANKS of Arizona, Mr. WILSON of South Carolina, Mr. MACARTHUR, Mr. THOMPSON of Mississippi, Mr. SENSENBRENNER, Mr. MESSER, and Mr. LANCE) submitted the following resolution; which was referred to the Committee on Energy and Commerce, and in addition to the Committees on Ways and Means and Veterans' Affairs, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

RESOLUTION

Supporting quality of life for prostate cancer patients.

Whereas an estimated 233,000 men will be diagnosed with prostate cancer in 2014 adding to the estimated 2,700,000 men currently living with prostate cancer in the United States;

Whereas approximately 15 percent of men will be diagnosed with prostate cancer during their lifetime and prostate cancer is the second leading cause of death in men in the United States;

Whereas African-American males suffer from a 60-percent higher incidence of prostate cancer than White males and

have an almost 250-percent higher mortality rate than White males;

Whereas certain veterans populations may have nearly twice the incidence of prostate cancer as the general population of the United States;

Whereas there are a number of options available to men to treat prostate cancer, including radiation, hormone therapy, chemotherapy, and a radical prostatectomy;

Whereas many men who undertake these treatment options for their prostate cancer will experience significant side effects including incontinence and impotence;

Whereas the side effects of prostate treatment can negatively affect a prostate cancer survivor's quality of life and contribute to depression and anxiety;

Whereas the spouse or partner of the prostate cancer survivor is emotionally impacted as the intimacy of the relationship can become strained;

Whereas prostate cancer survivors suffering from the side effects of treatment deserve access to the prosthetic urologic interventions and reconstructive surgeries that can restore the patient to a physical state similar to that prior to the prostate cancer treatment;

Whereas the need for these urologic restoration products can also be a last line of intervention for patients suffering from diabetes, cardiovascular disease, Parkinson's disease, or multiple sclerosis; and

Whereas Medicare and the Veterans' Administration currently cover medical devices such as artificial urinary sphincters and penile prosthesis: Now, therefore, be it

1 *Resolved*, That it is the sense of the House of Rep-
2 resentatives that Congress should protect Medicare or Vet-
3 erans' Administration benefits for medical device treat-
4 ments for male incontinence and impotence that result
5 from treatment for prostate cancer, diabetes, cardio-
6 vascular disease, Parkinson's disease, or multiple sclerosis
7 and that any such coverage decisions should be based on
8 data and made after careful review by medical experts
9 with a critical eye toward the impact of coverage decisions
10 on the Medicare and Veterans' Administration popu-
11 lations.
