## RESOLUTION

Designating October 23, 2023, as “National Marine  
Sanctuary Day”.

Whereas, on October 23, 1972, the Marine Protection, Research, and Sanctuaries Act of 1972 (33 U.S.C. 1401 et seq.) became law and ushered in a new era of ocean conservation;

Whereas the National Marine Sanctuary System is a nationwide network that conserves spectacular oceans, coasts, and Great Lakes;

Whereas communities across the United States can nominate their most treasured marine and Great Lakes waters for consideration as national marine sanctuaries;

Whereas national marine sanctuaries protect biodiversity, safeguard extraordinary seascapes, historic shipwrecks,

and sacred cultural places, and provide abundant recreational opportunities;

Whereas national marine sanctuaries seek opportunities to partner with indigenous governments and communities to achieve shared conservation goals and to support the care-taking of ecological resources and cultural sites of indigenous peoples;

Whereas national marine sanctuaries protect vital habitats for countless species of fish and wildlife, including many species that are listed as threatened or endangered;

Whereas the conservation of marine ecosystems is vital for healthy oceans, coasts, and Great Lakes, for addressing climate change, and for sustaining productive coastal economies;

Whereas the National Marine Sanctuary Foundation and its partners work to protect and nurture the growth of the National Marine Sanctuary System;

Whereas national marine sanctuaries increase access to nature for all, support coastal communities, and generate billions of dollars annually in local communities by providing jobs in the United States, supporting commercial, Tribal, and recreational fisheries, bolstering tourism and recreation, engaging businesses in stewardship, and driving the growth of the blue economy;

Whereas national marine sanctuaries connect people and communities through science, education, United States history, recreation, and stewardship and inspire community-based solutions that help individuals understand and protect the spectacular underwater habitats, wildlife, archaeological resources, and cultural seascapes of the United States;

Whereas national marine sanctuaries are living laboratories that enable cooperative science and research that improves resource management and advances innovative public-private partnerships;

Whereas national marine sanctuaries can help make oceans, coasts, and Great Lakes more resilient by protecting ecosystems that sequester carbon, by safeguarding coastal communities from flooding and storms, and by protecting biodiversity;

Whereas the United States is a historic maritime Nation, and oceans, coasts, and Great Lakes are central to the way of life of the people of the United States;

Whereas engaging communities as stewards of these protected waters makes national marine sanctuaries unique and provides a comprehensive, ecosystem-based, highly participatory approach to managing and conserving marine and Great Lakes environments for current and future generations; and

Whereas October 23, 2023, is recognized as “National Marine Sanctuary Day” to increase awareness about the importance of the National Marine Sanctuary System and healthy oceans, coasts, and Great Lakes and to celebrate the many recreational opportunities available for the enjoyment of this network of protected waters: Now, therefore, be it

1       *Resolved*, That the Senate—
