

115TH CONGRESS  
1ST SESSION

# S. 1299

To amend title XVIII of the Social Security Act to reduce the occurrence of diabetes in Medicare beneficiaries by extending coverage under Medicare for medical nutrition therapy services to such beneficiaries with pre-diabetes or with risk factors for developing type 2 diabetes.

---

## IN THE SENATE OF THE UNITED STATES

JUNE 7, 2017

Mr. PETERS (for himself and Mrs. CAPITO) introduced the following bill;  
which was read twice and referred to the Committee on Finance

---

## A BILL

To amend title XVIII of the Social Security Act to reduce the occurrence of diabetes in Medicare beneficiaries by extending coverage under Medicare for medical nutrition therapy services to such beneficiaries with pre-diabetes or with risk factors for developing type 2 diabetes.

1       *Be it enacted by the Senate and House of Representa-  
2 tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4       This Act may be cited as the “Preventing Diabetes  
5 in Medicare Act of 2017”.

6 **SEC. 2. FINDINGS.**

7       Congress finds the following:

1                   (1) According to the Centers for Disease Con-  
2 trol and Prevention, there are 86,000,000 adults  
3 with pre-diabetes in the United States. The Centers  
4 estimates that 51 percent of adults who are 65 years  
5 of age or older have pre-diabetes. More than 90 per-  
6 cent of adults with pre-diabetes are unaware they  
7 have it.

8                   (2) For a significant number of people with  
9 pre-diabetes, early intervention can reverse elevated  
10 blood glucose levels to normal range and prevent di-  
11 abetes and its complications completely or can sig-  
12 nificantly delay its onset. According to the Institute  
13 for Alternative Futures, if 50 percent of adults with  
14 pre-diabetes were able to successfully make lifestyle  
15 changes proven to prevent or delay diabetes, then by  
16 2025 approximately 4,700,000 new cases of diabetes  
17 could be prevented at a cost savings of \$300 billion.

18                   (3) Nearly 1-in-5 hospitalizations in 2008 were  
19 related to diabetes according to the Agency for  
20 Healthcare Research and Quality.

21                   (4) Preventing diabetes and its complications  
22 can save money and lives. The average annual cost  
23 to treat someone with diabetes is \$13,741, compared  
24 to \$3,495 for someone who does not have diabetes.

1       One out of every three Medicare dollars is spent on  
2       diabetes.

3           (5) Diabetes is unique because its complications  
4       and their associated health care costs are often pre-  
5       ventable with currently available medical treatment  
6       and lifestyle changes.

7           (6) In 2002, the Diabetes Prevention Program  
8       study conducted by the National Institutes of Health  
9       found that participants (all of whom were at in-  
10      creased risk of developing type 2 diabetes) who made  
11      lifestyle changes reduced their risk of developing  
12      type 2 diabetes by 58 percent and that participants  
13      who are 60 years of age or older reduced their risk  
14      of developing diabetes by 71 percent.

15          (7) The Agency for Healthcare Research and  
16       Quality has demonstrated that \$2,500,000,000 in  
17       hospitalization costs related to the treatment of dia-  
18       betes or complications resulting from diabetes could  
19       be saved by providing seniors with appropriate pri-  
20       mary care to prevent the onset of diabetes.

21          (8) The Medicare program currently provides  
22       coverage for screening and identifying beneficiaries  
23       with pre-diabetes but does not provide adequate  
24       services to such beneficiaries to help them prevent or  
25       delay the onset of diabetes.

1   **SEC. 3. MEDICARE COVERAGE OF MEDICAL NUTRITION**  
2                   **THERAPY SERVICES FOR PEOPLE WITH PRE-**  
3                   **DIABETES AND RISK FACTORS FOR DEVELO-**  
4                   **OPING TYPE 2 DIABETES.**

5       (a) IN GENERAL.—Section 1861 of the Social Security Act (42 U.S.C. 1395x) is amended—

7                  (1) in subsection (s)(2)(V), by striking “a beneficiary with diabetes or a renal disease” and inserting “an individual with diabetes, pre-diabetes (as defined in subsection (yy)(4)), or a renal disease, or an individual at risk for diabetes (as defined in subsection (yy)(2)),” in the matter preceding clause (i);  
13                  and

14                  (2) in subsection (yy)—

15                   (A) in the heading, by adding “; Pre-Diabetes” at the end; and  
16                   (B) by adding at the end the following new paragraph:

19                  “(4) The term ‘pre-diabetes’ means a condition of impaired fasting glucose or impaired glucose tolerance identified by a blood glucose level that is higher than normal, but not so high as to indicate actual diabetes.”.

23       (b) EFFECTIVE DATE.—The amendments made by this section shall apply with respect to services furnished on or after January 1, 2019.
