111TH CONGRESS 1ST SESSION

S. 693

To amend the Public Health Service Act to provide grants for the training of graduate medical residents in preventive medicine and public health.

IN THE SENATE OF THE UNITED STATES

March 25, 2009

Mr. Harkin (for himself, Mr. Isakson, Mr. Bingaman, and Mr. Lieberman) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To amend the Public Health Service Act to provide grants for the training of graduate medical residents in preventive medicine and public health.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Preventive Medicine
- 5 and Public Health Training Act".
- 6 SEC. 2. FINDINGS.
- 7 Congress makes the following findings:
- 8 (1) The American Board of Preventive medicine
- 9 defines preventive medicine as "that specialty of

- medical practice which focuses on the health of individuals and defined populations in order to protect, promote and maintain health and well-being and prevent disease, disability and premature death".
 - (2) Specialists in preventive medicines are uniquely trained in both clinical medicine and public health. They have the skills needed to understand and reduce the risks of disease, disability, and death in individuals and in population groups.
 - (3) Preventive medicine includes both clinical and non-clinical aspects. Clinicians see patients on a daily basis and provide services in screening, health counseling, and immunization to diabetics, cardiac patients, and others who can benefit from prevention and lifestyle modification. Non-clinical preventive medicine includes health policy, social and behavioral aspects of health and disease, epidemiology, or other areas in which populations, not individual patients are not the primary focus. Many preventive medicine physicians practice both clinical and non-clinical medicine.
 - (4) Of the 24 medical specialities recognized by the American Board of Medical Specialties, preventive medicine is the only specialty that requires training in both clinical medicine and public health.

- 1 (5) While preventive medicine doctors are em2 ployed in all health sectors, they often serve in lead
 3 roles within the public health force, working in State
 4 and local health departments, as well as Federal
 5 Government agencies, such as the Centers for Dis6 ease Control and Prevention and the National Insti7 tutes of Health.
 - (6) In the workplace, preventive medicine doctors in occupational medicine parallel the general public health system in dealing with illnesses and injuries in workplace populations through worker protection, personal health promotion, hazard control, business continuity and effective medical management.
 - (7) There is an extreme shortage of doctors in the public health field. For example, only 23 percent of local health agencies are directed by physicians and 8 percent are directed by physicians who have masters of public health degrees or are fellows in the American College of Preventive Medicine.
 - (8) Many of these physicians are nearing retirement, and the average age of a public health doctor today is 58 years.
 - (9) The Health Resources and Services Administration reports that the demand for public health

- professionals will grow at twice the rate of all occupations between 2000 and 2010.
 - (10) In addition, as the body of evidence supporting the effectiveness of clinical and population-based interventions to prevent and control diseases continues to expand, so does the need for specialists trained in preventive medicine.
 - (11) The Health Resources and Services Administration reported that in 2000, there were 7,011 preventive medicine specialists. This was a decrease from 7,734 in 1970.
 - (12) The number of preventive medicine residency programs has decreased from 90 in 1998–1999 to 76 programs today. Over this same period, the number of preventive medicine residents declined from 420 to 364.
 - (13) In 2000, less than 3 percent of all medical school faculty also held masters degrees in public health. An even smaller number had completed preventive medicine training or were board certified in preventive medicine.
 - (14) Preventive medicine trained physicians are an essential part of the public health workforce and are critical to the Nation's ability to protect its citi-

1	zens from biological threats, including avian influ-
2	enza and emerging threats from bioterrorism.
3	SEC. 3. PREVENTIVE MEDICINE AND PUBLIC HEALTH
4	TRAINING GRANT PROGRAM.
5	Part D of title III of the Public Health Service Act
6	(42 U.S.C. 254b et seq.) is amended by adding at the end
7	the following:
8	"Subpart XI—Preventive Medicine Training
9	"SEC. 340H. PREVENTIVE MEDICINE AND PUBLIC HEALTH
10	TRAINING GRANT PROGRAM.
11	"(a) Grants.—The Secretary, acting through the
12	Director of the Centers for Disease Control and Preven-
13	tion, may award grants to, or enter into contracts with,
14	eligible entities to provide training to graduate medical
15	residents in preventive medicine specialties.
16	"(b) Eligibility.—To be eligible to receive a grant
17	or contract under subsection (a), an entity shall—
18	"(1) be a school of public health, public health
19	department, school of medicine or osteopathic medi-
20	cine, public or private hospital, or public or private
21	non-profit entity;
22	"(2) submit to the Secretary an application at
23	such time, in such manner, and containing such in-
24	formation as the Secretary may require: and

1 "(3) maintain and adhere to a Letter of Agree-2 ment with a local community health center (if available in the local area involved) that supports 3 practicum training of preventive medicine residents, 5 if practicable. 6 "(c) Use of Funds.—Amounts received under a 7 grant or contract under this section shall be used to— "(1) plan, develop, and operate residency pro-8 9 grams for preventive medicine or public health; 10 "(2) provide financial assistance, including tui-11 tion and stipends, to resident physicians (MD or 12 DO) who plan to specialize in preventive medicine or 13 public health; 14 "(3) defray the costs associated with the plan-15 ning, development, and operation of preventive medi-16 cine or public health programs, including the devel-17 opment of curriculum to be used in such programs, 18 and the costs of practicum experiences; and 19 "(4) provide for the improvement of academic 20 administrative units. "(d) Duration of Award.—A grant or contract 21 22 under this section shall be for a term not to exceed 5 23 years. "(e) AUTHORIZATION OF APPROPRIATIONS.—There 24

25 is authorized to be appropriated to carry out this section,

- 1 \$43,000,000 for fiscal year 2010, and such sums as may
- 2 be necessary for each succeeding fiscal year.".
